Press 2 for broken hearts. Press 3 if your life has totally crashed. . . . Six friends work nights at a call center in India, providing technical support for a major U.S. appliance corporation. Skilled in patience—and accent management—they help American consumers keep their lives running. Yet behind the headsets, everybody's heart is on the line. Shyam (Sam to his callers) has lost his self-confidence after being dumped by the girl who just so happens to be sitting next to him. Priyanka's domineering mother has arranged for her daughter's upscale marriage to an Indian man in Seattle. Esha longs to be a model but discovers it's a horizontal romp to the runway. Lost, dissatisfied Vroom has high ideals, but compromises them by talking on the phone to idiots each night. Traditional Radhika has just found out that her husband is sleeping with his secretary. And Military Uncle (nobody knows his real name) sits alone working the online chat. They all try to make it through their shifts—and maintain their sanity—under the eagle eye of a boss whose ego rivals his incompetence. But tonight is no ordinary night. Tonight is Thanksgiving in America: Appliances are going haywire, and the phones are ringing off their hooks. Then one call, from one very special caller, changes everything. Chetan Bhagat's delicious romantic comedy takes us inside the world of the international call center, where cultural cross-wires come together with perfect pathos, hilarity, and spice. "This is the 'must have' book for programming with Outlook and CDO. This book provides the details, tips, and cautions that can save you time and frustration when building collaborative applications. So if you like 'the best' in your technical library, get this book." --Deborah Kurata, InStep Technologies, Inc. Written for IT developers who build collaborative and workflow applications, this book provides a comprehensive reference to working with Microsoft's powerful collaborative development environment, including Outlook 2000, Exchange Server, Visual Basic, and the Collaboration Data Objects (CDO) Library. It demonstrates ways in which these technologies can be tied together into effective business solutions--from small-scale groupware to large-scale enterprise-wide systems. Developing Applications using Outlook 2000, CDO, Exchange, and Visual Basic offers an overview of the Microsoft collaborative landscape, and then examines each element of that environment in detail. Numerous examples showcase the applications made possible with these technologies and demonstrate VBScript coding techniques. You will find in-depth information on such important topics as: properties, methods, and events available in Outlook 97, 98, and 2000 the Outlook 2000 object model working with Outlook 2000 mail, calendar,*

A complete theory of measurement from the principles of establishing the reality images to measurement procedures is presented in this book. A precise mathematical model of errors is presented with the*

*use of various applications to interpret measurement results. Axioms are formulated which provide a deduction theory of measurement. The variety of problems addressed by modern science results in a diversity of models of physical and metrological phenomena, and leads to the view that there is not now, and may never be, a uniform theory of measurement. There is a need, however, to establish a foundation common to all measurements and studies, and this is the author's main aim allied to attempts to create a universal theory of measurement. The purpose of measurement is discussed. Many practical examples illustrating the methodology of modelling, calibration and the analysis of the results of measurement are reviewed. The book is designed for physicists, analytical and physical chemists and engineers involved with the work of metrology. A knowledge of physics, probability and statistics and the principles of metrology is a prerequisite for understanding this work.*
