Beast Jan 23 2023 Beast was the nickname of a shocking new race engine unveiled for the 1994 Indianapolis 500. The massive effort to design and build it in a seemingly impossible timeframe is still hailed as one of the most herculean efforts and well-kept secrets in the history of the Indy 500. In the award-winning book, Beast, bestselling author Jade Gurss chronicles the subterfuge and debunks the myths about this legendary power plant that persist twenty years on. Gurss interviewed key players involved in the race to uncover the story of how this engine powered the Penske PC23 chassis to one of the most talked-about Indy 500 races in history. The British race-engine experts at Ilmor Engineering offer detail about the design and manufacture of the engine. Roger Penske's team reveals how the engine and car were tested and developed, and how Mercedes came to be involved in the project. The story unfolds as Roger Penske and Mario Illien and Paul Morgan of Ilmor play every card they possess to create an incredible race engine--even rare World War II fighter planes and supersonic jets roar into the heart of this high-tech tale. Drivers Al Unser Jr. of the United States and Paul Tracy of Canada provide details on the tense weeks leading up to race day. The book reaches a suspenseful climax at 240 miles per hour at the Indy 500 no one can forget. Wrapped up in the drama and intrigue are real business and motivational lessons which made Roger Penske one of the most successful businessmen in the world and that helped Ilmor and its cofounders, Mario Illien and the late Paul Morgan, design and manufacture Indy car and Formula 1 championship-winning engines. Beast is not only a must-read for sports and race fans, but a compelling narrative for those who enjoy genuine lessons in business and technology or thrilling mysteries based on actual events.

This new book covers the complete story of the Volvo Amazon, from 1956 onwards, including full production histories, comprehensive specification details, and over 250 photographs. The book covers the history of Volvo before and after the Amazon, and development and production of all Amazon derivatives from 1956-1970, including the 121, 122S, 123GT and all of the estate editions. There are biographies of key Volvo personnel, including the company's first designer, Jan Wilsgaard. Also included is the Amazon in motorsport, plus driver biographies: Tom Trana, Sylvia Osterberg and Carl-Magnus Skogh. There is a full buying guide along with tips on tuning and modifying, including rally preparation, and an insight into what the press thought of each Amazon derivative, with pages also devoted to how the car was marketed in period. A Killer in the Street Jan 19 2020 It was a Tuesday night in November, 1962. Rain fell slow and steady in Manhattan, slanting hard on near-deserted sidewalks and streets pocked by the occasional twin circles of approaching headlamps. Taxis spawned out from Times Square like predatory bugs in search of new feeding grounds, and here and there a truck rolled heavily past sleeping skyscrapers where spotty clusters of bright windows indicated janitors were toiling late on nocturnal rounds. Nature had a conspiracy against

Kyle Walker. Tuesday was the night for his extension course at the university, and it had rained every Tuesday since the course began. Kyle Walker was 30, a civil engineer on the city payroll, and a man of ambition far above his present status. Tall, angular, a bit shaggy in his waterproof and fedora, he hunched awkwardly over the steering wheel of the eight-year-old sedan that was taking him home.

True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. The Numinous Legacy Dec 30 2020 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider that
