This significant new study contains the work of anthropologists engaged in doing research on gender. The editors argue for the creation of an ethnography-based feminism that, at the same time, pays heed to what women in specific circumstances identify as their concerns and also recognizes contradictions inherent in the goals of a feminist anthropology. These essays grapple with a range of awkward issues, including feminism in international contexts, the invisibility of women's working lives, and the problems of voice and ethnographic representation. Referring to a variety of ethnographic contexts, and working from diverse perspectives, the contributors examine the multiple dilemmas and conflicts of gender and power. A volume which will not only constitute a significant contribution to the social sciences literature both theoretically and substantively, but will also place Canadian feminist anthropology on the cutting edge of global feminist anthropology. I strongly recommend it. Valda Blundell Carleton University This book defines the relationship between gender and international security, analyzing and critiquing international security theory and practice from a gendered perspective. Gender issues have an important place in the international security landscape, but have been neglected both in the theory and practice of international security. The passage and implementation of UN Security Council Resolution 1325 (on Security Council operations), the integration of gender concerns into peacekeeping, the management of refugees, post-conflict disarmament and reintegration and protection for non-combatants in times of war shows the increasing importance of gender sensitivity for actors on all fronts in global security. This book aims to improve the quality and quantity of conversations between feminist security studies and security studies more generally, in order to demonstrate the importance of gender analysis to the study of international security, and to expand the feminist research program in Security Studies. The chapters included in this book not only challenge the assumed irrelevance of gender, they argue that gender is not a subsection of security studies to be compartmentalized or briefly considered as a side issue. Rather, the contributors argue that gender is conceptually, empirically, and normatively essential to studying international security. They do so by critiquing and reconstructing key concepts of and theories in international security, by looking for the increasingly complex roles women play as security actors, and by looking at various contemporary security issues through gendered lenses. Together, these chapters make the case that accurate, rigorous, and ethical scholarship of international security cannot be produced without taking account of women's presence in or the gendering of world politics. This book will be of interest to all students of critical security studies, gender studies and International Relations in general. Laura Sjoberg is Assistant Professor of Political Science at the University of Florida. She has a Phd in International Relations and Gender Studies

from the University of Southern California and is the author of *Gender, Justice, and the Wars in Iraq* (2006) and, with Caron Gentry, *Mothers, Monsters, Whores: Women's Violence in Global Politics* (2007). *Decolonization and Feminisms in Global Teaching and Learning* is a resource for teachers and learners seeking to participate in the creation of radical and liberating spaces in the academy and beyond. This edited volume is inspired by, and applies, decolonial and feminist thought – two fields with powerful traditions of critical pedagogy, which have shared productive exchange. The structure of this collection reflects the synergies between decolonial and feminist thought in its four parts, which offer reflections on the politics of knowledge; the challenging pathways of finding your voice; the constraints and possibilities of institutional contexts; and the relation between decolonial and feminist thought and established academic disciplines. To root this book in the political struggles that inspire it, and to maintain the close connection between political action and reflection in praxis, chapters are interspersed with manifestos formulated by activists from across the world, as further resources for learning and teaching. These essays definitively argue that the decolonization of universities, through the re-examination of how knowledge is produced and taught, is only strengthened when connected to feminist and critical queer and gender perspectives. Concurrently, they make the compelling case that gender and feminist teaching can be enhanced and developed when open to its own decolonization. This book chronicles the dawn of the global movement for women's rights in the first decades of the twentieth century. The founding mothers of this movement were not based primarily in the United States, however, or in Europe. Instead, Katherine M. Marino introduces readers to a cast of remarkable Latin American and Caribbean women whose deep friendships and intense rivalries forged global feminism out of an era of imperialism, racism, and fascism. Six dynamic activists form the heart of this story: from Brazil, Bertha Lutz; from Cuba, Ofelia Domingez Navarro; from Uruguay, Paulina Luisi; from Panama, Clara Gonzalez; from Chile, Marta Vergara; and from the United States, Doris Stevens. This Pan-American network drove a transnational movement that advocated women's suffrage, equal pay for equal work, maternity rights, and broader self-determination. Their painstaking efforts led to the enshrinement of women's rights in the United Nations Charter and the development of a framework for international human rights. But their work also revealed deep divides, with Latin American activists overcoming U.S. presumptions to feminist superiority. As Marino shows, these early fractures continue to influence divisions among today's activists along class, racial, and national lines. Marino's multinational and multilingual research yields a new narrative for the creation of global feminism. The leading women introduced here were forerunners in understanding the power relations at the heart of international affairs. Their drive to enshrine fundamental rights for women, children, and all people of the world stands as a testament to what can be accomplished when global thinking meets local action. This collection examines the ongoing shared struggles of diverse groups of women in Canada and beyond focusing on a diverse range of themes to explore the centrality of gender and feminist praxis in western and non-western contexts. Harnessing the energy of provocative theories generated by recent understandings of the human body, the natural world, and the material world, *Material Feminisms* presents an entirely new way for feminists to conceive of the question of materiality. In lively and timely essays, an international group of feminist thinkers challenges the assumptions and norms that have previously defined studies about the body. These wide-ranging essays grapple with topics such as the material reality of race, the significance of sexual difference, the impact of disability experience, and the complex interaction between nature and culture in traumatic events such as Hurricane Katrina. By insisting on the importance of materiality, this volume breaks new ground in philosophy, feminist theory, cultural studies, science studies, and other fields where the body and nature collide. An anthology containing some 30 essays which focus on topics including a critique of American feminist legal scholarship; motherhood and work in cultural context; Josephine Baker and the Cold War; the campaign against female circumcision; violence against Aboriginal women in Australia; and "marketization" and the status of women in China. Includes a foreword by social justice activist and professor at the U. of California-Santa Cruz, Angela Y. Davis. Annotation copyrighted by Book News Inc., Portland, OR Global history records an astonishing variety of forms of social organization. Yet almost universally, males subordinate females. How does the relationship between men and women shape the wider political order? *The First Political Order* is a groundbreaking demonstration that the persistent and systematic subordination of women underlies all other institutions, with wide-ranging implications for global security and development. Incorporating research findings spanning a variety of social science disciplines and comprehensive empirical data detailing the status of women around the globe, the book shows that female subordination functions almost as a curse upon nations. A society's choice to subjugate women has significant negative consequences: worse governance, worse conflict, worse stability, worse economic performance, worse food security, worse health, worse demographic problems, worse environmental protection, and worse social progress. Yet despite the pervasive power of social and political structures that subordinate women, history—and the data—reveal possibilities for progress. *The First Political Order* shows that when steps are taken to reduce the hold of inequitable laws, customs, and practices, outcomes for all improve. It offers a new paradigm for understanding insecurity, instability, autocracy, and violence, explaining what the international community can do now to promote more equitable relations between men and women and, thereby, security and peace. With comprehensive empirical evidence of the wide-ranging harm of subjugating women, it is an important book for security scholars, social scientists, policy makers, historians, and advocates for women worldwide. This ambitious book explores challenges to male hegemony throughout continental Europe over the past 250 years. For general readers and those interested primarily in the historical record, it provides a comprehensive, comparative account of feminist developments in European societies, as well as a rereading of European history from a feminist perspective. By placing gender, or relations between women and men, at the center of European politics, it aims to reconfigure our understanding of the European past and to make visible a long but neglected tradition of feminist thought and politics. On another level the book seeks to disentangle some misperceptions and to demystify some confusing contemporary debates about the Enlightenment, reason, nature, and public vs. private, equality vs. difference. In the process, the author aims to show that gender is not merely 'a useful category of analysis', but that sexual difference lies at the heart of human thought and politics. This book provides a critique of the discipline of international relations from a feminist perspective. The critique is developed, first theoretically. Then the author examines both feminist theories and theories of international relations with a view to developing an approach to world politics which incorporates an analysis of gender, and gender relations. The critique is secondly developed through the application of the notion of gender to the activities of two international institutions, the International Parenthood Federation and the International Labour Organisation. Creates a new space for hybrid feminist analysis of Asian Muslim women's lives. *Contesting Feminisms* explores how Asian Muslim women make decisions on appropriating Islam and Islamic lifestyles through their own participation in the faith. The contributors highlight the fact that secularism has provided the space for some women to reclaim their religious identity and their own feminisms. Through compelling case studies and theoretical discussions, this volume challenges mainstream Western and national feminisms that presume homogeneity of Muslim women's lives to provide a deeper understanding of the multiple realities of feminism in Muslim communities. "Contesting Feminisms attempts to offer nuanced understandings of Muslim women's struggles that are firmly rooted in close attention to local social, economic, and historical contexts with an eye to opening up theoretical spaces in which to examine local and transnational feminist Muslim activism. As such, the volume offers rich insights into women's lives and struggles in moving away from the reductionist frame of a strictly Qur'anic view of women that is mobilized by both Western detractors and Islamic normativizers to constrain women's agency, and instead brings into view the heterogeneity of Muslim women's lives and struggles." — Zayn Kassam, editor of *Women and Islam* This volume consists of new translations of twenty-six representative selections from the belle époque, the period of cultural efflorescence in late nineteenth- and early twentieth-century France. These pieces have a remarkably modern sound; the anger of Nelly Roussel, the arguments for reproductive freedom, and the case histories of prostitutes transcend time and circumstance. Chosen from newspapers, speeches, novels, political tracts, and the like, these selections portray the range of feminist response to the prevailing social situation of women?from the generally meliorist position of the Christian feminists to the radical stances of socialist and utopian feminists. The works of authors well known at the turn of the century are interspersed with stories of the lives of some of society's victims. The selections are organized thematically: education, work, prostitution and the double standard, marriage and male-female relations, maternity, and political and civil rights. In the volume introduction and in introductions to each selection, the editors place the pieces within their historical and social settings. This is a landmark anthology of international feminist theatre research. A three-part structure orientates readers through Cartographies of feminist critical navigations of the global arena; the staging of feminist Interventions in a range of international contexts; and Manifestos for today's feminist practitioners, activists and academics. This interdisciplinary anthology bridges gaps between feminist and antiracist theories and practices by providing original empirical studies of feminist antiracist organizing in Australia, Canada, India, Italy, France, Japan, South Africa, the United States, Yemen, and Zimbabwe. International scholars and activists examine how the local and national context shapes the ways that feminists engage in antiracist practices, how women in various regions counter the perception that feminism is a "Western" ideology, and how globalization creates new opportunities for organizing. This volume presents debates on class within an international context. Its particular focus is on women's theorized experience of social class from a variety of feminist perspectives, contextualized in relation to the countries and regions in which they live. Using personal experience as a basis, contributors cover Australia, Bangladesh, Botswana, Britain, Canada, Czechoslovakia and the Czech Republic, India, Israel, Korea, New Zealand, Poland, and the USA - illuminating the differences and similarities between

regions.; Challenging the view that "class is dead" as well as the idea that it is a British phenomenon, the book argues that class needs to be regarded as a key concept in any attempt to understand women's lives. It also reflects on personal and political experiences of class around the world in order to understand the mechanisms through which class discrimination operates and is mediated by gender, sexuality, ethnicity and racism. In this text, Gill Allwood explores theories of masculinity emerging from French feminist theories of gender and from French feminist practice concerning violence towards women, highlighting both the commonalities and the specificities of the French case. She discusses the particular concern of French theorists with seduction, their rejection of the term "gender" and the centrality of the difference debate.; In the first part of the book, Allwood separately examines feminist theories of gender and sexual difference and the problem of male violence. She goes on to consider the developments which are taking place on the borderline between the two, examining the way in which these developments have contributed to an understanding of masculinity. Readdressing problems and debates that will be familiar to English-speaking readers, the text exposes cultural differences and similarities in the ways in which these problems are approached and it provides a detailed account of the changes in both feminist action and theory in France in recent years.; This analysis of feminism in France should be of interest to student and scholars in French studies, European studies, gender studies and cultural studies. The goal of *Handbook of International Perspectives on Feminism* is to present the histories, status, and contours of feminist research and practice in their respective regional and/or national contexts. The editors have invited researchers who are doing this work to present their perspectives on women, culture, and rights with the objective to illuminate the diverse forms that feminist psychological work takes around the world, and connect these forms with the unique positions and concerns of women in these regions. What does "feminist psychology" look like in Japan? In South Africa? In Sri Lanka? In Canada? In Brazil? How did it come to look this way? How do psychologists in these countries or regions, each with unique political, economic, and cultural histories, engage in feminist work in the societies in which they live? How do they employ the tools of "psychology" – broadly defined – to do this work, and what tensions and challenges have they faced? This important introduction to feminist International Relations discusses the history, present and future of the field. With a unique format, it examines issues including global governance, the United Nations, war, peace, security, science, beauty and human rights. Why is feminist research carried out in international relations (IR)? What are the methodologies and methods that have been developed in order to carry out this research? *Feminist Methodologies for International Relations* offers students and scholars of IR, feminism, and global politics practical insight into the innovative methodologies and methods that have been developed - or adapted from other disciplinary contexts - in order to do feminist research for IR. Both timely and timeless, this volume makes a diverse range of feminist methodological reflections wholly accessible. Each of the twelve contributors discusses aspects of the relationships between ontology, epistemology, methodology, and method, and how they inform and shape their research. This important and original contribution to the field will both guide and stimulate new thinking. This collection of essays by leading feminist thinkers from North and South constitutes a major new attempt to reposition feminism within development studies. Feminism's emphasis on social transformation makes it fundamental to development studies. Yet the relationship between the two disciplines has frequently been a troubled one. At present, the way in which many development institutions function often undermines feminist intent through bureaucratic structures and unequal power quotients. Moreover, the seeming intractability of inequalities and injustice in developing countries have presented feminists with some enormous challenges. Here, emphasizing the importance of a plurality of approaches, the authors argue for the importance of what 'feminisms' have to say to development. Confronting the enormous challenges for feminisms in development studies, this book provides real hope for dialogue and exchange between feminisms and development. In the first book-length treatment of the application of feminist theories of international law, Charlesworth and Chinkin argue that the absence of women in the development of international law has produced a narrow and inadequate jurisprudence that has legitimated the unequal position of women worldwide rather than confronting it. The boundaries of international law provides a feminist perspective on the structure, processes and substance of international law, shedding new light on treaty law, the concept of statehood and the right of self-determination, the role of international institutions and the law of human rights. Concluding with a consideration of whether the inclusion of women in the jurisdiction of international war crimes tribunals represents a significant shift in the boundaries of international law, the book encourages a dramatic rethinking of the discipline of international law. With a new introduction that reflects on the profound changes in international law since the book's first publication in 2000, this provocative volume is essential reading for scholars, practitioners and students alike. In many Latin American countries, guerrilla struggle and feminism have been linked in surprising ways. Women were mobilized by the thousands to promote revolutionary agendas that had little to do with increasing gender equality. They ended up creating a uniquely Latin American version of feminism that combined revolutionary goals of economic equality and social justice with typically feminist aims of equality, nonviolence, and reproductive rights. Drawing on more than two hundred interviews with women in Nicaragua, El Salvador, and the Mexican state of Chiapas, Karen Kampwirth tells the story of how the guerrilla wars led to the rise of feminism, why certain women became feminists, and what sorts of feminist movements they built. *Feminism and the Legacy of Revolution: Nicaragua, El Salvador, Chiapas* explores how the violent politics of guerrilla struggle could be related to the peaceful politics of feminism. It considers the gains, losses, and internal conflicts within revolutionary women's organizations. *Feminism and the Legacy of Revolution* challenges old assumptions regarding revolutionary movements and the legacy of those movements for the politics of daily life. It will appeal to a broad, interdisciplinary audience in political science, sociology, anthropology, women's studies, and Latin American studies as well as to general readers with an interest in international feminism. This comprehensive and important volume includes contributions by activists, journalists, lawyers and scholars from twenty-one countries. The essays map the directions the movement for women's rights is taking--and will take in the coming decades--and the concomitant transformation of prevailing notions of rights and issues. They address topics such as the rapes in former Yugoslavia and efforts to see that a War Crimes Tribunal responds; domestic violence; trafficking of women into the sex trade; the persecution of lesbians; female genital mutilation; and reproductive rights. This book explores the contentious topic of women's rights in Muslim-majority countries, with a specific focus on Iran and the Iranian women's movement from 1906 to the present. The work contextualizes the authorial self through the use of personal narrative and interviews. A new critique of Islamic law is produced through an in-depth study of the Iranian Constitution, civil and criminal codes. The work presents a novel reconceptualization of the term "Islamic feminism" by revisiting the arguments of various scholars and through analysis of interviews with Iranian women's rights activists. It is contended that the feminist movements can play a critical role in Islamic law reform and consequently the eventual implementation of international human rights law in Muslim-majority countries. What emerges from this study is not only a feminist critique of two major regimes of law, but also the identification of possibilities for reform in the future. The study transitions from the Iranian national context to the international by way of a comparative legal study of international human rights laws and Islamic laws. The book will appeal both to academics and human rights practitioners. The essays in *Transitions, Environments, Translations* explore the varied meanings of feminism in different political, cultural, and historical contexts. They respond to the claim that feminism is Western in origin and universalist in theory, and to the assumption that feminist goals are self-evident and the same in all contexts. Rather than assume that there is a blueprint by which to measure the strength or success of feminism in different parts of the world, these essays consider feminism to be a site of local, national and international conflict. They ask: What is at stake in various political efforts by women in different parts of the world? What meanings have women given to their efforts? What has been their relationship to feminism--as a concept and as an international movement? What happens when feminist ideas are translated from one language, one political context, to another? In this brand new radical analysis of globalization, Cynthia Enloe examines recent events—Bangladeshi garment factory deaths, domestic workers in the Persian Gulf, Chinese global tourists, and the UN gender politics of guns—to reveal the crucial role of women in international politics today. With all new and updated chapters, Enloe describes how many women's seemingly personal strategies—in their marriages, in their housework, in their coping with ideals of beauty—are, in reality, the stuff of global politics. Enloe offers a feminist gender analysis of the global politics of both masculinities and femininities, dismantles an apparently overwhelming world system, and reveals that system to be much more fragile and open to change than we think. Feminism is a cultural as well as a political movement. It changes the way women think and feel and affects how women and men live their lives and interpret the world. For this reason it has provoked lively debate and fierce antagonisms that have continued to the present day. Contemporary feminism and its concerns are rooted in a history stretching over at least two centuries. *Feminism* explores this history in a range of countries spanning the world. It asks does 'feminism' exist? Or are the differences among feminist today so great that we should speak of 'feminisms'? The book looks at the challenge made by feminists to prevailing ideas about a 'woman's place', the complex relationship between equality and difference, women's solidarity and the relationship between feminism and other social and political reform movements. First published in 1998, this book explores the links between theories of feminism and the practice of law, and does so through an examination of a number of contemporary themes in feminist legal studies. From an interdisciplinary perspective, this book examines, as one of its overarching themes, the existence of a distinctively female legal voice, or voices. In arguing for a recognition of the diversity of women's experiences of the law and in the law, it is also maintained that the role of feminism as a political strategy must not be lost. *Feminist legal studies* is one of the most exciting and dynamic areas of contemporary legal studies and the ambition of this

book is both to capture and channel this dynamic. In introducing themes from politics, philosophy, literature, sociology and cultural studies, this book will be of interest to a wide ranging audience. Contemporary feminist advocacy in human rights, international criminal law, and peace and security is gripped by the issue of sexual violence in conflict. But it hasn't always been this way. Analyzing feminist international legal and political work over the past three decades, Karen Engle argues that it was not inevitable that sexual violence in conflict would become such a prominent issue. Engle reveals that as feminists from around the world began to pay an enormous amount of attention to sexual violence in conflict, they often did so at the cost of attention to other issues, including the anti-militarism of the women's peace movement; critiques of economic maldistribution, imperialism, and cultural essentialism by feminists from the global South; and the sex-positive positions of many feminists involved in debates about sex work and pornography. The Grip of Sexual Violence in Conflict offers a detailed examination of how these feminist commitments were not merely deprioritized, but undermined, by efforts to address the issue of sexual violence in conflict. Engle's analysis reinvigorates vital debates about feminist goals and priorities, and spurs readers to question much of today's common sense about the causes, effects, and proper responses to sexual violence in conflict. This book explores the critical significance of the visual arts to transnational feminist thought and activism. This first volume in Marsha Meskimmon's powerful and timely Trilogy focuses on some of the central political challenges of our era, including war, migration, ecological destruction, sexual violence and the return of neo-nationalisms. It argues that transnational feminisms and the arts can play a pivotal role in forging the solidarities and epistemic communities needed to create social, economic and ecological justice on a world scale. Transnational feminisms and the arts provide a vital space for knowing, imagining and inhabiting – earth-wide and otherwise. The chapters in this book each take their lead from a current matter of political significance that is central to transnational feminist activist organizing and has been explored through the arts in ways that permit dialogues across geopolitical borders to take place. Including examples of artwork in full colour, this is essential reading for students and researchers in art history, theory and practice, visual culture studies, feminism and gender studies, political theory and cultural geography. The Transnational Feminisms and the Arts Trilogy Transnational Feminisms, Transversal Politics and Art: Entanglements and Intersections Transnational Feminisms and Art's Horizontal Histories: Ecologies and Genealogies Transnational Feminisms and Posthuman Aesthetics: Resonance and Riffing Publisher Description The contributors to this volume provide a survey of the existing gender machineries on the international level, explore the way in which feminist movements have approached international organizations and the way IOs have responded, and examine the laws and norms that have been produced and their effects in local contexts globally. The goal of Handbook of International Perspectives on Feminism is to present the histories, status, and contours of feminist research and practice in their respective regional and/or national contexts. The editors have invited researchers who are doing this work to present their perspectives on women, culture, and rights with the objective to illuminate the diverse forms that feminist psychological work takes around the world, and connect these forms with the unique positions and concerns of women in these regions. What does "feminist psychology" look like in Japan? In South Africa? This book is written by anthropologists who are currently engaged in research on gender. The editors argue for the development of an ethnography-based feminism that both pays heed to what women in specific circumstances identify as their concerns and recognizes the contradictions inherent in the goals of feminist anthropology. The essays consider a range of "awkward" issues, including feminism in international contexts, the invisibility of women's working lives, and the problems of voice and ethnographic representation. Referring to a variety of ethnographic contexts, and working from diverse perspectives, the contributors examine the multiple dilemmas and conflicts of gender and power. This new volume in the Studies in International Performance series looks at feminism's engagement with and relationship to global change. The contributors attempt to develop a global scholarly dialogue by using examples from a range of countries (Israel, Japan, Korea, Germany, Spain, Sweden, Italy) as well as more familiar perspectives from the US and UK. The book aims to show a variety of performance practices which are considered to be 'feminist' from a large number of representative countries and locales. Feminism's origins have often been framed around a limited cast of mostly white and educated foremothers, but the truth is that feminism has been and continues to be a global movement. For centuries, women from all walks of life have been mobilizing for gender justice. As the last decade has reminded even the most powerful women, there is nothing "post-feminist" about our world. And there is much to be learned from the passion and protests of the past. Historian Lucy Delap looks to the global past to give us a usable history of the movement against gender injustice—one that can help clarify questions of feminist strategy, priority and focus in the contemporary moment. Rooted in recent innovative histories, the book incorporates alternative starting points and new thinkers, challenging the presumed priority of European feminists and ranging across a global terrain of revolutions, religions, empires and anti-colonial struggles. In Feminisms, we find familiar stories—of suffrage, of solidarity, of protest—yet there is no assumption that feminism looks the same in each place or time. Instead, Delap explores a central paradox: feminists have demanded inclusion but have persistently practiced their own exclusions. Some voices are heard and others are routinely muted. In amplifying the voices of figures at the grassroots level, Delap shows us how a rich relationship to the feminist past can help inform its future.
