This latest guide in the highly successful Must-Read series depicts 100 of the finest historical fiction tales published, with a further 500 recommendations. The text covers a wide range of classic works and key authors. David M. Potter's Pulitzer Prize-winning *The Impending Crisis* is the definitive history of antebellum America. Potter's sweeping epic masterfully charts the chaotic forces that climaxed with the outbreak of the Civil War: westward expansion, the divisive issue of slavery, the Dred Scott decision, John Brown's uprising, the ascension of Abraham Lincoln, and the drama of Southern succession. Now available in a new edition, *The Impending Crisis* remains one of the most celebrated works of American historical writing. For use in schools and libraries only. Offers brief biographies of African American educators, entertainers, inventors, authors, athletes, and others who have made important contributions to American life. Problems that beset Archimedes, Newton, Euler, Cauchy, Gauss, Monge, Steiner, and other great mathematical minds. Features squaring the circle, pi, and similar problems. No advanced math is required. Includes 100 problems with proofs. Can the novel survive in an age

when tales of historical figures and contemporary personalities dominate the reading lists of the book-buying public? Naomi Jacobs addresses this question in a study of writers such as William Styron, E. L. Doctorow, and Robert Coover, who challenge the dominance of nonfiction by populating their fictions with real people, living and dead. Jacobs explores the genesis, varieties, and implications of this trend in a prose as lively as that of the writers she critiques. Using as a case study Robert Coover's portrait of Richard Nixon in *The Public Burning*, Jacobs addresses the important legal and ethical questions raised by this trend and applies contemporary libel law to the fictionalization of living people, such as Richard Nixon. She closes her study by speculating on the future of this device and of the novel.

Chronic homelessness is a highly complex social problem of national importance. The problem has elicited a variety of societal and public policy responses over the years, concomitant with fluctuations in the economy and changes in the demographics of and attitudes toward poor and disenfranchised citizens. In recent decades, federal agencies, nonprofit organizations, and the philanthropic community have worked hard to develop and implement programs to solve the challenges of homelessness, and progress has been made. However, much more remains to be done. Importantly, the results of various efforts, and especially the efforts to reduce homelessness among veterans in recent years, have shown that the problem of homelessness can be successfully addressed. Although a number of programs have been developed to meet the needs of persons experiencing

homelessness, this report focuses on one particular type of intervention: permanent supportive housing (PSH). Permanent Supportive Housing focuses on the impact of PSH on health care outcomes and its cost-effectiveness. The report also addresses policy and program barriers that affect the ability to bring the PSH and other housing models to scale to address housing and health care needs.

100 Most Famous People in History compiled into one book 100 of the most famous and significant people in the history of mankind. Meet the people who help shaped the world through their contributions and achievements as artists, athletes, inventors, philanthropists, political leaders, religious leaders, scientists, writers, and others. The authors use quantitative analysis to rank the prominence of more than 1,000 of history's biggest figures, while also discussing trends gleaned from the rankings, as well as the computational methods used to determine the rankings. "It is rare to see a publication which includes personalities from both Shia and Sunni schools of thought and which is so much needed in today's turbulent world. This book, I believe will . . . enrich our understanding of not only the historical but the contemporary history of the Muslim."—Ahmed J. Versi, chief editor of *The Muslim News* (London)

Who have been the Muslim world's most influential people? What were their ideas, thoughts, and achievements? In one hundred short and engaging profiles of these extraordinary people, fourteen hundred years of the vast and rich history of the Muslim world is unfolded. For anyone interested in getting an intimate view of Islam through its kings and scholars,

generals and sportsmen, architects and scientists, and many others—this is the book for you. Among those profiled are the Prophet Muhammad, the Caliph Umar, Imam Husain, Abu Hanifa, Harun al-Rashid, al-Khwarizmi, al-Ghazali, Saladin, Rumi, Ibn Battuta, Sinan, Ataturk, Iqbal, Jinnah, Ayatollah Khomeini, Malcolm X, and Muhammad Ali. Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle

Ages to the 20th century. Contains alphabetically arranged entries, from adornment to crime and punishment, that provide information about culture and society in the ancient world and includes photographs and maps. Countless African Americans have passed as white, leaving behind families and friends, roots and communities. It was, as Allyson Hobbs writes, a chosen exile. This history of passing explores the possibilities, challenges, and losses that racial indeterminacy presented to men and women living in a country obsessed with racial distinctions. The Janeway's Immunobiology CD-ROM, Immunobiology Interactive, is included with each book, and can be purchased separately. It contains animations and videos with voiceover narration, as well as the figures from the text for presentation purposes. "The creation of the United States of America is the greatest of all human adventures," begins Paul Johnson. "No other national story holds such tremendous lessons, for the American people themselves and for the rest of mankind." In his prize-winning classic, Johnson presents an in-depth portrait of American history from the first colonial settlements to the Clinton administration. This is the story of the men and women who shaped and led the nation and the ordinary people who collectively created its unique character. Littered with letters, diaries, and recorded conversations, it details the origins of their struggles for independence and nationhood, their heroic efforts and sacrifices to deal with the 'organic sin' of slavery and the preservation of the Union to its explosive economic growth and emergence as a world power. Johnson discusses contemporary topics such as the

politics of racism, education, the power of the press, political correctness, the growth of litigation, and the influence of women throughout history. He sees Americans as a problem-solving people and the story of their country as "essentially one of difficulties being overcome by intelligence and skill, by faith and strength of purpose, by courage and persistence... Looking back on its past, and forward to its future, the auguries are that it will not disappoint humanity." Sometimes controversial and always provocative, *A HISTORY OF THE AMERICAN PEOPLE* is one author's challenging and unique interpretation of American history. Johnson's views of individuals, events, themes, and issues are original, critical, and in the end admiring, for he is, above all, a strong believer in the history and the destiny of the American people. **NEW YORK TIMES BESTSELLER USA TODAY BESTSELLER NATIONAL INDIE BESTSELLER THE WASHINGTON POST BESTSELLER** Recommended by Entertainment Weekly, Real Simple, NPR, Slate, and Oprah Magazine #1 Library Reads Pick—October 2020 #1 Indie Next Pick—October 2020 **BOOK OF THE YEAR (2020) FINALIST**—Book of The Month Club A "Best Of" Book From: Oprah Mag \* CNN \* Amazon \* Amazon Editors \* NPR \* Goodreads \* Bustle \* PopSugar \* BuzzFeed \* Barnes & Noble \* Kirkus Reviews \* Lambda Literary \* Nerdette \* The Nerd Daily \* Polygon \* Library Reads \* io9 \* Smart Bitches Trashy Books \* LiteraryHub \* Medium \* BookBub \* The Mary Sue \* Chicago Tribune \* NY Daily News \* Syfy Wire \* Powells.com \* Bookish \* Book Riot \* Library Reads Voter Favorite \* In the vein of The Time

Published in 1975, *Ragtime* changed our very concept of what a novel could be. An extraordinary tapestry, *Ragtime* captures the spirit of America in the era between the turn of the century and the First World War. The story opens in 1906 in New Rochelle, New York, at the home of an affluent American family. One lazy Sunday afternoon, the famous escape artist Harry Houdini swerves his car into a telephone pole outside their house. And almost magically, the line between fantasy and historical fact, between real and imaginary characters, disappears. Henry Ford, Emma Goldman, J. P. Morgan, Evelyn Nesbit, Sigmund Freud, and Emiliano Zapata slip in and out of the tale, crossing paths with Doctorow's imagined family and other fictional characters, including an immigrant peddler and a ragtime musician from Harlem whose insistence on a point of justice

drives him to revolutionary violence. There are nearly 7 billion people in the world today. We are living longer, healthier, and better lives than anyone who has gone before. And this is the result of a whole chain of people who have invented or discovered something that has changed our world. Where would we be without inventors, philosophers, economists, politicians, explorers, and other "ideas" people? Some of our historical heroes were lone geniuses but many were influenced by other great thinkers and ideas. There would be no Facebook without the internet-and no internet with computers. And there could be no computers without the great mathematicians and philosophers of ancient times. So who's the Genius-Mark Zuckerberg, or Pythagoras? We think it's both. This is why every spread features a panel called "They couldn't have done it without...", revealing the people who made earlier contributions to the cause. With chapters on medicine and food processes, entertainment and culture, there's something in 100 People Who Made History for everyone. Full of true-life stories and famous celebs, 100 People proves that history can be exciting and relevant. So let's hear it for the heroes from throughout the ages: those who save lives, those who improve lives, and those who make our lives just that bit more enjoyable. Here is the history of our country, told in one hundred chapters, each exactly a hundred words long. Each chapter encapsulates the full breath of the author's knowledge of the subject. When he couldn't make it to a hundred words, he made things up. This is the book they should've had back when you were in school. It skims over important concepts, ignores major

events, slathers historical figures with spit-wads of mockery and cartoonish disdain. Finally, America's history has been recorded for those who don't like to read history books... or who don't like to read at all. A list of the one hundred most influential people in history features descriptions of the careers, contributions, and accomplishments of the political and religious leaders, inventors, writers, artists, and others who changed the course of history. Simultaneous. Presents the history of the United States from the point of view of those who were exploited in the name of American progress. A New York Times bestseller: "This terrific new book . . . [explores] the 'notion of whiteness,' an idea as dangerous as it is seductive."—Boston Globe Telling perhaps the most important forgotten story in American history, eminent historian Nell Irvin Painter guides us through more than two thousand years of Western civilization, illuminating not only the invention of race but also the frequent praise of "whiteness" for economic, scientific, and political ends. A story filled with towering historical figures, *The History of White People* closes a huge gap in literature that has long focused on the non-white and forcefully reminds us that the concept of "race" is an all-too-human invention whose meaning, importance, and reality have changed as it has been driven by a long and rich history of events. Here is a book that will surely spark a lively debate. Who are the hundred most influential religious and political leaders, artists, scientists, and adventurers of all time? How is it even possible to construct such a list? Now, the editors of LIFE comb history, compare notes and dive in. Find out who

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners,

Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at

"The Nation has lost sight of its public health goals and has allowed the system of public health to fall into 'disarray,'" from *The Future of Public Health*. This startling book contains proposals for ensuring that public health service programs are efficient and effective enough to deal not only with the topics of today, but also with those of tomorrow. In addition, the authors make recommendations for core functions in public health assessment, policy development, and service assurances, and identify the level of government—federal, state, and local—at which these functions would best be handled.

*The unknown history of two ideas crucial to the struggle over what America stands for* In Behold, America, Sarah Churchwell offers a surprising account of twentieth-century Americans' fierce battle for the nation's soul. It follows the stories of two phrases--the "American dream" and "America First"--that once embodied opposing visions for America. Starting as a Republican motto before becoming a hugely influential isolationist slogan during World War I, America First was always closely linked with authoritarianism and white supremacy.

The American dream, meanwhile, initially represented a broad vision of democratic and economic equality. Churchwell traces these notions through the 1920s boom, the Depression, and the rise of fascism at home and abroad, laying bare the persistent appeal of demagoguery in America and showing us how it was resisted. At a time when many ask what America's future holds, Behold, America is a revelatory, unvarnished portrait of where we have been.

**100 IDEAS: QUICK - EASY - INSPIRED - OUTSTANDING** A new addition to the best-selling 100 Ideas series, offering teachers quick and easy ways to engage students, convey complex knowledge, and build students' history-specific thinking skills. The activities in this book aim to embrace what is mind-boggling, bizarre and extraordinary about history and tap into students' innate curiosity and wonder, while still catering to the twin pressures of exam results and observation. With this criteria in mind, there are plenty of tips on demonstrating progress, ways of differentiating, preparing students for history assessments and examinations – while still having fun. Since 1619, when Africans first came ashore in the swampy Chesapeake region of Virginia, there have been many individuals whose achievements or strength of character in the face of monumental hardships have called attention to the genius of the African American people. This book attempts to distill from many wonderful possibilities the 100 most outstanding examples of greatness. Pioneering scholar of African American Studies Molefi Kete Asante has used four criteria in his selection: the individual's significance in the general progress of African Americans

toward full equality in the American social and political system; self-sacrifice and the demonstration of risk for the collective good; unusual will and determination in the face of the greatest danger or against the most stubborn odds; and personal achievement that reveals the best qualities of the African American people. In adopting these criteria Professor Asante has sought to steer away from the usual standards of popular culture, which often elevates the most popular, the wealthiest, or the most photogenic to the cult of celebrity. The individuals in this book - examples of lasting greatness as opposed to the ephemeral glare of celebrity fame - come from four centuries of African American history. Each entry includes brief biographical information, relevant dates, an assessment of the individual's place in African American history with particular reference to a historical timeline, and a discussion of his or her unique impact on American society. Numerous pictures and illustrations will accompany the articles. This superb reference work will complement any library and be of special interest to students and scholars of American and African American history. This international bestseller plumbs recently opened archives in the former Soviet bloc to reveal the accomplishments of communism around the world.
