Bones, Clones, and Biomes Jun 21 2020 As explorers and scientists have known for decades, the Neotropics harbor a fantastic array of our planet's mammalian diversity, from capybaras and capuchins to maned wolves and mouse opossums to sloths and sakis. This biological bounty can be attributed partly to the striking diversity of Neotropical landscapes and climates and partly to a series of continental connections that permitted intermittent faunal exchanges with Africa, Antarctica, Australia, and North America. Thus, to comprehend the development of modern Neotropical mammal faunas requires not only mastery of the Neotropics' substantial diversity, but also knowledge of mammalian lineages and landscapes dating back to the Mesozoic. *Bones, Clones, and Biomes* offers just that—an exploration of the development and relationships of the modern mammal fauna through a series of studies that encompass the last 100 million years and both Central and South America. This work serves as a complement to more taxonomically driven works, providing for readers the long geologic and biogeographic contexts that undergird the abundance and diversity of Neotropical mammals. Rather than documenting diversity or distribution, this collection traverses the patterns that the distributions and relationships across mammal species convey, bringing together for the first time geology, paleobiology, systematics, mammalogy, and biogeography. Of critical importance is the book's utility for current conservation and management programs, part of a rapidly rising conservation paleobiology initiative.

Photo by Sammy Davis, Jr. Oct 26 2020 Sammy Davis, Jr. will forever be remembered as one of America's finest entertainers. An all-around performer who could sing, dance, and act, Davis broke racial barriers in the entertainment world and became the only non-white member of the Rat Pack. Only now, however, is Davis's talent as a photographer finally being recognized. In this previously unpublished collection of black and white photography, readers will be fascinated by Davis's portrayals of A-list performers, iconic world leaders, and scenes from everyday life. Davis's subjects include dozens of classic celebrities—such as Frank Sinatra, Marilyn Monroe, Paul Newman, and James Dean—who are often photographed at their most casual and revealing moments. Accompanying the pictures is an assortment of remembrances by Burt Boyar, a longtime friend and traveling companion of Davis who collaborated with the entertainer on both of his autobiographies. Through a series of memorable anecdotes, Boyar reflects on Davis's many achievements as well as the private moments they shared as friends. Along with Davis's candid shots of ordinary life—from a group of children laughing to a baseball game at the Washington Monument—these stories reveal a side of the performer far removed from his Rat Pack persona. The release of this book will also coincide with the release of Burt Boyar's upcoming documentary, *Sammy Speaks*, created from his extensive archive of taped conversations with the star.

The Mobile Photographer Mar 19 2020 It's been said that, with smartphones, everyone is a photographer. There is a snide implication with that

statement—that camera phones aren't “real” cameras and that the people who use them aren't “real” photographers. In this book, Robert Fisher proves that today's Android devices offer cameras that are remarkably powerful and more than capable of producing images that rival those made with more “serious” equipment. In this book, Fisher guides readers through the menus of the Android operating system, helping them to understand how to choose and use out-of-the-box controls for better images. Next, he covers add-on accessories and applications designed to enhance the devices' capabilities. While the photographic capabilities of the “base” camera are pretty terrific and will meet with rave reviews from many users, the camera really produces images that sing when suited up with DSLR functions, filters, and postproduction effects—all of which Fisher covers with prowess and technical skill.
