This book provides the most up-to-date information on hybrid solar cell and solar thermal collectors, which are commonly referred to as Photovoltaic/Thermal (PV/T) systems. PV/T systems convert solar radiation into thermal and electrical energy to produce electricity, utilize more of the solar spectrum, and save space by combining the two structures to cover lesser area than two systems separately. Research in this area is growing rapidly and is highlighted within this book. The most current methods and techniques available to aid in overall efficiency, reduce cost and improve modeling and system maintenance are all covered. In-depth chapters present the background and basic principles of the technology along with a detailed review of the most current literature. Moreover, the book details design criteria for PV/T systems including residential, commercial, and industrial applications. Provides an objective and decisive source for the supporters of green and renewable source of energy Discusses and evaluates state-of-the-art PV/T system designs Proposes and recommends potential

designs for future research on this topic

The moment AJ Walsh sees the sexy, tattooed

pixie walk up to his bar, it's lust at first sight. He's always been labeled the "nice" guy—opening doors, buying flowers, and never, ever having one-night stands. But with this wicked little angel with red lips and unfathomably dark eyes? Oh, yeah. Tonight, "nice" has nothing to do with it... Brett Conlon is trying to convince her family that she's put away her reckless wild girl side for good. Nothing—and no one—could be better for her reputation than golden boy AJ Walsh. So they make a deal: if he plays The Good Boyfriend for her family, he can be a very, very bad boy with her. Now their one naughty night is about to turn into a whole lot of trouble... Each book in the After Hours series is STANDALONE: * One Night of Sin (novella) * One Night of Scandal * One Night of Trouble Retired Navy SEAL, Clint Backwater, enjoys his solitary life as owner of the Ask Questions Later gun range. It's the kind of place you find because you know a guy. So when Leila Ortiz, a petite woman with a "baby on board" sticker on the back of her car—and an 18-month-old boy in her arms—shows up at the range, panicked and desperate for a gun, he knows something is wrong. Having grown up in the foster system, Clint has seen what happens when you let

yourself get too invested—things get messy, people leave. He made himself a promise to never get emotionally involved again, but the former SEAL in him feels the tug to help this woman and her child. Leila's ex-husband is being released from prison early on good behavior and she found out too late. He was supposed to serve five years, not two, and Leila is unprepared to protect herself and her son. She promised him they'd never run again—they've made a nice life for themselves and the last thing she wants to do is leave it all behind. When Clint refuses to give Leila a gun without lessons, she agrees to return to the range to learn. At first, Leila won't say why she's so desperate for protection, but when the threats from her ex escalate, it becomes clear what she's afraid of. Clint is a loner. Always has been, always will be. So when Leila and her little son enter his life, it hits him—hard—maybe being alone isn't what he needs. Still, having his solitary life disrupted when he invites the little family into his home is a bit tougher to take than he thought. With Leila and her son in danger, though, he'll do whatever it takes to keep them safe—even putting up with stray toys and changing a nappy or two. But

the biggest danger might be to his heart, when it starts to look like the safest thing for Leila and her baby might be to leave her problems—and her budding relationship with Clint—behind. This classic text is an exploration of the practical aspects of thermodynamics and heat transfer. It was designed for daily use and reference for system design and for troubleshooting common engineering problems—an indispensable resource for practicing process engineers.

"Negotiation: Science and Practice" is a university-level textbook and lecture series designed to teach effective skills and techniques in negotiation. It provides scientifically tested tools that allow anyone to construct and implement the best

possible negotiation strategies, in any negotiation scenario. From this pack, students, like yourself, learn the art, science and practice of influence, as well as how to construct optimal agreements, whether you are negotiating a settlement in a legal dispute, a contract to sell a business, a ceasefire in a conflict zone, the sale of your own home, a price rise of the goods or services your company provides, a wage dispute with a powerful union or even an amendment to legislation. The lectures in this textbook are as follows: Lecture 1: Negotiation dynamics (available in full, for free, in the "sample") Lecture 2: Preparation for negotiation Lecture 3: Evaluation techniques Lecture 4: Influence Lecture 5: Cognitive biases, heuristics, errors and effects Lecture 6: Group dynamics Lecture 7: Logic and creativity Lecture 8: Parachutes, problems and tricks Lecture 9: Culture, human nature and individual difference Lecture 10: Enforcement mechanisms Lecture 11: Ethics, lying, the law and why good people do bad things Lecture 12: Alternative dispute resolution Lecture 13: Conflict This book contains: - A comprehensive lecture series (outlined above) - Week-by-week multiple choice

questions (100+ pages) - Detailed answers and explanations to all week-by-week questions (50+ pages) - A mid-semester exam - A comprehensive reference glossary (200 pages) - Full academic abstracts to complement critical references (aiding a more detailed understanding and facilitating further exploration of the science behind each technique) - The most comprehensive examination of the psychology of negotiation available, with clear examples of how it can be used to achieve desired outcomes - The most comprehensive description of common "dirty tricks" in negotiation and how to respond to them - Detailed explanations of the law and how it affects you as a negotiator; including important case summaries - Step-by-step explanations of how to calculate the 'need-to-know' numbers in all negotiations This book covers historical aspects and future directions of mechanical and industrial engineering. Chapters of this book include applied mechanics and design, tribology, machining, additive manufacturing and management of industrial technologies. On the heels of the bestselling success of his low-calorie Now Eat This! cookbook, Rocco DiSpirito expands his brand with a weight-loss program guaranteed to produce

maximum results with minimum effort. Award-winning celebrity chef Rocco DiSpirito changed his life and his health-without giving up the foods he loves or the flavor. He has lost more than 20 pounds, participated in dozens of triathlons, and-after an inspirational role as a guest chef on The Biggest Loser-changed his own diet and the caloric content of classic dishes on a larger scale. In The Now Eat This! Diet, complete with a foreword by Dr. Mehmet Oz, DiSpirito offers readers a revolutionary 2-week program for dropping 10 pounds quickly, with little effort, no deprivation, and while still eating 6 meals a day and the dishes they crave, like mac & cheese, meatloaf, BBQ pork chops, and chocolate malted milk shakes. The secret: Rocco's unique meal plans and his 75 recipes for breakfast, lunch, dinner, dessert, and snack time, all with zero bad carbs, zero bad fats, zero sugar, and maximum flavor. Now readers can eat more and weigh less-it's never been so easy! Must she pay for the sins of her mother? Miss Charlotte Danvers has just received a life-altering shock. After spending most of her life in France in an elite school for girls, first as a student, and then as a teacher, she decides

to return to London and take up residence with her mother. When she arrives at her mother's townhouse in London, she is stunned to discover that the woman who raised her is the well-known courtesan, Mrs. Danforth. After an angry and tearful confrontation with her mother, Charlotte leaves London and makes her home in Bath. All goes well until she meets Mr. Carter Westbrooke, close friend and business partner of Charlotte's best friend's husband, Lord Berkshire. After only a few weeks, Mr. Westbrooke declares his intentions to Charlotte to make her his wife. She can be no one's wife but cannot bring herself to tell him why. Must she run again? *****

The Merry Misfits of Bath is a brand-new Regency romance series from USA Today bestselling author Callie Hutton. Each standalone story features a heroine who doesn't quite fit in but who finally finds her happy ever after with a hero who sees her through the eyes of love. This is the second of three volumes of essential reference for those concerned with the installation and servicing of domestic and industrial gas equipment. This volume deals with the various aspects of installing and servicing domestic appliances and associated equipment. The revised fourth edition is

brought fully up to date with current Standards and the Gas Safety (Installation & Use) Regulations to reflect recent developments in industry, in line with requirements of the ACS Certificates of Competence and NVQs. The book includes new coverage of the latest flexible pipe work for domestic installations, also outlining new procedures for tightness testing and purging. Brand new sections address gas installation in caravan and non-permanent dwellings, as well as boats, yachts and other vessels, in accordance with the Code of Practice for Domestic Butane and Propane Gas Burning Installations (BS EN 10239). Covering both Natural Gas (low and medium pressure), and Liquefied Petroleum Gas, Volume 2 reflects the new divisions to the Specifications for the Installation of Domestic Sized Gas Meters (BS 6400). The content is also fully in line with: * The latest Building Regulations, restricting new central heating systems to high efficiency condensing boilers. * The specification for installation and maintenance of domestic direct gas-fired tumble dryers. * Part "P" of the building regulations for electrical work on gas appliances (Competent person self-certification schemes, Part P Special

locations and kitchens 2005). * The install, exchange, disconnect, service, repair, breakdown and commission of domestic gas fired range cooker / hot water boilers. * The install, exchange, disconnect, service, repair, breakdown and commission of gas appliances fitted with forced draught burners in domestic dwellings. Incorporating many illustrations and worked examples throughout the text, Volume 2 combines a concise reference with practical application in real-world engineering contexts to create an essential handbook for all aspects of the installation and servicing of domestic gas appliances, ideal for both students new to the field as well as professionals and non-operational professionals (e.g. Specifiers, Managers, Supervisors) as an ongoing source of reference. * Comprehensive reference combined with practical application - an essential handbook for gas service technology * Fully updated in line with the latest changes to Standards, NVQs and ACS Certificates of Competence * Hundreds of line drawings and photographs maximise accessibility of the text, enabling readers to easily recognise the appliances under discussion ?DNS Exercise Journal - A brochure for kids This journal or DNS Fit

Kid App is intended for coaches and therapists who use DNS FIT KID in their practice, particularly those working with young children and their parents. The application consists of twenty exercises based on five developmental positions and serves as a home exercise program for children aimed at both the treatment and prevention of musculoskeletal pain. More generally, these exercises can also be used as a fundamental, dynamic warm-up for not only common recreational play, but also youth athletic training. The DNS exercise app explains the developmental exercise positions to children in a fun, relatable manner, comparing them with the way animals characteristically move and pose. The concise text and colorful illustrations help to explain not only how the child ought to move, but also what they should feel during each movement or position. Of course, these also describe how to detect and correct errors and movement faults typically found with each exercise. Furthermore, in order to help train exercise transitions, movement memory, mimicry, and team exercise (while also incorporating speech development), the DNS app has included a variety of rhythmic songs that are meant to be sung along with

every global movement routine. By incorporating both animal imagery and catchy songs into each routine, the DNS Fit Kid App motivates children to exercise regularly in a pleasurable, playful way, while also emphasizing DNS principles like optimal posture and ideal movement coordination.

When Detective Silas Warren and CSI Madison Corman uncover evidence of a possible connection between their victims, they are led back to their old friend, Carson Patterson, who never plays nice. As they're diving further down the rabbit hole, the Ghost strikes again, giving them a gift they'll never forget. She must marry. But she'll do it her way. And she has a plan... Caroline Whitfield has it all figured out. Since all young ladies of the ton must marry, she plans to do just that. The only

romances she's interested in are between the pages of her beloved books, so love is not a consideration. She needs a husband willing to let her live her own life, and who better than a man for whom a wife is an inconvenience packed off to the country? Which means only one type of man will do...She needs a rake, a man who will barely notice his own wife in favour of his own pursuits. It's the perfect plan. All she has to do is not fall in love... And most definitely not with the irritatingly handsome Baron Huntingford. He needs a wife. Preferably someone who is not Miss Whitfield... More at home on the battlefield than in a ballroom, Aaron, Baron Huntingford, is still getting used to his title and being a man of leisure rather than a soldier. A rake with a dangerous reputation he's used to any woman he wants falling at his feet, but Miss Whitfield is not like other debutantes. For one thing, she seems to actively dislike him. For another, she's his best friend's new sister-in-law, and therefore off limits. Never mind that he craves her touch and to find out if her lips taste as sweet as they look. But when he finds out about her scheme to bring a rake to the altar, all bets are off. If she wants a rake, she'll get one.

They say hate is a strong word, but Eileen Parker is certainly no stranger to it. Parker hates her first name, hates her apartment, hates her life. Which, sure, sounds a bit cynical, but after the life that she's led so far, you really can't blame her. With her sophomore year of college overshadowed by circumstances that she never expected, Parker just wants to keep her head down, pass her classes, and take care of the responsibilities that are threatening to destroy her. And then she meets Ash. Ashton Carter is working to fix the messes that he's made, but he's still struggling with dark memories of a night that changed his life. He's definitely not looking for someone to spend forever with, but when he meets Parker, his life changes once again. It doesn't bother him that Parker adamantly refuses to admit to the chemistry between them, or that she's determined to keep him at arms length. Ash is convinced that Parker is everything he never knew he needed, and he's not about to let her slip away. Fighting against

overwhelming insecurities and secrets that feel too big to share, the two must make a choice. They can keep running from their pasts, or they can confront them and face their future together. ***This is the first book in a series of standalone novels. Due to adult language/situations and mild drug use, this book is recommended for readers 18+. This systematic approach focuses on thermohydraulic design, design processes, rating, and operational problems. The text introduces thermal design by describing various types of single-phase and two-phase heat exchangers. Topics include applications in power-producing plants; process and chemical industries; heating, ventilation, air-conditioning and refrigeration systems; and the cooling of electronics. The appendix provides information on the thermophysical properties of fluids, including new refrigerants. Fundamentals of Heat and Mass Transfer 8th Edition has been the gold standard of heat transfer pedagogy for many decades, with a commitment to continuous improvement by four authors' with more than 150 years of combined experience in heat transfer education, research and practice. Applying the rigorous and systematic problem-solving methodology that this text pioneered an abundance of examples and problems reveal the richness and beauty of the discipline. This edition makes heat and mass transfer more approachable by giving additional emphasis to fundamental concepts, while highlighting the relevance of two of today's most critical issues: energy and the environment. Here, presented in one volume, are the four stories that comprise the 'Rush' Series, a seriously hot and provocative romance by Lucia Jordan, written in her signature style of high passion with searing depictions of sex and emotion. Kendra is a bundle of nerves when she walks into the office of Sebastian Montoya. To say his reputation precedes him is to be a gross

understatement. Immediately she sees that the larger than life architect has an even bigger ego. The mystery that surrounds him is hypnotizing. There is just something about him that draws her in. He oozes sexuality and his lilting Spanish accent makes her insides flutter. But as she learns, architecture isn't his only talent. A hot and steamy night at work leads to far more than she could ever expect. But does Kendra have what it takes to deal with the pressures that come with her day job while allowing Sebastian to handle her at night? This ebook contains very hot and explicit descriptions of romantic activity. Only mature readers should download this book.

Climate change and global warming is one of the burning issues, which need more attention, awareness and understanding. It refers to change in average weather pattern for an extended period of time in terms of decades or millions of years. Climate change is caused by several factors like variation in solar radiation, plate movements and volcanic activities. In addition, human intervention plays a major role in ongoing climate change. The continuous rise in global temperature affecting the hydrological cycle has substantial impact on

surface and sub-surface water resources. The Inter-governmental Panel on Climate Change (IPCC, 2000) reports that the surging population, increasing industrialization and associated demands for freshwater, food and energy would be major areas of concern in the climate change aspect. Increase of temperature increases evaporation, resulting in droughts. Under warmer environment, more precipitation will occur as rainfall rather than snow. The changes in monsoon rainfall may be considered as measure to examine climate variability in the context of global warming. Glaciers are an important source for fresh water and considered among the most sensitive indicators of climate change. People living in the catchment areas of the Himalayas face increased risk of floods as glaciers retreat followed by drought and water scarcity. In the coming decades, it is predicted that billions of people in developing countries face shortages of water and food as a result of climate change. Rigorous action has to be taken to enable developing countries to adapt to the effects of climate change. Hence, it is an urgent need for assessing impact and vulnerabilities of climate change, as well as considering possible adaptation options.

The deliberations in the conference may be useful in understanding the impact of climate change on water resource, create awareness, learning process for planning and implementing adaptation options. MECHANICS OF FLUIDS presents fluid mechanics in a manner that helps students gain both an understanding of, and an ability to analyze the important phenomena encountered by practicing engineers. The authors succeed in this through the use of several pedagogical tools that help students visualize the many difficult-to-understand phenomena of fluid mechanics. Explanations are based on basic physical concepts as well as mathematics which are accessible to undergraduate engineering students. This fourth edition includes a Multimedia Fluid Mechanics DVD-ROM which harnesses the interactivity of multimedia to improve the teaching and learning of fluid mechanics by illustrating fundamental phenomena and conveying fascinating fluid flows.
