Attracting Investment in Bangladesh—Sectoral Analyses Feb 12 2022 This is volume 3 of a three-volume publication on Bangladesh's trade prospects. Bangladesh's ambition is to build on its very solid growth and poverty reduction achievements, and accelerate growth to become a middle income country by 2021, and share prosperity more widely amongst its citizens. This includes one of its greatest development challenges: to provide gainful employment to the over 2 million people that will join the labor force each year over the next decade. Moreover, only 54.1 million of its 94 million working age people are employed. Bangladesh needs to use its labor endowment even more intensively to increase growth and, in turn, to absorb the incoming labor. The Diagnostic Trade Integration Study identifies the following actions centered around four pillars to sustain and accelerate export growth: (1) breaking into new markets through a) better trade logistics to reduce delivery lags ; as world markets become more competitive and newer products demand shorter lead times, to generate new sources of competitiveness and thereby enable market diversification; and b) better exploitation of regional trading opportunities in nearby growing and dynamic markets, especially East and South Asia; (2) breaking into new products through a) more neutral and rational trade policy and taxation and bonded warehouse schemes; b) concerted efforts to spur domestic investment and attract foreign direct investment, to contribute to export promotion and diversification, including by easing the energy and land constraints; and c) strategic development and promotion of services trade; (3) improving worker and consumer welfare by a) improving skills and literacy; b) implementing labor and work safety guidelines; and c) making safety nets more effective in dealing with trade shocks; and (4) building a supportive environment, including a) sustaining sound macroeconomic fundamentals; and b) strengthening the institutional capacity for strategic policy making aimed at the objective of international competitiveness to help bring focus and coherence to the government's reform efforts. This third volume provides in-depth analysis of eight different manufacturing and services sectors of the Bangladeshi economy, which help to illustrate the thematic analysis of volume 2 and ground it in sector experiences. Besides pointing to cross-cutting themes, the analysis also highlights some specific issues and actions that could help relieve constraints to faster export growth in these sectors.

How Venture Capital Works Oct 08 2021 Explanations to the inner workings of one of the least understood, but arguably most important, areas of business finance is offered to readers in this engaging volume: venture capital. Venture capitalists provide necessary investment to seed (or startup) companies, but the startup is only the beginning, there is much more to be explored. These savvy investors help guide young entrepreneurs, who likely have little experience, to turn their businesses into the Googles, Facebooks, and Groupons of the world. This book explains the often-complex methods venture capitalists use to value companies and to get the most return on their investments, or ROI. This book is a must-have for any reader interested in the business world.

[Marketing Asian Places](#) Jan 23 2023 At the beginning of the 21st century, headlines report how cities are going bankrupt, states are running large deficits and nations are stuck in high debt and stagnation. This text argues that thousands of places are in crisis and can no longer rely on national policies for protection. The authors show how places in Asia can become attractive products by effectively communicating their special qualities and attracting investment.

[The Effect of Treaties on Foreign Direct Investment](#) Aug 26 2020 Over the past twenty years, foreign direct investments have

spurred widespread liberalization of the foreign direct investment (FDI) regulatory framework. By opening up to foreign investors and encouraging FDI, which could result in increased capital and market access, many countries have improved the operational conditions for foreign affiliates and strengthened standards of treatment and protection. By assuring investors that their investment will be legally protected with closed bilateral investment treaties (BITs) and double taxation treaties (DTTs), this in turn creates greater interest in FDI.

Attracting Foreign Investment May 03 2021 This paper provides a comprehensive examination of trends in foreign investment and the factors explaining these patterns. It looks at global and developing country patterns of inward investments, provides a detailed framework for analyzing these flows, analyzes new forms of foreign investment, and suggests policies to attract investment.

New Urban Management: Attracting Value Flows to Branded Hubs Jul 25 2020 New Urban Management discusses how the logic of economic flows poses a challenge to local governments throughout the world. The book argues that the increased fluidity in economic life must have its reflection in local economic development policy.

Official Development Assistance and Private Finance Attracting Finance and Investment to Developing Countries Jan 19 2020 Presents the proceedings of the Development Partnerships Forum of February 2002.

Attracting New Industry Oct 16 2019

Attracting Foreign Direct Investment Into Infrastructure Dec 10 2021 Printed on Demand. Limited stock is held for this title. If you would like to order 30 copies or more please contact books@worldbank.org Contact books@worldbank.org, if currently unavailable. FIAS Occasional Papers no. 12. During the early 1990s, the Foreign Investment Advisory Service (FIAS), a joint facility of the World Bank and the International Finance Corporation (IFC), found that governments and foreign investors alike were concerned and frustrated about difficulties in successfully implementing private infrastructure projects. Governments were trying to attract these new types of investment without having established an appropriate policy framework. Therefore, there were no institutional structures to resolve impediments effectively and provide clear guidelines for the award of such large-scale projects. Legal frameworks tended to address traditional public-sector responsibilities and not investor concerns. Regulatory environments either did not exist or did not provide investors enough guarantees that their future operating environment would be sufficiently reliable. Consequently, FIAS has been advising many governments in the developing world on the best way to establish a policy framework attractive to foreign investors. FIAS typically combines its review of the institutional, legal and regulatory environment with investor roundtables and workshops for senior government officials to ensure that all the major concerns of both the government and the private sector are taken into account. Although each country has unique policy problems, FIAS has encountered common features in key areas that pose stumbling blocks for private infrastructure investments. This study synthesizes this experience and derives lessons for facilitating and encouraging foreign direct investment in infrastructure.

Globalization and International Investment May 23 2020 This volume brings together a broad range of articles on international law and foreign investment which together provide a contemporary overview of the diverse range of issues and perspectives which continue to exercise policy-makers and scholars alike. Central to this collection is the tension between market-oriented reforms on the one hand, raising issues of market access and protection of investors, and corporate social responsibility discourses on the other, raising concerns about environmental protection and respect for human and labour rights. Regional perspectives on these issues reveal differing priorities and approaches.

Policy Competition for Foreign Direct Investment Dec 30 2020 This book looks at the evidence and assesses the impact of competition among governments to attract FDI. It finds little evidence directly to support fears of a "global race to the bottom" in labour and environmental standards.

The Future of Productivity Jul 05 2021 This book addresses the rising productivity gap between the global frontier and other firms, and identifies a number of structural impediments constraining business start-ups, knowledge diffusion and resource allocation (such as barriers to up-scaling and relatively high rates of skill mismatch).

New Programs and Techniques for Attracting Investment in Industry Nov 21 2022

OECD Global Forum on International Investment Attracting International Investment for Development Feb 18 2020 This publication is a collection of conference papers from the OECD Global Forum on International Investment (GFII) held in Shanghai on 5-6 December 2002.

Principles of Marketing Jun 23 2020 An introduction to marketing concepts, strategies and practices with a balance of depth of coverage and ease of learning. Principles of Marketing keeps pace with a rapidly changing field, focussing on the ways brands create and capture consumer value. Practical content and linkage are at the heart of this edition. Real local and international examples bring ideas to life and new feature 'linking the concepts' helps students test and consolidate understanding as they go. The latest edition enhances understanding with a unique learning design including revised, integrative concept maps at the start of each chapter, end-of-chapter features summarising ideas and themes, a mix of mini and major case studies to illuminate concepts, and critical thinking exercises for applying skills.

World Investment Report 2019 Nov 09 2021 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends

and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

Marketing a Country Jan 11 2022 The Foreign Investment Advisory Service, a joint facility of the International Finance Corporation (IFC) and the World Bank, was established to help governments of developing member countries to review and adjust the policies, institutions, and programmes that affect foreign direct investment (FDI). The ultimate purpose of FIAS is to assist member governments to attract beneficial foreign private capital, technology, and managerial expertise.

ESG and Responsible Institutional Investing Around the World: A Critical Review Apr 21 2020 This survey examines the vibrant academic literature on environmental, social, and governance (ESG) investing. While there is no consensus on the exact list of ESG issues, responsible investors increasingly assess stocks in their portfolios based on nonfinancial data on environmental impact (e.g., carbon emissions), social impact (e.g., employee satisfaction), and governance attributes (e.g., board structure). The objective is to reduce exposure to investments that pose greater ESG risks or to influence companies to become more sustainable. One active area of research at present involves assessing portfolio risk exposure to climate change. This literature review focuses on institutional investors, which have grown in importance such that they have now become the largest holders of shares in public companies globally. Historically, institutional investors tended to concentrate their ESG efforts mostly on corporate governance (the “G” in ESG). These efforts included seeking to eliminate provisions that restrict shareholder rights and enhance managerial power, such as staggered boards, supermajority rules, golden parachutes, and poison pills. Highlights from this section: · There is no consensus on the exact list of ESG issues and their materiality. · The ESG issue that gets the most attention from institutional investors is climate change, in particular their portfolio companies’ exposure to carbon risk and “stranded assets.” · Investors should be positioning themselves for increased regulation, with the regulatory agenda being more ambitious in the European Union than in the United States. Readers might come away from this survey skeptical about the potential for ESG investing to affect positive change. I prefer to characterize the current state of the literature as having a “healthy dose of skepticism,” with much more remaining to be explored. Here, I hope the reader comes away with a call to action. For the industry practitioner, I believe that the investment industry should strive to achieve positive societal goals. CFA Institute provides an exemplary case in its Future of Finance series (www.cfainstitute.org/research/future-finance). For the academic community, I suggest we ramp up research aimed at tackling some of the open questions around the pressing societal goals of ESG investing. I am optimistic that practitioners and academics will identify meaningful ways to better harness the power of global financial markets for addressing the pressing ESG issues facing our society.

Responsible Enterprise, Foreign Direct Investment and Investment Promotion Mar 13 2022 Brings together a series of papers identifying opportunities for Investment Promotion Agencies (IPAs) to attract Foreign direct investment (FDI) that is associated with positive contributions to sustainable development and good corporate social responsibility practices.

World Investment Report 2020 Apr 02 2021 The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

The Future of Electricity in Fast-growing Economies Sep 26 2020

Multinational Corporations and Foreign Direct Investment Jun 16 2022 Foreign direct investment (FDI) and multinational corporations (MNCs)--for better and worse--play a large and growing role in shaping our world. The integrating thesis of this book is the inevitability of heterogeneity in FDI and MNCs and, accordingly, the imperative of disaggregation. Large companies doing business on a global basis increasingly dominate the production and marketing of the world's goods and services. The importance of these companies continues to grow while the debate about their nature and effects remains mired in a long-standing stalemate couched in strong black and white terms. Stephen D. Cohen seeks to reconcile this impasse by analyzing multinational corporations and foreign direct investment in an eclectic, nuanced manner. The core thesis is that an accurate understanding of the nature and impact of these phenomena comes from acknowledging the dominance of heterogeneity, perceptions, and ambiguity and the paucity of universal truths. This approach should contribute significantly to both a better academic understanding and a more productive policy debate of an increasingly important element of the world economy.

Building Competitiveness in Tourism as a Strategic Intervention for Attracting Investment and Employment in Uganda Sep 07 2021

Attracting Investors May 15 2022 Marketing guru Philip Kotler shows entrepreneurs how to market their companies to investors How can businesses do a better job of attracting capital? The answer: "Marketing!" Marketing expert Philip Kotler teams up with a renowned marketing consultant and an INSEAD professor for this practical, marketing-based approach to raising capital from investors. Based on the premise that entrepreneurs and business owners often don't understand what investors want and how they make their decisions, *Attracting Investors* offers a larger view of the factors involved, and guides both startup and veteran firms in effectively raising capital. Philip Kotler (Glencoe, IL) is the S.C. Johnson & Son Distinguished Professor of International Marketing at Northwestern University's Kellogg School of Management, and the author of 35 books.

Hermawan Katajaya (Jakarta, Indonesia) runs MarkPlus, the largest marketing consulting firm in Indonesia, and is coauthor with Kotler of several books, including *Repositioning Asia* and *Rethinking Marketing*. S. David Young (Fontainebleu, France) is a Professor of Accounting and Control at INSEAD in Fontainebleu, France.

Attracting Sustainable Investment Aug 06 2021 This book is a practitioner's guide to sustainable development, laying out strategies for attracting investment for communities and their partners. It proposes an innovative Sustainable Development Proposition (SDP) decision-making tool based on a propositional calculus that can be used to analyse the sustainability of an infrastructure investment. It draws on environmental sustainability governance data analysis enabling investors to understand the economic indicators, income potential, return on investment, demand and legal compliance, as well as community and social benefits. Identified risks, issues and advantages are managed and monitored, and the SDP guidance can be applied to improve the prospects of the project in order to attract investment. Sustainable Community Investment Indicators (SCIITM) have been developed to assist with attracting investment and monitoring feedback on infrastructure projects, designed by the author for remote rural and indigenous communities – in response to current industry tools that are designed for urban environments. The book includes a broad range of real-world and hypothetical case studies in agricultural and indigenous areas in South America, Europe, Africa, Asia, Australia and the Pacific. Taking a diverse economies approach, these industry tools can be adapted to allow for enterprise design with unique communities. This book provides sustainable development practitioners, including government agencies, financiers, developers, lawyers and engineers, with a positive, practical guide to addressing and overcoming global issues with local and community-based solutions and funding options.

The Interplay of States and Markets Apr 14 2022

Inside Intelligence Jun 04 2021

How to Give Financial Advice to Women: Attracting and Retaining High-Net Worth Female Clients Nov 16 2019 YOUR ONE-STOP HANDBOOK FOR CONNECTING WITH AFFLUENT FEMALE INVESTORS "How to Give Financial Advice to Women is full of specific and useful suggestions to help financial advisors serve female clients more effectively. A great addition to any financial planner's professional bookshelf." -- Rick Kahler, CFP, coauthor of *Conscious Finance* and *The Financial Wisdom of Ebenezer Scrooge* "Finally a comprehensive answer to Freud's famous question, 'What do women really want?'--at least when it comes to financial advice. . . . A must-read manual for financial advisors on how to work authentically and appreciatively with women." -- Eleanor Blayney, CFP, President, Directions for Women, CFP Board Consumer Advocate "How to Give Financial Advice to Women arrives perfectly timed for advisors seeking guidance with the changing landscape of modern financial management. Addressing the dramatic rise of women in business, investing, and wealth, Kathleen Kingsbury clearly articulates how advisors can and need to understand the perspectives of female clients. Every advisor should read this book and learn these skills." -- Jim Grubman, PhD, FamilyWealth Consulting About the Book: During the next several decades, women will inherit approximately \$28.7 trillion in assets and will need good financial guidance to manage their increasing wealth. The problem is that two-thirds of women don't trust financial advisors. Even if you are the best at what you do, a female client will pass you over if you can't effectively communicate and establish a trusting relationship with her. How to Give Financial Advice to Women is your one-stop handbook for connecting with affluent female investors. Written by a wealth psychology expert with over 20 years of experience coaching women, this practical book helps you understand the wants and needs of affluent female clients and shows you how to appeal to this group of loyal investors. First, it breaks down the psychological fundamentals of women and wealth, and then it outlines the skill set you need to effectively communicate and advise affluent women. With the help of concrete action steps, in no time at all you will: Refine your advising style to appeal to women Be sensitive to the realities of affluent women's lives Meet the unique needs of women in a variety of life transitions Connect with women both as individuals and as part of couples Build trust, actively listen, and foster financial confidence Help women prepare their children to receive wealth Whether you are a male or female advisor, How to Give Financial Advice to Women shows you how the industry has historically made women feel misunderstood and undervalued and gives you everything you need to buck the trend and capitalize on being female friendly. This complete guide even comes with valuable marketing dos and don'ts to ensure you attract the right clients in the most cost-effective way. How to Give Financial Advice to Women tells you what every wealthy woman wants her financial advisor to know.

Building an Entrepreneurial and Sustainable Society Dec 18 2019 As the global economy continues to evolve, the idea of sustainability has become a prevalent area of concentration. Businesses are searching for more environmentally and socially conscious practices as the market distances itself from the industrial age. Implementing sustainable initiatives starts with entrepreneurs, as these individuals are the foundation for creating and building profitable societies. Understanding the practice of sustainable entrepreneurship is pivotal in predicting future trends in business and the economy. Building an Entrepreneurial and Sustainable Society provides emerging research exploring the theoretical and practical aspects of sustainability within entrepreneurship and its applications in modern socioeconomics. Featuring coverage on a broad range of topics such as public policies, internationalization, and social innovation, this book is ideally designed for entrepreneurs, business specialists, professionals, researchers, managers, economists, educators, scholars, and students seeking current research on the evolution of sustainable entrepreneurship and its contextual factors.

Attracting High Technology Investment Jul 17 2022 This paper examines Intel Corporation's \$300 million semiconductor assembly and testing plant in Costa Rica. It discusses various ways in which countries can gradually improve their climate for foreign investment and the design of their investment promotion strategies.

The Future of Electricity Oct 20 2022

Unlocking Africa's Business Potential Sep 19 2022 Africa welcomes business investment and offers some of the world's highest returns and impacts Africa has tremendous economic potential and offers rewarding opportunities for global businesses looking for new markets and long-term investments with favorable returns. Africa has been one of the world's fastest-growing

regions over the past decade, and by 2030 will be home to nearly 1.7 billion people and an estimated \$6.7 trillion worth of consumer and business spending. Increased political stability in recent years and improving regional integration are making market access easier, and business expansion will generate jobs for women and youth, who represent the vast majority of the population. Current economic growth and poverty-alleviation efforts mean that more than 43 percent of the continent's people will reach middle- or upper-class status by 2030. *Unlocking Africa's Business Potential* examines business opportunities in the eight sectors with the highest potential returns on private investment—the same sectors that will foster economic growth and diversification, job creation, and improved general welfare. These sectors include: consumer markets, agriculture and agriprocessing, information and communication technology, manufacturing, oil and gas, tourism, banking, and infrastructure and construction. The book's analysis of these sectors is based on case studies that identify specific opportunities for investment and growth, along with long-term market projections to inform decision-making. The book identifies potential risks to business and offers mitigation strategies. It also provides policymakers with solutions to attract new business investments, including how to remove barriers to business and accelerate development of the private sector.

Partners or Creditors? Attracting Foreign Investment and Productive Development to Central America and Dominican Republic Oct 28 2020 Promotion of foreign direct investment (FDI) has been a priority policy goal in Central America, Panama and Dominican Republic for the past twenty years. Fiscal benefits are among the policies that have been used to attract it. At first sight the model followed has been fruitful. In 2013 the eight countries of the region succeeded in attracting US\$ 12.7 billion, the highest level of FDI in their history. But there are question marks about how FDI will perform in future and what the incentives to promote it should be now that World Trade Organization rules on the instruments used to promote FDI in the region have changed. The present book analyzes this situation in depth. Firstly, it reviews the importance of FDI in the region as a source of financing for the external deficit. Then it reviews the findings of international economic research on the impact of FDI on growth and the factors that attract it. It highlights that far from being assured, the benefits of FDI depend on complementary factors which are often not present in the region. Subsequently the book analyzes the international evolution of FDI and the growing importance of multinationals of Latin origin. It then tackles the controversial question of the efficacy of fiscal incentives as a means to attract investment, following an innovative technical approach based on firm level data which questions whether the free zones have had a net positive impact on development. This analysis is complemented by a study of investment promotion policies, which focuses particularly on the Investment Promotion Agencies. Finally, the book outlines the prospects for FDI attraction now the sun has set on strategies based on providing fiscal incentives. It argues that a new strategy should be based on the creation of new skills and capacities through instruments designed to complement productive development policies and thereby generate positive spillovers in the economy.

OECD Health Policy Studies Who Cares? Attracting and Retaining Care Workers for the Elderly Mar 01 2021 This report presents the most up-to-date and comprehensive cross-country assessment of long-term care (LTC) workers, the tasks they perform and the policies to address shortages in OECD countries. It highlights the importance of improving working conditions in the sector and making care work more attractive and shows that there is space to increase productivity by enhancing the use of technology, providing a better use of skills and investing in prevention.

Marketing Places Europe Dec 22 2022 Aimed at tourism agencies, students of tourism and local government agencies, this book explains how to adopt a strategic marketing plan that will enable places to adapt and conquer the ever-evolving world marketplace.

World Investment Report 2018 Nov 28 2020 This report presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases. It provides an overview of industrial policy models for countries at different development levels and the role of investment policies within each model. It analyses the investment policy implications of the new industrial revolution for high-, middle- and low-income countries and offers a toolkit for investment policymakers on how to use investment policies for new industrial development strategies.

Marketing Places Feb 24 2023 Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic

development in the 1990s and beyond.

Financial Blogging Mar 21 2020 "Blogging has become a "must" for many independent and fee-only financial advisors. It's a great way to build your business by connecting with current and potential clients as well as referral sources. Blogging attracts prospects to your website, media attention, and speaking engagements ... This book will help you conquer the challenge of producing high quality blog posts by following a step-by-step process, including how to: generate and refine ideas for blog posts that will engage your readers; organize your thoughts before you write so you can write more quickly and effectively; edit your writing so it's reader-friendly and appealing; spread the word about your blog and attract more visitors"--Page [4] of cover.

Strategic Place Branding Methodologies and Theory for Tourist Attraction Jan 31 2021 Drawing the attention of tourists to different destinations around the world assists in the overall economic health of the targeted region by increasing revenue and attracting investment opportunities, as well as increasing cultural awareness of the area's population. Strategic Branding Methodologies and Theory for Tourist Attraction investigates international perspectives and promotional strategies in the topic area of place branding. Highlighting theoretical concepts and marketing techniques being utilized in the endorsement of various destinations, regions, and cities around the world, this publication is a pivotal reference source for researchers, practitioners, policy makers, students, and professionals.

The Regulation of the Power Sector in Africa Aug 18 2022 Attracting private investment and delivery of services to the poor majority are priority goals for reforming and regulating the power sector in Sub-Saharan Africa. The licensing process and the tariff regime are important determinants of new investment in the electricity industry. For the licensing process to attract private investors, the procedures must be clear and must function efficiently and transparently, while the tariff regime must reflect actual costs. This book examines the extent to which the twin goals of attracting investment and providing energy to the poor are addressed by the existing legal and regulatory framework. By studying six countries in the east and southern African region, some helpful lessons worth sharing with other African countries are learned.
