Forensic accounting is a growing area of practice in which the knowledge, skills and abilities of advanced accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial

audits--an extra quality control step in the auditing process that will help reduce financial statement fraud. CCH's Forensic and Investigative Accounting (9th Edition) is a complete and readily teachable text on today's most timely accounting topics. Written by three top accounting and forensic teachers, this text covers all the important underpinnings, as well as the substance of forensic accounting. It covers both litigation support and investigative accounting, examining the practical aspects of these two areas, as well as many of the newer technological areas. Presents complex materials in a clear and understandable manner. Incorporating the latest accounting standards and presenting the most up-to-date accounting theory from the top academic journals in accounting and finance throughout the world. Accounting: An Introduction to Principles and Practice, 9e is aligned to FNS30315 Certificate III in Accounts Administration. The content is organised around the assessment requirements for each unit of competency, supporting compliance with the VET Quality Framework and the Financial Services Training Package. The student-friendly text includes diagrams to demonstrate electronic forms of documentation and transfer of funds. The importance of thorough authorisation and checking procedures to verify the accuracy and authenticity of a transaction is also incorporated in diagrams and throughout the chapter. Accompanying the text is a collection of resources to support both lecturers and students which can be found at www.pearsoned.co.uk/wood - For instructors : Solution's manual, and Powerpoint slides - For students : Opportunities to practise and additional support with our companion website Libby/Libby/Hodge wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Hodge successfully implements a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Libby/Libby/Hodge believes in the building-block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter, bombarding a student early in the course with an overload of new

concepts and terms. The authors believe that most faculty take more time with the accounting cycle, but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery, this building-block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries. Accounting and Finance for Non-Specialists, Ninth Edition Peter Atrill & Eddie McLaney Attractive, compact and informative book Chris Grover, University of Winchester Written in a fluent and readable style and supplemented by numerous real world examples, Accounting and Finance for Non-Specialists is pretty unique in the field. Navjot Sandhu, Birmingham City University This market-leading text offers an accessible, effective introduction to key accounting and finance topics. With a focus on decision-making, Accounting and Finance for Non-Specialists also teaches you how to apply your learning to real-world business scenarios. The 9th edition retains the popular real world examples, progress checks, activities and exercises, and updates the coverage using an informal and engaging narrative. Key Features *Up-to-date coverage, including the latest IFRSs *Accessible step-by-step approach helps you master the subject one step at a time *New real world examples provide opportunities to apply and develop techniques *New progress checks, activities and exercises reinforce learning *Focus on decision-making prepares you for careers in business. With a comprehensive and accessible introduction to the subject, Financial Accounting for Decision Makers focuses on the ways in which financial statements and information can be used to improve the quality of decision making. The practical emphasis throughout the book ensures the material is always relevant, whilst the authors' style of introducing topics gradually and explaining technical terminology in a clear, friendly style caters for all students, whether on specialist accounting or non-specialist business degrees. This successful textbook is highly regarded, especially in programs that want a solid, comprehensive text for students who sit for the CPA exam. The book is loosely organized into five sections which allow for flexibility in sequencing the topics. Many of the topics are illustrated by examples using a continuous case involving a fictitious company called Peerless Products Corporation and its subsidiary, Special Foods, Inc.
