The ancient Greco-Roman world was a world of cities, in a distinctive sense of communities in which countryside was dominated by urban centre. This volume of papers written by influential archaeologists and historians seeks to bring together the two disciplines in exploring the city-country relationship. This handbook surveys clinical and educational considerations related to the foundations, models, special topics, and practice of psychological assessment. In Italy, a dogged police investigator resists retirement—and plunges into a case that has rocked the city:

“Breathtakingly good” (London Evening Standard).

Northern Italy, 1985: Commissario Piero Trotti is fifty-six years old, and though he is widely respected on the police force for his integrity and work ethic, he is not widely liked. The junior detectives he works with transfer because he’s too hard on them; his fellow commissioner is trying to force him out. Even his family has walked out of his life: his adult daughter has moved to Bologna, and his wife has left him for New York. All signs are telling Trotti that he needs to make a change. Instead, he digs in his heels. The city is in an uproar after a young girl is attacked in her bed by an intruder. Aided by the one junior officer who still listens to him—a dogged, unflinching female brigadier named Ciuffi—Trotti sets to work, trying to figure out the truth . . .

“Trotti is an inspired creation.” —The Sunday Times

This gutsy entrepreneur has much to share, not only about the exhilaration of travel, but on jetting out of our comfort zones and into new friendships and enhanced self-discovery." Iris Krasnow, New York Times Best-selling Author of *Secret Lives of Wives*. A story of resiliency, saying yes, following your passions, and never giving up. In

this inspirational business memoir, *It's Your Life...Live IT!*, April Merenda, cofounder of Gutsy Women Travel and assistant professor at St. John's University shares her journey on how her passion for travel led her to becoming a pioneer in women's travel, a successful entrepreneur, a highly regarded expert in the hospitality industry, and an innovator in academia. Her story starts in 1975, shortly after graduating from St. John's University in Queens, New York with plans to attend law school. But life had other ideas for her. She found herself saying yes to selling tours and show tickets on charter flights to passengers who were booked at various Las Vegas, Nevada hotels. It was an exciting beginning to her career in travel, and she never looked back. Resiliency and saying yes to opportunities are recurring themes as she eventually cocreated a travel company with Gail Golden-Icahn called Gutsy Women Travel, which focused on guided vacations designed specifically for women travelers and their interests. Gutsy Women launched shortly after 9/11 despite the naysayers who questioned the timing. Twenty years later, Gutsy Women Travel is still going strong despite the ups and downs thrown its way, not the least of which is surviving the global pandemic. April takes the reader along on this incredible journey that follows her life, career, and travels, introduces you to incredible gutsy women she has met on her tours, unforgettable students in her hospitality classes as an assistant professor at St. John's University, and the angels who have guided her along the way. She has lived through many unusual experiences and witnessed historical

events, including being caught up in the middle of the Arab Spring revolution that eventually overthrew the regime of President Mubarak, and being part of the largest evacuation (at that time) of U.S. citizens. Throughout her story, she shares invaluable business and life lessons she has learned along the way, the most important of which are to live your life with joy, be kind to yourself, follow your passions, and never give up. It's Your Life...Live IT! Written in a clear, approachable, and jargon-free voice, *Moving Violations* will appeal to makers and analysts of policy, historians of science, technology, business, and the environment, and any readers interested in the history of cars and government. Although incarceration rates of juveniles in the United States have decreased over the past ten years, the U.S. still confines the highest number of youths compared to any other developed country in the world. Since the inception of the Juvenile Justice system, society's perception of children and how they should be treated within the Criminal Justice System has not only influenced the outcomes of our youths' future but is ever-changing. This changing and sometimes volatile system is scrutinized not only by our nation but the rest of the world. A primary goal of this text is to enable students to evaluate the system by providing not only a comprehensive look at its creation and development, but the intricacies within that have made it what it is today. In addition to providing the mainstream topics, this text goes further than competitors in its unique approach and cutting-edge content that ranges from learning activities to sections on victim impact,

theoretical and practical applications, provocative discussion questions, comprehensive wrap-ups, and relevant laws and landmark cases. Further, this text provides comprehensive coverage of the effects of the digital age on juveniles, specifically social media, sexting, cyberbullying, child pornography, and abduction. A separate chapter covers the effects of media violence on youths, including how television, movies, and modern virtual reality video games have advanced in both content and accessibility. At the end of each chapter, a world view of the topics covered offers comparative perspectives, an engaging and informative feature for students. The shocking true case of demonic possession from the reporters who first covered it in the Boston Herald. The case was discussed and you can watch the real exorcism footage in the blockbuster horror film *The Conjuring*. When terrifying, bizarre things kept happening to a hard-working Massachusetts farmer, he did what anyone would do. First he went to the local police chief. Then he went to his priest. And then he went to Ed and Lorraine Warren, the world's most famous demonologists who investigated the "The Amityville Horror" and other terrifying cases of demonic possession. It was the Warrens who called in one of America's most renowned exorcists, Bishop Robert McKenna. What they all experienced is described in this extraordinary book. Absolutely terrifying. Absolutely true. Don't miss the Warrens' new film "Annabelle" (October, 2014). Commissario Trotti of Italy's Polizia di Stato is called to the scene of the brutal murder of an old friend,

schoolteacher Rosanna Belloni, who has been found bludgeoned in her apartment. Trotti's superiors warn him off the case, but he is determined to hunt down the killer. There are lots of loose ends. Rosanna's sister, a notorious drug addict, is missing. Is a recent, unexplained suicide in the River Po connected to the murder? Where does the discovery of a car dredged up from the delta fit in? Faced with a seemingly unsolvable mystery, Trotti must also grapple with obstructive colleagues and problems arising in his private life. "Sometimes the best consuls don't want to be consul." Having saved Terra from annihilation, Marcus Antonius Cordus is awarded something he fought his whole life to avoid: Consulship of the Roman Republic. His only joy comes from his secret relationship with his Praetorian Prefect, Aquilina Servilia, the woman who coaxed him out of hiding to save Terra. But her quest for vengeance on the factions that murdered her mother could prompt another Roman civil war. So when he learns the alien Muses are now influencing the Zhonguo Sphere's emperor, Cordus jumps at the chance to leave the viper pit of Roman politics. Faced with imminent invasion, he leads a team of Praetorians, rogues, and Zhonguo defectors to the Muse homeworld to destroy the Muse strains once and for all. But the Muses have plans of their own, and their carefully laid traps ensnare Cordus at every turn. Can he save the Republic when the Muses force him to choose between his duty as Consul, his loyalty to his friends, and his love for Aquilina? MUSES OF THE REPUBLIC is the exciting sequel to the sci-fi/alternate history MUSES OF TERRA

and the final chapter in the Codex Antonius series.

Adapting Educational and Psychological Tests for Cross-Cultural Assessment critically examines and advances new methods and practices for adapting tests for cross-cultural assessment and research. The International Test Commission (ITC) guidelines for test adaptation and conceptual and methodological issues in test adaptation are described in detail, and questions of ethics and concern for validity of test scores in cross-cultural contexts are carefully examined. Advances in test translation and adaptation methodology, including statistical identification of flawed test items, establishing equivalence of different language versions of a test, and methodologies for comparing tests in multiple languages, are reviewed and evaluated. The book also focuses on adapting ability, achievement, and personality tests for cross-cultural assessment in educational, industrial, and clinical settings. This book furthers the ITC's mission of stimulating research on timely topics associated with assessment. It provides an excellent resource for courses in psychometric methods, test construction, and educational and/or psychological assessment, testing, and measurement. Written by internationally known scholars in psychometric methods and cross-cultural psychology, the collection of chapters

should also provide essential information for educators and psychologists involved in cross-cultural assessment, as well as students aspiring to such careers. This book is an introductory text to the field of psychological testing primarily suitable for undergraduate students in psychology, education, business, and related fields. This book will also be of interest to graduate students who have not had a prior exposure to psychological testing and to professionals such as lawyers who need to consult a useful source.

Psychological Testing is clearly written, well-organized, comprehensive, and replete with illustrative materials. In addition to the basic topics, the text covers in detail topics that are often neglected by other texts such as cross-cultural testing, the issue of faking tests, the impact of computers and the use of tests to assess positive behaviors such as creativity. Critically examines the dos and don'ts in adapting tests for cross-cultural assessment and research, as well as the major theoretical and methodological issues in the adaptation of educational and psychological tests.
