Mastering its use requires a specific skill set, however. Fortunately, portrait photography legend Tony Corbell is up to the task of showing readers how to harness its full power. He sets a foundation for mastering the use of strobes and continuous lighting sources (LEDs, tungsten lights, and fluorescent sources), creating effective lighting setups (with the aid of detailed, yet simple-to-understand diagrams), metering and adjusting the light, correcting color imbalances, softening harsh shadows, and more. He also introduces readers to the proper use of standard photographic modifiers — softboxes, umbrellas, octoboxes, beauty dishes, and other tools — so that they can sculpt their every portrait subject with incredibly flattering light. This book is filled with over 150 inspiring and instructive images from a true master of the craft. In these pages, readers will learn step-by-step instructions for mastering the many critical concepts one must understand to gain mastery over light. Armed with simple strategies for studio lighting, readers can repeatedly re-create Corbell's award-winning portrait lighting looks with their own clients. "This volume originates in the four unpublished Clark Lectures that Hollander delivered in 1999 at Trinity College, Cambridge. Then, one day Luke sees a girl's face in the window of a house where he knows two other children already live. Finally, he's met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to? "If Harry Potter smoked cigarettes and took a certain matter-of-fact pleasure in administering tough justice, he might like Max Frei." —Kirkus Reviews on *The Stranger* THE DOOR OF DARKNESS IS CAST OPEN—THE WORLD ADVANCES TO A NEW FIELD The specter of war hangs thick in the air of the Oriana Kingdom, where Princess Rose is expected to wed Duke Perv. This supposed marriage cannot and will not stand, though, as it would throw a major wrench in a certain shadowbroker's plans. Not one to miss an opportunity for sleuthing, Cid makes his way to the royal capital to put a stop to the ceremony, but are there even bigger schemes at work behind this unholy matrimony? According to the theory of relativity, we are constantly bathed in gravitational radiation. When stars explode or collide, a portion of their mass becomes energy that disturbs the very fabric of the space-time continuum like ripples in a pond. But proving the existence of these waves has been difficult; the cosmic shudders are so weak that only the most sensitive instruments can be expected to observe them directly. Fifteen times during the last thirty years scientists have claimed to have detected gravitational waves, but so far none of those claims have survived the scrutiny of the scientific community. *Gravity's Shadow* chronicles the forty-year effort to detect gravitational waves, while exploring the meaning of scientific knowledge and the nature of expertise. Gravitational wave detection involves recording the collisions, explosions, and trembling of stars and black holes by evaluating the smallest changes ever measured. Because gravitational waves are so faint, their detection will come not in an exuberant moment of discovery but through a chain of inference; for forty years, scientists have debated whether there is anything to detect and whether it has yet been detected. Sociologist Harry Collins has

been tracking the progress of this research since 1972, interviewing key scientists and delineating the social process of the science of gravitational waves. Engagingly written and authoritatively comprehensive, Gravity's Shadow explores the people, institutions, and government organizations involved in the detection of gravitational waves. This sociological history will prove essential not only to sociologists and historians of science but to scientists themselves. A story of love, lies and betrayal, Operation Menaka shows the other side of espionage, when a trusted aide becomes traitor.
