A final quest and an ultimate betrayal. Deep in the mountains of Romania stands a fortress, and deep within that fortress lies a chamber. In that chamber, ruling the dead for over two thousand years, lives one Shataiki bat straight from the bowels of the Black Forest. He seeks the final Books of History with which he will destroy the world. But there are four who stand in the way. The chosen are trapped in a new world of high technology and weapons of mass destruction. In the midst of chaos, they must find the last book before the Dark One can in this epic battle that crosses worlds, tests allegiances, and plays for keeps. Major Dick Winters of the 101st Airborne gained international acclaim when the tale of he and his men were depicted in the celebrated book and miniseries Band of Brothers. Hoisted as a modest hero who spurned adulation, Winters epitomized the notion of dignified leadership. His iconic World War II exploits have since been depicted in art and commemorated with monuments. Beneath this marble image of a reserved officer is the story of a common Pennsylvanian tested by the daily trials and tribulations of military duty. His wartime correspondence with pen pal and naval reservist, DeEtta Almon, paints an endearing portrait of life on both the home front and battlefield—capturing the humor, horror, and humility that defined a generation. Interwoven with previously unpublished diary entries, military reports, postwar reminiscences, private photos, personal artifacts, and rich historical context, Winters's letters offer compelling insights on the individual costs and motivations of World War II service members. Winters's heartfelt prose reveals his mindset of the moment. From stateside training to the hedgerows of Normandy, his correspondence immerses readers in the dramatic experiences of the 1940s. Via the lost art of letter writing, the immediacy and honesty of Winters's observations takes us beyond the traditional accounts of the fabled 506th Parachute Infantry Regiment's Easy Company. This engaging narrative offers a unique blend of personal wit, leadership ethics, and broader observations of a world at war. Hang Tough is a deeply intimate, timely reflection on a rising officer and the philosophies that molded him into a hero among heroes. Hang Tough “will help people better understand the man I knew and respected so much. Folks should know what we all went through during the war.” —Bradford Freeman, Foreword A lively examination of the effects of neoliberal globalization, its ability to adapt, and its potential to survive the antiglobalization and nationalist backlash. The expansion of capitalism and neoliberal ideologies have delivered economic integration between countries and brought global inter-connectedness to individuals. So why do so many people now feel that they are citizens of nowhere, disparaged by the cosmopolitan elites? Has democracy and the power of nation states been irredeemably weakened by unfettered global finance, opaque forms of global governance, and the power of transnational corporations? Can the huge rise in social and economic inequality be reversed? Can diverse cultural expression be maintained in a globalizing world? In the context of the current nationalist backlash and the momentous impacts of the COVID-19 pandemic, this thought-provoking volume considers whether globalization is dead or whether it will survive, and perhaps transform. Written in a clear and engaging style, the volume traces the development of economic globalization starting from the first wave of colonialization in the 15th century, through the first period of globalization at the end of the 19th century, and up to the contemporary period of globalization that started in the 1980s and appears today to be teetering on the brink of collapse. It explores the impacts of globalization on today's world, from global supply chains and tax havens to rising economic inequality, climate change and pandemics, and assesses the different impacts on rich and poor countries, and on the rich and poor within countries. It then reviews the growing anti-globalization sentiment, starting from the anti-IMF protests that raged through developing countries in the 1980s and 1990s, to the emergence of the transnational anti-globalization movement of the 2000s, to more recent uprisings such as the Arab Spring, The Occupy Movement, the Gilets Jaunes, and to the current populist nationalist backlash led by President Trump and embodied in the 2016 Brexit vote. Sensing that globalization has reached a tipping point, the book considers a range of possible scenarios for the future world order, including nationalism, authoritarianism and democratic globalism. Finally, it explores whether globalization can be democratized in a world in which effective and inclusive global governance is crucial to solving global problems, such as tackling climate change, controlling global pandemics and upholding universal human rights. Now in PDF, How often do any of us really stop to look around at the extraordinary, fragile and beautiful world and the diverse range of cultures that live in it? This amazing book is the perfect way to do just that. Children will come face to face and learn about the people of the world in this unique visual snapshot, from Easter reindeer races in Lapland to traditional Japanese tea ceremonies and the hustle and bustle of modern life in Paris. Ideal for Global Citizenship studies at Key Stages 2 and 3. Engages with a range of alternative ethical perspectives and the initiatives to which they give rise. This book features case studies that covers a range of places, commodities and initiatives, including Fair Trade and organic production activism in Hungary, Fair Trade coffee in Costa Rica and handicrafts made in Indonesia. This new volume in The Big Idea series evaluates the impact of the increased use of technology in everyday life on society. Modern technology has undoubtedly enhanced our lives in numerous, powerful ways—we can now communicate in real time with friends and colleagues around the world, and do mundane tasks such as shopping or banking at a touch. But has there been a detrimental effect on our health and happiness? Is Technology Making Us Sick? assesses the impact of our increased screen time and everyday interactions with modern technology, the ways we relate to others, and on our mental and physical health. In Is Technology Making Us Sick?, expert Ian Douglas traces the development of human interaction with technology over the last thirty years. His in-depth analysis dissects the key issues, including the consequences of social media and gaming on self-esteem, brain development, anxiety levels, loneliness, depression, and personal relationships; and the impact on our stress levels of always being plugged into the internet. Ultimately, Is Technology Making Us Sick? offers strategies to combat habit-forming products and presents ways to take advantage of revolutionary technology without falling victim to its negative impacts. Around the globe, people now engage with media content across multiple platforms, following stories, characters, worlds, brands and other information across a spectrum of media channels. This transmedia phenomenon has led to the burgeoning of transmedia studies in media, cultural studies and communication departments across the academy. The Routledge Companion to Transmedia Studies is the definitive volume for scholars and students interested in comprehending all the various aspects of transmediality. This collection, which gathers together original articles by a global roster of contributors from a variety of disciplines, sets out to contextualize, problematize and scrutinize the current status and future

directions of transmediality, exploring the industries, arts, practices, cultures, and methodologies of studying convergent media across multiple platforms. Greater Ethiopia combines history, anthropology, and sociology to answer two major questions. Why did Ethiopia remain independent under the onslaught of European expansionism while other African political entities were colonized? And why must Ethiopia be considered a single cultural region despite its political, religious, and linguistic diversity? Donald Levine's interdisciplinary study makes a substantial contribution both to Ethiopian interpretive history and to sociological analysis. In his new preface, Levine examines Ethiopia since the overthrow of the monarchy in the 1970s. "Ethiopian scholarship is in Professor Levine's debt. . . . He has performed an important task with panache, urbanity, and learning."—Edward Ullendorff, *Times Literary Supplement* "Upon rereading this book, it strikes the reader how broad in scope, how innovative in approach, and how stimulating in arguments this book was when it came out. . . . In the past twenty years it has inspired anthropological and historical research, stimulated theoretical debate about Ethiopia's cultural and historical development, and given the impetus to modern political thinking about the complexities and challenges of Ethiopia as a country. The text thus easily remains an absolute must for any Ethiopianist scholar to read and digest."—J. Abbink, *Journal of Modern African Studies*

Exploring how Christianity became a world religion, this brief history examines Christian missions and their relationship to the current globalization of Christianity. A short and enlightening history of Christian missions: a phenomenon that many say reflects the single most important intercultural movement over a sustained period of human history Offers a thematic overview that takes into account the political, cultural, social, and theological issues Discusses the significance of missions to the globalization of Christianity, and broadens our understanding of Christianity as a multicultural world religion Helps Western audiences understand the meaning of mission as a historical process Contains several new maps that illustrate demographic shifts in world Christianity This Handbook provides a cutting-edge survey of the state of research on religions and global development. Part one highlights critical debates that have emerged within research on religions and development, particularly with respect to theoretical, conceptual and methodological considerations, from the perspective of development studies and its associated disciplines. Parts two to six look at different regional and national development contexts and the place of religion within these. These parts integrate and examine the critical debates raised in part one within empirical case studies from a range of religions and regions. Different religions are situated within actual locations and case studies thus allowing a detailed and contextual understanding of their relationships to development to emerge. Part seven examines the links between some important areas within development policy and practice where religion is now being considered, including: Faith-Based Organisations and Development Public Health, Religion and Development Human rights, Religion and Development Sustainable Development, Climate Change and Religion Global Institutions and Religious Engagement in Development Economic Development and Religion Religion, Development and Fragile States Development and Faith-Based Education Taking a global approach, the Handbook covers Africa, Latin America, South Asia, East and South-East Asia, and the Middle East. It is essential reading for students and researchers in development studies and religious studies, and is highly relevant to those working in area studies, as well as a range of disciplines, from theology, anthropology and economics to geography, international relations, politics and sociology. An essential guide to the intractable public debates about the virtues and vices of economic globalization, cutting through the complexity to reveal the fault lines that divide us and the points of agreement that might bring us together. Globalization has lifted millions out of poverty. Globalization is a weapon the rich use to exploit the poor. Globalization builds bridges across national boundaries. Globalization fuels the populism and great-power competition that is tearing the world apart. When it comes to the politics of free trade and open borders, the camps are dug in, producing a kaleidoscope of claims and counterclaims, unlikely alliances, and unexpected foes. But what exactly are we fighting about? And how might we approach these issues more productively? Anthea Roberts and Nicolas Lamp cut through the confusion with an indispensable survey of the interests, logics, and ideologies driving these intractable debates, which lie at the heart of so much political dispute and decision making. The authors expertly guide us through six competing narratives about the virtues and vices of globalization: the old establishment view that globalization benefits everyone (win-win), the pessimistic belief that it threatens us all with pandemics and climate change (lose-lose), along with various rival accounts that focus on specific winners and losers, from China to America's rust belt. Instead of picking sides, *Six Faces of Globalization* gives all these positions their due, showing how each deploys sophisticated arguments and compelling evidence. Both globalization's boosters and detractors will come away with their eyes opened. By isolating the fundamental value conflicts—growth versus sustainability, efficiency versus social stability—driving disagreement and show where rival narratives converge, Roberts and Lamp provide a holistic framework for understanding current debates. In doing so, they showcase a more integrative way of thinking about complex problems. A *New Statesman* best book of the year | *New York Times* Editors' Choice pick A *Financial Times* best economics book of 2019 An accessible, story-driven look at the future of the global economy, written by a leading expert To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond in his globe-trotting book. From a prison in rural Louisiana where inmates purchase drugs with prepaid cash cards to the poorest major city on earth, where residents buy clean water in plastic bags, from the world's first digital state to a prefecture in Japan whose population is the oldest in the world, how these extreme economies function—most often well outside any official oversight—offers a glimpse of the forces that underlie human resilience, drive societies to failure, and will come to shape our collective future. While the people who inhabit these places have long been dismissed or ignored, *Extreme Economies* revives a foundational idea from medical science to turn the logic of modern economics on its head, arguing that the outlier economies are the place to learn about our own future. Whether following Punjabi migrants through the lawless Panamanian jungle or visiting a day-care for the elderly modeled after a casino, Davies brings a storyteller's eye to places where the economy has been destroyed, distorted, and even turbocharged. In adapting to circumstances that would be unimaginable to most of us, the people he encounters along the way have helped to pioneer the economic infrastructure of the future. At once personal and keenly analytical, *Extreme Economies* is an epic travelogue for the age of global turbulence, shedding light on today's most pressing economic questions. Hilary Thomas, a screenwriter scarred by childhood abuse, and Tony Clemenza, an ace cop and would-be artist, plunge into a love affair while pursuing the psychopath who brutally assaulted Hilary. There are two types of rituals performed by the same people in a rural community in Southern Ethiopia. One appears to be remarkably stable, while the other has undergone massive transformations over the years. Focusing on new ethnographical and historical data from the Gamo Highlands of Southern Ethiopia, Dena Freeman analyzes these rituals and provides fascinating insight into the cultural transformations of a little-known region of the world. When Jane's partner goes missing she needs to find out if he's in danger while also contending with the politics of a large international film festival: Hollywood power brokers, Russian oil speculators, Chinese propagandists, and a board chair

who seemingly has it out for her. Jane has been appointed interim director of the Worldwide Toronto Film Festival after her boss has been removed for sexual harassment. Knives are out all around her, as factions within the community want to see her fail. At the same time, her partner, a fund manager, has disappeared, and strange women appear, uttering threats about misused funds. Yet the show must go on. As Jane struggles to juggle all the balls she's been handed and survive in one piece, she discovers unlikely allies and finds that she's stronger than she thinks. Recounts the Christmas following the attack on Pearl Harbor, in which President Franklin D. Roosevelt and Prime Minister Winston Churchill met at the White House.

The World Guide to CSR is the first book to provide comparable national profiles that describe the evolution and practice of Corporate Sustainability and Responsibility (CSR) for 58 countries and 5 global regions. Each regional and national profile includes key information about the relevant CSR history, country-specific issues, trends, research and leading organizations. The purpose of the book is to give CSR professionals (including managers, consultants, academics and NGOs focusing on the social, environmental and ethical responsibilities of business) a quick reference guide to CSR in different regional and national contexts. The need for the book is premised on the fact that CSR professionals and researchers more often than not have a multinational remit and are required to benchmark performance internationally, but find that country-specific CSR information is ad hoc, limited or non-existent. Even where national CSR research exists, it is often hidden in academic journals that practitioners cannot access or do not have the time or inclination to read. The book is an edited volume, with expert contributors from around the world, all of whom have been screened and selected on the basis of their qualifications and experience in CSR. Each regional/country profile includes the following subsections: CSR in context Priority issues Trends Legislation and codes Organizations Case studies Educational institutions References This unique resource will be an essential acquisition for all organisations who need to benchmark their CSR strategies throughout different regions and cultures and want the best possible intelligence on the key issues and concerns relating to corporate social responsibility in all of the markets in which they operate. Global challenges such as war, climate change, poverty and inequality are overwhelming nation-states and today's international institutions. Achieving a world community that is peaceful, just and sustainable requires a democratic world parliament. This book describes the history, relevance and practical steps to implement this monumental project. The relationships between Africa and Europe are of high strategic importance. This volume studies the ongoing dynamics between the two continents by adopting a pluralist understanding of international relations which encompasses non-state actors as well as states. Going beyond pure intergovernmentalism, this focus of this book is on activists, business people, religious believers, local politicians as well as transnational networks and by hybrid coalitions. Such plurality of socio-economic and political interactions underpinning the relationship between Africa and Europe is underexamined and yet of great importance. The text identifies new patterns of cooperation and recurrent obstacles in the African-European multistakeholder dynamics, thus opening the way for a more accurate understanding of the future relationship between Africa and Europe. This book brings African and European reflections together, on an equal standing, in order to achieve a true dialogue among civilizations. This book is aimed at all those who are interested in African-European relationships, including students and researchers, as well as activists, business people, civil servant and functionaries at local and national level. A little beaver with a slapdash approach to dam-building comes to appreciate the satisfaction of a job well done in this sweet tale that's perfect for storytime. Nibble, nibble, snap. When Little Beaver sets a single twig across the stream, he figures that should be good enough for a dam. "I'm done!" he calls to Papa before tearing off to play with Fish. But Papa isn't buying it, and it's back to work for Little Beaver. Nibble, nibble, snap, scoop, scoop, pat. Little Beaver sets two more twigs across the stream, and adds some mud before scurrying off with Blue Heron. Mama isn't amused. "You're not done yet."

GRETCHEN MCLELLAN'S text explores the value of perseverance at a level perfect for very young readers, while CATHARINE LAZAR ODELLS darling illustrations capture the sweetness of Little Beaver's attempts at perfecting his dam--and the triumph of his eventual success. This book gives an in-depth analysis of the role of faith in the work of Tearfund, a leading evangelical relief and development NGO that works in over 50 countries worldwide. The study traces the changing ways that faith has shaped and influenced Tearfund's work over the organisation's 50-year history. It shows how Tearfund has consciously grappled with the role of faith in its work and has invested considerable time and energy in developing an intentionally faith-based approach to relief and development that in several ways is quite different to the approaches of secular relief and development NGOs. The book charts the different perspectives and possibilities that were not taken and the internal discussions about theology, development practices, and humanitarian standards that took place as Tearfund worked out for itself what it meant to be a faith-based relief and development organisation. There is a growing academic literature about religion and development, as well as increasing interest from development ministries of many Northern governments in understanding the role of religion in development and the specific challenges and benefits involved in working with faith-based organisations. However, there are very few studies of actual faith-based organisations and no book-length detailed studies showing how such an organisation operates in practice and how it integrates its faith into its work. In documenting the story of Tearfund, the book provides important insights into the practice and ethos of faith-based organisations, which will be of interest to other FBOs and to researchers of religion and development. In many Ethiopian societies, occupational groups, descendants of hunters or slaves are differentiated from the societies they are part of or live next to. Until today, their ambiguous and often marginalized position is culturally justified and deeply entrenched in local belief or value systems. Recent research has shown how these social categories have been reshaped and renegotiated under the influence of various factors. In which contexts and to what extent integration has taken place, whether it is sustainable or whether social differentiation has persisted or even increased is the main focus of the nine case-studies in this book all of which emphasize the perspective of the status groups themselves. Development was founded on the belief that religion was not important to development processes. The contributors call this assumption into question and explore the practical impacts of religion by looking at the developmental consequences of Pentecostal Christianity in Africa, and by contrasting Pentecostal and secular models of change. Exploring faith-based organizations (FBOs) in current developmental discourses and practice, this book presents a selection of empirical in-depth case-studies of Christian FBOs and assesses the vital role credited to FBOs in current discourses on development. Examining the engagement of FBOs with contemporary politics of development, the contributions stress the agency of FBOs in diverse contexts of development policy, both local and global. It is emphasised that FBOs constitute boundary agents and developmental entrepreneurs: they move between different discursive fields such as national and international development discourses, theological discourses, and their specific religious constituencies. By combining influxes from these different contexts, FBOs generate unique perspectives on development: they express alternative views on development and stress particular approaches anchored in their theological social ethics. This book should be of interest to those researching FBOs and their interaction with international organizations, and to scholars working in the broader areas of religion and politics and politics and development. Anthropologies of Unemployment offers accessible, theoretically innovative, and ethnographically rich examinations of unemployment in rural and urban regions across North and South America, Europe, Africa, and Asia. The diversity of case studies demonstrates that unemployment is a pressing global phenomenon that sheds light on the uneven consequences of free-market ideologies and policies. Economic, social, and cultural marginalization is common in the lives of the unemployed, but their experience and interpretation are shaped by local and national cultural particularities. In exploring those differences, the contributors to this volume employ recent theoretical innovations and engage with some of the more salient topics in contemporary anthropology, such as globalization, migration, youth cultures, bureaucracy, class, gender, and race. Taken together, the chapters reveal that there is something new about unemployment today. It is not a temporary occurrence, but a chronic condition. In adjusting to persistent, longstanding unemployment, people and groups create new understandings of unemployment as well as of work and employment; they improvise new forms of sociality, morality, and personhood. Ethnographic studies such as those found in Anthropologies of Unemployment are crucial if we are to understand the broader forms, meanings, and significance of pervasive economic insecurity and discover the emergence of new social and cultural possibilities. How people conceive of happiness reveals much about who they are and the values they hold dear. Drawing on ethnographic insights from diverse field sites around the world, this book offers a unique window onto the ways in which people grapple with fundamental questions about how to live and what it means to be human.

Developing a distinctly anthropological approach concerned less with gauging how happy people are than with how happiness figures as an idea, mood, and motive in everyday life, the book explores how people strive to live well within challenging or even hostile circumstances. The contributors explore how happiness intersects with dominant social values as well as an array of aims and aspirations that are potentially conflicting, demonstrating that not every kind of happiness is seen as a worthwhile aim or evaluated in positive moral terms. In tracing this link between different conceptions of happiness and their evaluations, the book engages some of the most fundamental questions concerning human happiness: What is it and how is it achieved? Is happiness everywhere a paramount value or aim in life? How does it relate to other ideas of the good? What role does happiness play in orienting peoples' desires and life choices? Taking these questions seriously, the book draws together considerations of meaning, values, and affect, while recognizing the diversity of human ends. A look at how the 1931 International Colonial Exposition in Paris created hybrids of French and colonial culture. In 25 chapters, this book outlines how the political division of the world into some two hundred separate nation states undermines effective global action and shows a way forward: the creation of a democratic world federation “A sprightly and clear-eyed testimonial to the value of globalization” (The Wall Street Journal) as seen through six surprising everyday goods—the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the blockbuster HBO series Game of Thrones. Trade allows us to sell what we produce at home and purchase what we don't. It lowers prices and gives us greater variety and innovation. Yet understanding our place in the global trade network is rarely simple. Trade has become an easy excuse for struggling economies, a scapegoat for our failures to adapt to a changing world, and—for many Americans on both the right and the left—nothing short of a four-letter word. But as Fred P. Hochberg reminds us, trade is easier to understand than we commonly think. In *Trade Is Not a Four-Letter Word*, you'll learn how NAFTA became a populist punching bag on both sides of the aisle. You'll learn how Americans can avoid the grim specter of the \$10 banana. And you'll finally discover the truth about whether or not, as President Trump has famously tweeted, “trade wars are good and easy to win.” (Spoiler alert—they aren't.) Hochberg debunks common trade myths by pulling back the curtain on six everyday products, each with a surprising story to tell: the taco salad, the Honda Odyssey, the banana, the iPhone, the college degree, and the smash hit HBO series Game of Thrones. Behind these six examples are stories that help explain not only how trade has shaped our lives so far but also how we can use trade to build a better future for our own families, for America, and for the world. *Trade Is Not a Four-Letter Word* is the antidote to today's acronym-laden trade jargon pitched to voters with simple promises that rarely play out so one-dimensionally. Packed with colorful examples and highly digestible explanations, *Trade Is Not a Four-Letter Word* is “an accessible, necessary book that will increase our understanding of trade and economic policies and the ways in which they impact our daily lives” (Library Journal, starred review). From an internationally acclaimed economist, a provocative call to jump-start economic growth by aggressively overhauling liberal democracy Around the world, people who are angry at stagnant wages and growing inequality have rebelled against established governments and turned to political extremes. Liberal democracy, history's greatest engine of growth, now struggles to overcome unprecedented economic headwinds—from aging populations to scarce resources to unsustainable debt burdens. Hobbled by short-term thinking and ideological dogma, democracies risk falling prey to nationalism and protectionism that will deliver declining living standards. In *Edge of Chaos*, Dambisa Moyo shows why economic growth is essential to global stability, and why liberal democracies are failing to produce it today. Rather than turning away from democracy, she argues, we must fundamentally reform it. *Edge of Chaos* presents a radical blueprint for change in order to galvanize growth and ensure the survival of democracy in the twenty-first century. In this new heist adventure series, an elite team of four best friends must track down stolen gems! For Jasmine, Erin, Willow, and Lili, the first year of middle school is shaping up to be pretty awesome. They've been selected for an A-list academic team because of their expertise in art, math, science, and history. The Jewels, as they call themselves, are already winning tournaments. But things heat up when another local team, the Atkinson Prep Rivals, threatens to steal their spotlight. To further complicate matters, a beloved ruby necklace is stolen from their school, and the Jewels must go undercover with their skills to track down the culprit. Nothing seems to be adding up—until they look to the most unlikely of suspects . . . Can the Jewels figure out why the precious ruby was stolen and find it before it's too late? Packed with suspense, thrilling plot twists, and a dash of sparkle, this is a fun new series you won't want to miss! *Ethics and Anthropology* comprehensively embraces issues and dilemmas faced in all four of the discipline's fields. Not merely a subject to be considered when seeking the approval of institutional review boards, ethics is anthropology. Fluehr-Lobban explores the critical application of core ethical principles—do no harm, apply informed consent in all stages of research, practice transparency, collaborate—from the initial stages of crafting a proposal and executing research through writing and publication of findings. She provides a frank, up-to-date consideration of best practices and trends and incorporates recommendations from the most recent AAA Code of Ethics. To help students understand the art of ethics in principle and in practice, she draws on anthropological history and discourse as well as cross-cultural and interdisciplinary examples; questions for discussion round out each chapter.
