Management, Participation and Entrepreneurship in the Cultural and Creative Sector Nov 05 2021 This book elucidates and maps the societal impact of experience and heritage, participation, and entrepreneurship in the cultural sector. The contributions address and explore the relevance of culture, cultural entities, and heritage as collective memories and reservoirs of experience for other social systems, change and societal innovators like entrepreneurs. Insofar, cultural activities can be understood as a bridge between past experiences and future challenges. The first key focus is the participation of people in various contexts, initiatives, and projects. Such participation unleashes creativity and connects different societal layers – culture, economy, and innovation. Accordingly, a second focus is the entrepreneurial efforts and ideas that originate within arts and culture. Readers will find critical empirical and theoretical studies that challenge the current understandings of the cultural sector from different theoretical perspectives and with different methodological approaches. A variety of topics are explored within the thematic areas of cultural heritage, managerial practices, participation, and cultural entrepreneurship, as well as their inter-relations. Ultimately the aim is to provide the reader with a better understanding of the sometimes conflicting, sometimes mutually fertilizing areas of the arts, culture, business, management, and innovation. The book will be of interest to scholars, students, professionals, and policymakers.

Entrepreneurship, Management, and the Structure of Payoffs Dec 06 2021 Although it is admittedly difficult to theorize and make predictions on the innovative behavior and supply of entrepreneurs, William Baumol shows that by usually failing to incorporate entrepreneurship in their growth models, economists have omitted what can be a key contributor to economic growth. In this book Baumol seeks to bring entrepreneurship back into the body of mainstream economic theory. In particular, he studies the effect of the allocation of entrepreneurs between productive and unproductive activities on an economy's performance. Departing from the orthodox view that imitation retards technical progress by reducing the reward to innovation, Baumol asserts that entrepreneurs can spread and speed the adoption of new technology and ideas throughout a market. By persistently looking to depart from standard practices, entrepreneurs fuel change and help keep an economy from falling into a rut. Often these changes can improve efficiency, increase production, and spur growth. Baumol points out, however, that entrepreneurs do not always, or even usually, behave productively. He devotes several chapters to different types of misallocation of entrepreneurship, such as the mergers and acquisitions of the 1980s and frivolous

lawsuits examples of the ways an entrepreneur will find to increase his or her share of the profits rather than produce more. Therefore, Baumol argues, it is important to the vitality of a free-enterprise society to provide incentives for making better use of entrepreneurial resources, and he suggests relevant changes in economic institutions. William J. Baumol is Professor of Economics at New York University and Director of the university's C. V. Starr Center for Applied Economics. *Small Business Management: Entrepreneurship and Beyond* Jan 19 2023 SMALL BUSINESS MANAGEMENT provides a balanced introduction to both entrepreneurship and small business management, with a focus on achieving and maintaining a sustainable competitive advantage as a small organization. Narrative and Innovation May 11 2022 The editors bring two terms, narrative and innovation, together in an interdisciplinary and interactive way. Narratives are ubiquitous and hold the potential to indicate future changes in politics, economies and markets. As “stressors” and stabilizers in organizations, narratives and changes in the consensus narrative indicate the need for strategic change or organizational stasis and may be utilized as a source for early recognition in strategic management. The use of narratives in management, however, makes it necessary to adopt a new perspective. This volume offers a polyphonic forum for the development of an interpretive approach towards business administration, strategic management, and entrepreneurship, by introducing instruments of semiotics, linguistics, narratology, and others. This compilation, therefore, presents a comprehensive overview of scientific and industrial perspectives beyond the mainstream.
