*Focus Groups* Jun 23 2020 `I read this book in a single sitting. It is written in an enthusiastic, helpful and clear style that held my attention, and made me want to read what came next. I shall read it again in a single sitting - probably more than once. For it offers common-sense advice about planning and running focus groups which I will want to revisit' - British Journal of Education Technology The Third Edition of the `standard' for learning how to conduct a focus group contains: a new chapter comparing and contrasting market research, academic, nonprofit and participatory approaches to focus group research; expanded descriptions on how to plan focus group studies and do the analysis, including step-by-step procedures; examples of questions that ask participants to do more than just discuss, and suggestions on how to answer questions about your focus group research.

*An American Sickness* Jun 04 2021 A New York Times bestseller/Washington Post Notable Book of 2017/NPR Best Books of 2017/Wall Street Journal Best Books of 2017 "This book will serve as the definitive guide to the past and future of health care in America."—Siddhartha Mukherjee, Pulitzer Prize-winning author of *The Emperor of All Maladies* and *The Gene* At a moment of drastic political upheaval, *An American Sickness* is a shocking investigation into our dysfunctional healthcare system - and offers practical solutions to its myriad problems. In these troubled times, perhaps no institution has unraveled more quickly and more completely than American medicine. In only a few decades, the medical system has been overrun by organizations seeking to exploit for profit the trust that vulnerable and sick Americans place in their healthcare. Our politicians have proven themselves either unwilling or incapable of reining in the increasingly outrageous costs faced by patients, and market-based solutions only seem to funnel larger and larger sums of our money into the hands of corporations. Impossibly high insurance premiums and inexplicably large bills have become facts of life; fatalism has set in. Very quickly Americans have been made to accept paying more for less. How did things get so bad so fast? Breaking down this monolithic business into the individual industries—the hospitals, doctors, insurance companies, and drug manufacturers—that together constitute our healthcare system, Rosenthal exposes the recent evolution of American medicine as never before. How did healthcare, the caring endeavor, become healthcare, the highly profitable industry? Hospital systems, which are managed by business executives, behave like predatory lenders, hounding patients and seizing their homes. Research charities are in bed with big pharmaceutical companies, which surreptitiously profit from the donations made by working people. Patients receive bills in code, from entrepreneurial doctors they never even saw. The system is in tatters, but we can fight back. Dr. Elisabeth Rosenthal doesn't just explain the symptoms, she diagnoses and treats

the disease itself. In clear and practical terms, she spells out exactly how to decode medical doublespeak, avoid the pitfalls of the pharmaceuticals racket, and get the care you and your family deserve. She takes you inside the doctor-patient relationship and to hospital C-suites, explaining step-by-step the workings of a system badly lacking transparency. This is about what we can do, as individual patients, both to navigate the maze that is American healthcare and also to demand far-reaching reform. *An American Sickness* is the frontline defense against a healthcare system that no longer has our well-being at heart.

**1989 California Dietary Practices Survey Focus on Fruits and Vegetables** Feb 18 2020 *Focus on Life Science California* Sep 19 2022 Provides many approaches to help students learn science: direct instruction from the teacher, textbooks and supplementary materials for reading, and laboratory investigations and experiments to perform. It also provides for the regular teaching and practice of reading and vocabulary skills students need to use a science textbook successfully.

*Focus on Earth Science: California, Grade 6* Aug 18 2022

*CPO Focus on Physical Science* Jul 05 2021 *Focus on California Physical Science* Nov 09 2021

*Supplemental Guide for Studies In Environmental Management and Safety: A California Focus* May 15 2022 The supplemental guide for environmental management and safety focuses on California regulations in the areas of hazardous waste and materials, general industry standards, and includes regulations on construction safety. The book offers a concise manner of presenting the regulations deemed important for the student and entering professional. In addition to regulations, the book offers an overview of the importance of sustainability, and highlights recycling and other efforts being used to improve sustainability efforts. Thought questions are presented to the reader in order to enhance critical thinking. "I wish I would have had a guide like this when I was starting out in the environmental industry." —Tim Felton, Industrial Hygienist Port of San Francisco

**An Analysis of Common Core Implementation in High Schools in a Northern California School District** Nov 28 2020 Adoption of the Common Core State Standards in California and across the nation marks an ambitious plan to overhaul the country's educational standards in favor of new more rigorous standards, which has changed the way teachers approach both curriculum and instruction. California's State Board of Education adopted a gradual implementation plan that phased in the different components of Common Core State Standards in an effort to make the transition more manageable for districts and schools. This thesis focuses at the school level and shares a unique view of the

experience of educators and staff at two schools in a high school district in Northern California implementing Common Core State Standards. In this thesis, I used structured interviews with educators as my primary source of data and interviewed six staff members at the school district office and nine individuals at each high school consisting of administrators and teachers of English, mathematics, and science. From the literature, I developed a comprehensive analytical framework that focuses on a bottom-up approach and aligns with the large degree of local discretion that exists in public education. I then selected five variables to analyze the data: collaboration, communication, teacher buy-in, applying technology, and professional development. I found that the educators that were interviewed reported that they are optimistic about the long-term benefits of Common Core but are worried about the more immediate challenges of implementation. Educators and staff perceive time and capacity to be the biggest constraint to success because of the huge workload required to provide training for teachers and develop new curriculum. Teachers reported that they think the best tool they received to help them address the challenges of Common Core implementation was their Teachers On Special Assignment counterparts (TOSAs). TOSAs provided intensive support and guidance to each team of teachers to help the teams stay on top of trainings, curriculum design, and new student assessments. Additionally, stakeholders should note that Science teachers voiced additional concerns around a lack of support, guidance, and to understand and integrate both Common Core and NGSS standards concurrently. California's educational stakeholders would benefit from further research on the opportunities discovered in this thesis around 1) aligning Professional Learning Communities (PLCs) across subject areas 2) investing in TOSAs to provide support and guidance to teacher teams 3) focusing on digital fluency for students to meet the increased use and focus on technology. *Focus on California Physical Science* Feb 24 2023

**California Burning** Aug 26 2020 A revelatory, urgent narrative with national implications, exploring the decline of California's largest utility company that led to countless wildfires — including the one that destroyed the town of Paradise - and the human cost of infrastructure failure Pacific Gas and Electric was a legacy company built by innovators and visionaries, establishing California as a desirable home and economic powerhouse. In *California Burning*, Wall Street Journal reporter and Pulitzer finalist Katherine Blunt examines how that legacy fell apart—unraveling a long history of deadly failures in which Pacific Gas and Electric endangered millions of Northern Californians, through criminal neglect of its infrastructure. As PG&E prioritized profits and politics, power lines went unchecked—until a rusted hook purchased for 56 cents in 1921

split in two, sparking the deadliest wildfire in California history. Beginning with PG&E's public reckoning after the Paradise fire, Blunt chronicles the evolution of PG&E's shareholder base, from innovators who built some of California's first long-distance power lines to aggressive investors keen on reaping dividends. Following key players through pivotal decisions and legal battles, *California Burning* reveals the forces that shaped the plight of PG&E: deregulation and market-gaming led by Enron Corp., an unyielding push for renewable energy, and a swift increase in wildfire risk throughout the West, while regulators and lawmakers pushed their own agendas. *California Burning* is a deeply reported, character-driven narrative, the story of a disaster expanding into a much bigger exploration of accountability. It's an American tragedy that serves as a cautionary tale for utilities across the nation—especially as climate change makes aging infrastructure more vulnerable, with potentially fatal consequences. [Cumulative List of Organizations Described in Section 170 \(c\) of the Internal Revenue Code of 1954](#) Sep 26 2020

*Focus on Middle School Chemistry Student Textbook (Softcover)* Oct 28 2020 The Focus On Middle School Chemistry Student Textbook provides young students with a solid foundation in the concepts of the scientific discipline of chemistry. Students will learn about atoms, how atoms bond to form molecules, types of bonds, chemical reactions, acids and bases, pH, mixtures and how they can be separated, energy molecules in food, polymers and their characteristics, DNA, proteins, and more. The Focus On Middle School Chemistry Student Textbook has 10 full-color chapters. Grades 5-8. [Focus on Physical Science](#) Feb 12 2022

**1995 California Dietary Practices Survey** May 23 2020 This report provides a comprehensive view of dietary and physical practices among California adults. It documents that lower income Californians have a low awareness of diet/disease relationships, of protective foods, and of the daily habits that families need for good health. The information obtained from this report will be used as a basis for the California Nutrition Network for Healthy, Active Families campaign, which is designed to promote healthy eating and physical activity among California families.

**California Rising** Jul 25 2020 "Edmund G. (Pat) Brown has long been considered one of the two or three most effective governors of California. Thanks to this exhaustively researched and vividly written study by Ethan Rarick, we can now grasp the true strength and charisma of this extraordinary governor and the highpoint of public value and performance he orchestrated in the creation of contemporary California. A seasoned reporter, Rarick left everything behind to research and write this book. He made the right decision."—Kevin Starr, University Professor of History, University of Southern California "This is an impressive and important work—exhaustively researched, elegantly written. It's not only the biography of the central figure in modern California history, Governor Pat Brown, but the

story of a crucial era in California and its place in the nation's imagination. *California Rising* is a major document in our understanding of the man and the place he helped make."—Peter Schrag, former editorial page editor of the *Sacramento Bee* and author of *Paradise Lost: California's Experience, America's Future* "Ethan Rarick has written a shrewd and lively account of the life of Pat Brown, California's most constructive governor in the last half-century. What a pleasant way to learn about the history of the golden state during the key period in which state government was confronted with the economic and social challenges of rapid modernization. A very impressive book."—Nelson W. Polsby, Heller Professor of Political Science, University of California, Berkeley "An important and enjoyable book."—Bruce Cain, coeditor of *Voting at the Political Fault Line* "Ethan Rarick's narrative of the life of Pat Brown is a fascinating look at the maturation of a political animal. We follow closely as Brown gladdens his way up California's political ladder and becomes his state's most progressive governor. In this meticulous study, Rarick fleshes out Brown's battles with Richard Nixon and Ronald Reagan throughout the 1960s. *California Rising* profits from Rarick's broad understanding of California and his constructive use of Brown's personal notes and correspondence."—Douglas Brinkley, author of *Tour of Duty: John Kerry and the Vietnam War*

**Drawdown** Mar 21 2020 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world. **Community Property in California** Mar 01 2021 Written by a recognized expert on community property and family law issues in California, Grace Ganz Blumberg's comprehensive casebook prepares students for the California bar examination and equips them for California practice in the areas of divorce, decedents' estates, and debtor-creditor law. *Community Property in California* carefully balances cases, notes, questions, and problems for student comprehension. Because community property is a relatively narrow subject involving the interplay of state legislation and case law, the casebook is structured to encourage students to develop and refine their analytic skills and to enable professors to guide their students in doing so. Comparative text puts California law into context by including references to sister-state law, the Uniform

Marital Property Act and the marital property chapter of the American Law Institute's Principles of the Law of Family Dissolution. New to the 8th Edition: The California Supreme Court's 2020 decision, *In re Brace*, which upended almost a century of community property law, leaving many unresolved questions in its wake. Critical notes on the origins and subsequent development of the *Pereira/Van Camp* business apportionment doctrine. Further treatment of the Family Code section 4 rule requiring that current family law be applied to events occurring before its effective date, with particular attention to the enforceability of premarital agreements entered under prior law. Professors and students will benefit from: Problems and questions for stimulating class discussion Thorough preparation for the community property essay question on the California bar examination A casebook that students enjoy reading A focus on enhanced lawyering skills, with emphasis on problem solving

**Second to None** May 03 2021 A vision of the new California high school is presented in this document, which outlines the principles of school reform. The key to successful

restructuring lies in developing a comprehensive reform statement based on the following components: creating curricular paths to success; developing powerful teaching and learning; establishing a comprehensive accountability and assessment system; providing comprehensive support for all students, including language-minority students and those at risk of failure; restructuring the school; and creating new professional roles. Each of the components is detailed in individual chapters. Recommendations are made to generate investment and to develop new attitudes that focus on student learning outcomes. Information about the California High School Task Force is included. (Contains 68 references.) (LMI)
