**Internet skills valued in today's academic and professional environments. The Computer Literacy for IC3 text is written to meet the certification standards and provide readers with a broad understanding of the key components of computer literacy in order to prepare for the exam. This certification has 3 units: • Unit 1: Computing Fundamentals (computer concepts) • Unit 2: Using Productivity Software • Unit 3: Living Online (the Internet) Each of these units is available as a separate Computer Literacy for IC3 text. This text contains: Unit 1: Computing Fundamentals and covers basic computer concepts including computer hardware, computer software, and using an operating system. The second edition of Computer Literacy for IC3 has been revised to keep up with the IC3 program's evolution, which reflects the recent changes in computers and technology. Instead of publishing one large, comprehensive text, the three units are now available as separate, smaller texts. This course is designed to introduce both new and existing concepts to understand what digital literacy means and how to address current computing concepts for being online - including the use of the cloud and mobile devices. Students will get a firm understanding of how to find and validate research results, become productive and effective**

communicators, and collaborate with others to create content in modern digital environments. The book structure is a comprehensive series of computer theory credentials that use seven digital literacy domains to successfully understand and apply these skills. Each of these seven domains will be introduced in three levels. The intent of this courseware is to gradually introduce computer knowledge and skill sets to establish a firm understanding of digital literacy. This understanding is achieved with the help of situational examples and visual content (such as walk-throughs, diagrams, and illustrations) throughout the book.
