Natural Resource Management Strategy Jan 17 2020 Arable land, deserts, mountains, forests, rivers, and coastal zones characterize the diverse regions in Eastern Europe and Central Asia (ECA). As varied as the geography is so are the policy directions taken by the region's governments concerning natural resource management. A lack of conservation measures, misuse, and poor management have impaired many of the natural resources now available in these countries. Although the pressure on natural resources in ECA is less than in other regions and the area has more abundant resources, the accessibility and utility of those resources belie the figures. Where there is arable land, the growing season is short. Where there are immense forests, the climate is harsh.To assist the Bank's client countries in ECA with sustainable use of natural resources, this volume identifies the various challenges, provides a history of the Bank's regional natural resource strategy, outlines a strategic framework, and proposes new strategies and policy instruments to implement them. Natural resources in this publication refer to "non-mineral" resources, such as, forests, rivers, and land.

Multi-media Document Translation Dec 28 2020 As part of the NSF's EXPRES project, the authors investigated ways to interchange multi-media documents among diverse systems. Their investigations led to an analysis and implementation of multi-media document format translation in general, and of the ODA standard in particular. ODA, Office Document Architecture, is a new ISO and CCITT international standard for representing multi-media documents. The results of their investigations are presented in this book. The book contains overview information about multi-media document architecture and formats, an introduction to ODA, detailed technical specifications on how to use ODA for multi-media document format translation, and the authors' experiences in implementing and using ODA. The book also contains a complete user manual for the authors' publically available ODA software: tool kits for manipulating ODA and raster formats, tools for examining ODA documents and sample translators between ODA and several other multi-media formats. This book provides comprehensive information about ODA for a large audience. Planners can get basic information about using ODA for interoperation of multi-media systems. Researchers receive detailed discussions about the advantages and problems of using ODA for document representation, format translation and archival storage. System designers can use the technical descriptions of translators and tools in specifying their own. System builders can easily obtain the software as a basis for prototyping and investigating their own ODA implementations.
