*Laurie Pippen's All Natural Antibacterial Agents
May 11 2022 The classification antibacterial includes anything that destroys bacteria or inhibits the ability of bacteria to grow and reproduce. Herbs approach bacterial infection from two directions. They stimulate the immune system to produce more immune cells aiding your body's ability to fight the infection and they act in direct opposition to bacteria by inhibiting their ability to grow and reproduce so they cannot survive. The first line of defense against bacterial infection is prevention. Disinfecting surfaces with known antibacterial cleaners, maintaining good health through diet, rest, and exercise, and minimizing exposure to infectious agents is far more effective than any treatment plan in the continued battle against bacteria. Regardless of the preventative care you take, there are always times where treating an infection will be necessary. Traditionally, bacterial infection is fought by blending herbs that support the body's own natural defenses with those that act to inhibit and kill the bacteria. Using a*

combination that blends both actions helps to minimize the duration and severity of any infection. Many herbs and oils act as natural immunostimulant and antibacterial agents. Some of these natural products work as well as or even better than the products sold in your local pharmacy. Some of the items in your local pharmacy are even created based on the chemical constituents of plants you might have growing in your own yard. This guide contains antibacterial agents that act as both disinfectants for infected air and surfaces and disease fighting agents for the body. Both categories eliminate harmful bacteria. It is important that you read the traditional uses and side effects of each plant and discuss any alternative treatment with a qualified herbalist or physician prior to choosing a natural product.

Healing Lyme Disease Naturally Jan 19 2023 In Healing Lyme Disease Naturally, anthropologist Wolf D. Storl shares his own success in overcoming a difficult, sometimes deadly disease that is reaching epidemic proportions. When he was diagnosed, Dr. Storl refused standard treatments because of antibiotic intolerance. Instead, he researched healing systems of various cultures including Traditional Chinese Medicine, American Indian healing practices, homeopathy, and traditional Western herbal lore and discovered the teasel root. Teasel, a flowering plant that grows throughout Europe and Asia, tonifies the liver and kidneys, promotes blood circulation, and strengthens the bones and tendons. The plant has been documented to help cure chronic conditions marked by arthritis, sore, stiff muscles, and eventual incapacitation—all symptoms associated with Lyme disease. Dr. Storl's approach consists of flushing out toxins and inhibiting bacteria by using teasel root as tincture, powder, or tea (available for purchase

online and in natural foods stores); stimulating the immune system and detoxifying the body by exposing it to extreme heat (sweat lodges and Japanese baths); and dietary and naturopathic measures, including fresh natural food, exercise, and sufficient sleep. Written in an encouraging, personal tone but based in science and clinical studies, Healing Lyme Disease Naturally offers hope in combating a condition that has stubbornly resisted conventional medical treatment. When Antibiotics Fail Feb 20 2023 WHY RIFE MACHINES? Lyme Disease is caused by Borrelia Burgdorferi, a spirochete bacteria similar to the bacteria that causes Syphilis . Lyme Disease is known as the "Great Imitator" - It can masquerade as Attention Deficit Disorder , Chronic Fatigue Syndrome , Fibromyalgia,

Obsessive Compulsive Disorder , Alzheimer's Disease , Schizophrenia , Depression , Multiple Sclerosis , arthritis , heart conditions, and more. The July, 2004 issue of Townsend Letter for Doctors and Patients indicates that Lyme Disease is thought to be the fastest spreading infectious disease in the world, with more than 200,000 new cases per year in the United States alone. Lyme Disease tests are notoriously inaccurate, leading to rampant under-diagnosis of the disease (See Appendix A). But even the people who are lucky enough to receive an accurate diagnosis do not always respond to antibiotic therapy. Aggressive antibiotic therapy, applied by a Lyme Literate Medical Doctor (LLMD), sometimes fails to provide a cure. Many patients take antibiotics for years, often in combinations of two or three drugs simultaneously - yet in some cases the infection becomes chronic anyway, and numerous Lyme Disease sufferers end up staying sick, losing their jobs, getting dropped by insurance companies, going broke, and losing hope. These monumentally discouraging obstacles facing Lyme Disease sufferers have led many of them to explore the rife machine treatment option, a promising electromagnetic therapy which often works after antibiotics fail.

Is Your Cardiologist Killing You? May 19 2020

Natural Treatments for Lyme Coinfections Mar 29 2021 A guide to the natural treatment of three coinfections of Lyme disease • Reviews the latest scientific research on Babesia, Ehrlichia, and Anaplasma • Reveals how these three conditions often go undiagnosed, complicate the treatment

of Lyme disease, and cause symptoms from headache to seizures • Outlines effective natural treatments with herbs and supplements for specific symptoms and to combat overreactions of the immune system and the inflammation response Harvard researchers estimate there are nearly 250,000 new Lyme disease infections each year--only 10 percent of which will be accurately diagnosed. One of the largest factors in misdiagnosis of Lyme is the presence of other tick-borne infections, which mask or aggravate the symptoms of Lyme disease as well as complicate treatment. Three newly emergent Lyme coinfections are Babesia, Ehrlichia, and Anaplasma. Tens of thousands of people are known to be asymptotically infected and at least ten percent will become symptomatic this year--with symptoms ranging from chronic headache and arthritis to seizures. Distilling the latest scientific research on Babesia, Ehrlichia, Anaplasma, and Lyme disease, Stephen Buhner examines the complex synergy between these infections and reveals how they can go undiagnosed or resurface after antibiotic treatment. He explains how these organisms create cytokine cascades in the body--essentially sending the immune system into an overblown,

uncontrolled inflammatory response in much the same way rheumatoid arthritis or cancer can. Providing an in-depth guide for those suffering from Babesia, Ehrlichia, or Anaplasma infection as well as for clinicians who work with those infected by these organisms, Buhner details effective natural holistic methods centered on herbs and supplements, such as Ashwaganda and Chinese Skullcap, and reveals how to treat specific symptoms, interrupt the cytokine cascades, reduce inflammation, and bring the immune system back into balance. He explains how these natural methods not only complement conventional Lyme disease treatments involving antibiotics and other pharmaceuticals but also provide relief when other forms of treatment have failed.

Conquering Lyme Disease Jan 15 2020 With more than 300,000 cases diagnosed each year, Lyme disease is the most common tick-borne illness in the United States. However, doctors are deeply divided on how to diagnose and treat it, leading to the controversy known as the “Lyme Wars.” Firmly entrenched camps have emerged, causing physicians, patient communities, and insurance companies to be pitted against one another in a struggle to define Lyme disease and its clinical challenges. Health-care providers may not be aware of Lyme’s diverse manifestations or the limitations of diagnostic tests. Meanwhile, patients have, on the one hand, felt dismissed by their doctors and, on the other hand, frightened and confused by the conflicting opinions and dubious self-help information found online. In this authoritative book, the Columbia University Medical Center physicians Brian Fallon and Jennifer Sotsky explain that there is much cause for optimism. The past decade’s advances in precision medicine and biotechnology are reshaping our understanding of Lyme disease and

accelerating the discovery of new tools to diagnose and treat it, such that the great divide previously separating medical communities is now being bridged. Drawing on both extensive clinical experience and cutting-edge research, Fallon, Sotsky, and their colleagues present these paradigm-shifting breakthroughs. They clearly explain the immunologic, infectious, and neurologic basis of chronic symptoms and their cognitive and psychological impact, as well as current and emerging diagnostic tests, treatments, and prevention strategies. Written for the educated individual seeking to learn more, Conquering Lyme Disease gives an up-to-the-minute overview of the science that is essential for both patients and practitioners. It argues forcefully that the expanding plague of Lyme and other tick-borne diseases can be confronted successfully and may soon even be reversed.

Laurie Phippen's All Natural Antiviral Agents Jun 12 2022 The classification antiviral includes anything that destroys viruses or inhibits their ability to grow and reproduce. Herbals approach viral infection from two directions. They stimulate the immune system to produce more immune cells aiding your body's ability to fight the infection and they act in direct opposition to viruses by inhibiting their ability to grow and reproduce so they cannot survive. The first line of defense against viral infection is prevention . Disinfecting surfaces with known antiviral cleaners, maintaining good health through diet, rest, and exercise and minimizing exposure to infectious agents is far more effective than any treatment plan in the continued battle against viruses. Regardless of the preventative care you take, there are always times where treating an infection will be necessary. Traditionally, viral infection is fought by blending herbals that support the body's own natural defenses with those that act to kill the virus. Using a

combination that blends both actions helps to minimize the duration and severity of any infection. Many herbs and oils act as natural immunostimulant and antiviral agents. Some of these natural products work as well as or even better than the products sold in your local pharmacy. Some of the items in your local pharmacy are even created based on the chemical constituents of plants you might have growing in your own yard. This guide contains antiviral agents that act as both disinfectants for infected air and surfaces and disease fighting agents for the body. Both categories eliminate harmful viruses. It is important that you read the traditional uses and side effects of each plant and discuss any alternative treatment with a qualified herbalist or physician prior to choosing a natural product.
