Concepts of Biology 3e recognizes the value of the traditional approach while still engaging students in the excitement of relevancy to themselves and the world around them. The text abounds with analogies and engaging illustrations as it proceeds from an examination of chemistry to the biosphere. A significant new feature of this edition is the integration of media asset into the chapter content. Virtually every section of the textbook is now linked to MP3 files, 3D and 2D animations of biological processes, and National Geographic and ScienCentral videos. In addition, McGraw-Hill offers a full suite of adaptive learning tools including LearnSmart, LearnSmart Labs, LearnSmart Prep, LearnSmart Achieve, and SmartBook, all designed to assess a student's existing knowledge base and adapt to particularly address deficiencies. Instructors consistently ask for a human biology textbook that helps students develop an understanding of the main themes of biology while placing the material in the context of the human body. Mader Human Biology was developed to fill this void. Organized around the main themes of biology, Human Biology guides students to think conceptually about biology and the world around them. Just as the levels of biological organization flow from one level to the next, themes and topics of Biology are tied to one another throughout the chapter, and between the chapters and parts through the concept of homeostasis. Combined with Dr. Mader's hallmark writing style, exceptional art program, and pedagogical framework, difficult concepts become easier to understand and visualize, allowing students to focus on understanding how the concepts are related. Multimedia Integration: Michael Windelspecht represents the new generation of digital authors. Through the integration of multimedia resources, such as videos, animations

and MP3 files, and in the design of a new series of interactive animations, Dr Windelspecht has worked to bring Dr. Mader's texts to the new generation of digital learners. A veteran of the online, hybrid, and traditional teaching environments, Dr. Windelspecht is well versed in the challenges facing today's students and educators. Dr. Windelspecht has also acted as the subject matter expert on all aspects of the Connect content being prepared for the Mader series of textbooks. The laboratory exercise in this manual are coordinated with *Human Biology*, a general biology text that covers the entire field of biology. The text emphasizes how we can apply biological knowledge to our own lives and to our relationships with other organisms. An introduction to key concepts in the field of biology, covering such topics as the cell, evolution, comparative animal biology, and behavioral ecology. The twelfth edition of Biology is a traditional, comprehensive introductory biology textbook, with coverage from Cell Structure and Function to the Conservation of Biodiversity. The book, which centers on the evolution and diversity of organisms, is appropriate for any one- or two-semester biology course. Biology, 12th Edition is the epitome of Sylvia Mader's expertise. Its concise, precise writing-style employs lucid language to present the material as succinctly as possible, enabling students—even non-majors—to master the foundational concepts before coming to class. “Before You Begin”, “Following the Themes”, and “Thematic Feature Readings” piece together the three major themes of the text—evolution, nature of science, and biological systems. Students are consistently engaged in these themes, revealing the interconnectedness of the major topics in biology. Sylvia Mader typifies an icon of science education. Her dedication to her students, coupled with her clear, concise writing-style has benefited the education of thousands of students over the past three decades. The integration of the text and digital world has been achieved with the addition of Dr. Michael Windelspecht’s facility for the development of digital learning assets. For over ten years, Michael served as the Introductory Biology Coordinator at Appalachian State University—a program that enrolls over 4,500 non-science majors annually. Michael is the lead architect in the design of McGraw-Hill's Connect Plus and LearnSmart media content for the Mader series. These assets allow instructors to easily design interactive tutorial materials, enhance presentations in both online and traditional environments, and assess the learning objectives and

outcomes of the course.
