The Urgings of Conscience Jun 11 2022 While most philosophers who write about punishment ask, "Why may we punish the guilty?" Jacob Adler asks, "To what extent does a guilty person have a duty to submit to punishment?" He maintains that if we are to justify any system of punishment by the state, we must explain why persons guilty of an offense are morally bound to submit to punitive treatment, or to undertake it on their own. Using Rawls's theory of social contract as a framework, the author presents what he calls the rectification theory of punishment. After examining punishment from two points of view—that of the punisher and that of the offender who is to be punished—Adler proposes the Paradigm of the Conscientious Punishee: a repentant wrongdoer who views punishment as not necessarily unpleasant, but as something it is morally incumbent upon one to undertake. The author argues that this paradigm must play a central role in the theory of punishment. Citing community service projects and penances for sin (as required by some religions), Adler argues that punishment need not involve pain or any other disvalue. Instead he defines it in terms of its justificatory connection with wrongdoing: punishment is that which is justified by the prior commission of an offense and generally not justified without the prior commission of an offense. The rectification theory applies particularly to offenses involving basic liberties. It is based on the assumption that each person is guaranteed the right to an inviolable sphere of liberty. Someone who commits an offense has expanded his or her sphere by arrogating excess liberties. In order to maintain the equality on which this theory rests, an equivalent body of liberties must be given up. In discussing applications of the theory, Adler demonstrates that active service (as punishment) is more effective in safeguarding important rights and interests and maintaining the social contract than is afflictive punishment.

Conscience: The Origins of Moral Intuition Mar 08 2022 How do we determine right from wrong? Conscience illuminates the answer through science and philosophy. In her brilliant work *Touching a Nerve*, Patricia S. Churchland, the distinguished founder of neurophilosophy, drew from scientific research on the brain to understand its philosophical and ethical implications for identity, consciousness, free will, and memory. In *Conscience*, she explores how moral systems arise from our physical selves in combination with environmental demands. All social groups have ideals for behavior, even though ethics vary among different cultures and among individuals within each culture. In trying to understand why, Churchland brings together an understanding of the influences of nature and nurture. She looks to evolution to elucidate how, from birth, our brains are configured to form bonds, to cooperate, and to care. She shows how children grow up in society to learn, through repetition and rewards, the norms, values, and behavior that their parents embrace. Conscience delves into scientific studies, particularly the fascinating work on twins, to deepen our understanding of whether people have a predisposition to embrace specific ethical stands. Research on psychopaths illuminates the knowledge about those who abide by no moral system and the explanations science gives for these disturbing individuals. Churchland then turns to philosophy—that of Socrates, Aquinas, and contemporary thinkers like Owen Flanagan—to explore why morality is central to all societies, how it is transmitted through the generations, and why different cultures live by different morals. Her unparalleled ability to join ideas rarely put into dialogue brings light to a subject that speaks to the meaning of being human.

Heroes of Conscience Nov 16 2022 A response to the bemoaned dearth of heroism in the 20th century redefining the criteria for heroic status to include private and public acts of selflessness. The biographical dictionary includes succinct life stories of people as varied as Chicago Bears defensive tackle Chris Zorich, homeless advocate Mitch Snyder, Gray Panther Margaret Kuhn, Mahatma Ghandi, and the Dalai Lama. The Voice of Conscience Dec 25 2020 In Western thought, it has been persistently assumed that in moral and political matters, people should rely on the inner voice of conscience rather than on external authorities, laws, and regulations. This volume investigates this concept, examining the development of the Western politics of conscience, from Socrates to the present, and the formation of the Western ethico-political subject. The work opens with a discussion of the ambiguous role of conscience in politics, contesting the claim that it is the best defense against totalitarianism. It then look back at canonical authors, from the Church Fathers and Luther to Rousseau and Derrida, to show how the experience of conscience constitutes the foundation of Western ethics and politics. This unique work not only synthesizes philosophical and political insights, but also pays attention to political theology to provide a compelling and innovative argument that the experience of conscience has always been at the core of the political Western tradition. An engaging and accessible text, it will appeal to political theorists and philosophers as well as theologians and those interested in the critique of the Western civilization.

Carpetbagger of Conscience Nov 04 2021 This is a biography of John Emory Bryant, a veteran of the Civil War who became a Carpetbagger in Georgia during the Reconstruction era. A member of the Eighth Maine Infantry Regiment during the Civil War, Bryant fought at the Battle of the Crater. After his service in the war, he returned to Maine to study law; however, before he finished his degree, he was contacted by his former commander and friend, General Rufus Saxton, to join him in "new work . . . among former slaves in the South" with the Freedmen's Bureau, an organization designed to protect and assist the newly freed slaves.

Fathers of Conscience Oct 11 2019 *Fathers of Conscience* examines high-court decisions in the antebellum South that involved wills in which white male planters bequeathed property, freedom, or both to women of color and their mixed-race children. These men, whose wills were contested by their white relatives, had used trusts and estates law to give their slave partners and children official recognition and thus circumvent the law of slavery. The will contests that followed determined whether that elevated status would be approved or denied by courts of law. Bernie D. Jones argues that these will contests indicated a struggle within the elite over race, gender, and class issues--over questions of social mores and who was truly family. Judges thus acted as umpires after a man's death, deciding whether to permit his attempts to provide for his slave partner and family. Her analysis of these differing judicial opinions on inheritance rights for slave partners makes an important contribution to the literature on the law of slavery in the United States.

Conscience Aug 13 2022 *Conscience: Phenomena and Theories* was first published in German in 1925 as a dissertation by Hendrik G. Stoker under the title *Das Gewissen: Erscheinungsformen und Theorien*. It was received with acclaim by philosophers at the time, including Stoker's dissertation mentor Max Scheler, Martin Heidegger, and Herbert Spielberg, as quite possibly the single most comprehensive philosophical treatment of conscience and as a major contribution in the phenomenological tradition. Stoker's study offers a detailed historical survey of the concept of conscience from ancient times through the Middle Ages up to more modern thinkers, including Schopenhauer, Nietzsche, Freud, and Cardinal Newman. Stoker analyzes not only the concept of conscience in academic theory but also various types of theories of conscience. His work offers insightful discussions of problems and theories related to the genesis, reliability, and validity of conscience. In particular, Stoker analyzes the moral, spiritual, and psychological phenomena connected with bad conscience, which in turn illuminate the concept of conscience. The book is deeply informed by the traditions of western Christianity. Available for the first time in an accessible English translation, with an introduction by its translator and editor, Philip E. Blosser, it promises to be of interest to philosophers, especially in Christian philosophy and phenomenology, and also to all those interested in moral

and religious psychology, ethics, religion, and theology.

Conscience: A Novel Dec 05 2021 Acclaimed author Alice Mattison's new novel explores the hard choices a young woman and her friends made decades earlier at the height of the Vietnam War. Decades ago in Brooklyn, three girls demonstrated against the Vietnam War, and each followed a distinct path into adulthood. Helen became a violent revolutionary. Val wrote a controversial book, *Bright Morning of Pain*, which was essentially a novelization of Helen's all-too-short but vibrant life. And Olive became an editor and writer, now comfortably settled with her husband, Griff, in modern-day New Haven. When Olive is asked to write an essay about Val's book, a work that attracts and repulses her in equal measure, doing so brings back to the forefront Olive and Griff's tangled histories and their complicated reflections on that tumultuous time in their young lives. Things only become more fraught when Griff borrows Olive's treasured first edition of the novel—and loses it. Then Griff's quirky and audacious new colleague, Jean Argos, finds the book and begins reading it, setting off a series of events that will introduce new conflicts, tragedies, and friendships into the precarious balance of Olive and Griff's once stable home. *Conscience*, the dazzling new novel from award-winning author Alice Mattison, paints the nuanced relationships between the palpable personalities of Olive, Griff, and Jean with her signature wit and precision. And as Mattison explores the ways in which women make a difference—for good or ill—in the world, she elegantly weaves together the past and the present, and the political and the personal.

Crisis of Conscience Jan 26 2021 "A call to arms and to action, for anyone with a conscience, anyone alarmed about the decline of our democracy." - *New York Times*-bestselling author Wendell Potter "Powerful...His extensively reported tales of individual whistleblowers and their often cruel fates are compelling...They reveal what it can mean to live in an age of fraud." - *The Washington Post* "Tom Mueller's authoritative and timely book reveals what drives a few brave souls to expose and denounce specific cases of corruption. He describes the structural decay that plagues many of our most powerful institutions, putting democracy itself in danger." -George Soros A David-and-Goliath story for our times: the riveting account of the heroes who are fighting a rising tide of wrongdoing by the powerful, and showing us the path forward. We live in a period of sweeping corruption -- and a golden age of whistleblowing. Over the past few decades, principled insiders who expose wrongdoing have gained unprecedented legal and social stature, emerging as the government's best weapon against corporate misconduct--and the citizenry's best defense against government gone bad. Whistleblowers force us to confront fundamental questions about the balance between free speech and state secrecy, and between individual morality and corporate power. In *Crisis of Conscience*, Tom Mueller traces the rise of whistleblowing through a series of riveting cases drawn from the worlds of healthcare and other businesses, Wall Street, and Washington. Drawing on in-depth

interviews with more than two hundred whistleblowers and the trailblazing lawyers who arm them for battle--plus politicians, intelligence analysts, government watchdogs, cognitive scientists, and other experts--Mueller anatomizes what inspires some to speak out while the rest of us become complicit in our silence. Whistleblowers, we come to see, are the freethinking, outspoken citizens for whom our republic was conceived. And they are the models we must emulate if our democracy is to survive.

Art in the Light of Conscience Nov 11 2019 Marina Tsvetaeva (1892-1941) was one of the four great Russian poets of the 20th century, along with Akhmatova, Mandelstam and Pasternak. She also wrote outstanding prose. Endowed with 'phenomenally heightened linguistic sensitivity' (Joseph Brodsky), Tsvetaeva was primarily concerned with the nature of poetic creation and what it means to be a poet. Among the most exciting of all explorations of this theme are the essays 'Art in the Light of Conscience', her spirited defence of poetry; 'The Poet on the Critic', which earned her the enmity of many; and 'The Poet and Time', the key to understanding her work. Her richly diverse essays provide incomparable insights into poetry, the poetic process, and what it means to be a poet. This book includes, among many fascinating topics, a celebration of the poetry of Pasternak ('Downpour of Light') and reflections on the lives and works of other Russian poets, such as Mandelstam and Mayakovsky, as well as a magnificent study of Zhukovsky's translation of Goethe's 'Erlking'. Even during periods of extreme personal hardship, her work retained its sense of elated energy and humour, and Angela Livingstone's translations bring the English-speaking reader as close as possible to Tsvetaeva's inimitable voice. First published in English in 1992, "Art in the Light of Conscience" includes an introduction by the translator, textual notes and a glossary, as well as revised translations of 12 poems by Tsvetaeva on poets and poetry.

Conscience: An Interdisciplinary View Apr 28 2021 Value change and uncertainty about the validity of traditional moral convictions are frequently observed when scientific research confronts us with new moral problems or challenges the moral responsibility of the scientist. Which ethics is to be relied on? Which principles are the most reasonable, the most humane ones? For want of an appropriate answer, moral authorities of ten point to conscience, the individual conscience, which seems to be man's unique, directly accessible and final source of moral contention. But what is meant by 'conscience'? There is hardly a notion as widely used and at the same time as controversial as that of conscience. In the history of ethics we can distinguish several trends in the interpretation of the concept and function of conscience. The Greeks used the word *epistēmē* to denote a kind of 'accompanying knowledge' that mostly referred to negatively experienced behavior. In Latin, the expression *conscientia* meant a knowing together pointing beyond the individual consciousness to the common knowledge of other people. In the Bible, especially in the New Testament, *synteresis* is used for the guiding consciousness of the morality of one's own action.

Conscience: A Very Short Introduction Jan 18 2023 Where does our conscience come from, and how reliable is it? Exploring its deep historical roots, Paul Strohm considers what conscience has meant to successive generations. Using examples from popular culture and contemporary politics he demonstrates that conscience is as important today as it has ever been.

Conscience Oct 15 2022 There is an increasing number of divisive issues in our world today, all of which require great discernment. Thankfully, God has given each of us a conscience to align our wills with his and help us make wise decisions. Examining all thirty New Testament passages that touch on the conscience, Andrew Naselli and J. D. Crowley help readers get to know their consciences—a largely neglected topic—and engage with other Christians who hold different convictions.

Offering guiding principles and answering critical questions about how the conscience works and how to care for it, this book shows how the conscience impacts our approach to church unity, ministry, and more.

Formation of Conscience Oct 03 2021 Since the middle of the 20th Century, discussion about conscience has gained more prominence in theology. It is becoming increasingly clear that conscience plays a very important role both in our lives as Christians and in our lives as members of a given community. It is not uncommon to hear people often say: «I acted according to my conscience», «my conscience is my guide»; «my conscience does not accuse me.» If conscience is to perform the function of a leader and a guide, then it must be formed. Here is the crux of the matter and this is what this book is all about. The importance of the correct formation of conscience cannot be over-emphasised. This means not so much providing answers to moral questions as encouraging the process of arriving at a correct moral decision based on reason and mature judgement. This dissertation delves into the formation of conscience especially within the context of Karl Heinz Peschke's *Christian Ethics*. The author agrees with Peschke that the correct formation of conscience is in view of realising the ultimate end of man. And the realisation of the ultimate end of man becomes indeed the ultimate purpose of the moral demand.

An Examination of Conscience of the Understanding Apr 09 2022 *An Examination of Conscience of the Understanding: Empirical Proof of the Existence of God* by Richard L. Scott Seeking his own utmost depth of comprehensive understanding, the author sets out to prove empirically that God exists. The seed of proof is the Birth Paradox, its florescence a faith grounded in his spirituality disposed soul: As empirically real as his conscious self, as mathematically certain as the probability laws of genetic science, as necessary as that the universe requires a creator for its rational possibility, as immanently intuitive as the Divine Allegory he mirrors. The Birth Paradox is the contingency of personal conscious existence on the body. Is there any scientific or commonsense belief as certain of itself? And yet, as a practical proposition, it is an utterly impossible conjunction! Personal consciousness is necessary specific to its own experience, a subtly profound tautology! How is it, then, that one's necessary being can be dependent on a chance body?

Essentials of the Language of Conscience Aug 01 2021 The purpose of *Essentials of the Language of Conscience* is to build a moral decision matrix on ethics, to avoid moral hazard in public policy, and to create an educated citizen of responsibility.

Acts of Conscience Dec 17 2022 In the mid- to late 1940s, a group of young men rattled the psychiatric establishment by beaming a public spotlight on the squalid conditions and brutality in our nation's mental hospitals and training schools for people with psychiatric and intellectual disabilities. Bringing the abuses to the attention of newspapers and magazines across the country, they led a reform effort to change public attitudes and to improve the training and status of institutional

staff. Prominent Americans, such as Eleanor Roosevelt, ACLU founder Roger Baldwin, author Pearl S. Buck, actress Helen Hayes, and African-American activist Mary McLeod Bethune, supported the efforts of the young men. These young men were among the 12,000 World War II conscientious objectors who chose to perform civilian public service as an alternative to fighting in what is widely regarded as America's "good war." Three thousand of these men volunteered to work at state institutions where they discovered appalling conditions. Acting on conscience a second time, they challenged America's treatment of its citizens with severe disabilities. Acts of Conscience brings to light the extra-ordinary efforts of these courageous men, drawing upon extensive archival research, interviews, and personal correspondence. The World War II conscientious objectors were not the first to expose public institutions, and they would not be the last. What distinguishes them from reformers of other eras is that their activities have faded from the professional and popular memory. Taylor's moving account is an indispensable contribution to the historical record.

The Republic of Conscience Feb 07 2022 Former Senator Gary Hart's The Republic of Conscience is a meditation on the growing gap between the founding principles of the United States Constitution and our current political landscape. Going back as early as 400 BC, the idea of a true republic has been threatened by narrow, special interests taking precedence over the commonwealth. The United States Constitution was drafted to protect against such corruption, but as Gary Hart details in The Republic of Conscience, America is nowhere near the republic it set out to be almost 250 years ago, falling to the very misconduct it hoped to avoid. In his latest book, the former Colorado Senator and presidential contender describes 'the increasing gap between purpose and performance' in America, emphasizing how the sense of national interest has become distorted and diluted over time. Focusing on the years after World War II, Hart tackles major American institutions—the military, the CIA, Congress—and outlines how these establishments have led the country away from its founding principles, not closer to them. Full of original and incisive analysis, The Republic of Conscience is Hart's examination and remedy for the millions of Americans who feel jaded, confused, and disappointed by their current government. A testament to Hart's political faith in the founding fathers, this book is one citizen's attempt to recapture the Republic, and a timely reminder for the next July 4th holiday.

Self Observation Jun 30 2021 This book is an in-depth examination of the much needed process of "self" study known as self observation. We live in an age where the "attention function" in the brain has been badly damaged by TV and computers—up to 90 percent of the public under age 35 suffers from attention-deficit disorder! This book offers the most direct, non-pharmaceutical means of healing attention dysfunction. The methods presented here are capable of restoring attention to a fully functional and powerful tool for success in life and relationships. This is also an age when humanity has lost its connection with conscience. When humanity has poisoned the Earth's atmosphere, water, air and soil, when cancer is in epidemic proportions and is mainly an environmental illness, the author asks: What is the root cause? And he boldly answers: Failure to develop conscience! Selfobservation, he asserts, is the most ancient, scientific, and proven means to develop this crucial inner guide to awakening and a moral life. This book is for the lay-reader, both the beginner and the advanced student of self observation. No other book on the market examines this practice in such detail. There are hundreds of books on self-help and meditation, but almost none on self-study via self-observation, and none with the depth of analysis, wealth of explication, and richness of experience which this book offers. Red Hawk, author of 5 collections of poetry, was the Hodder Fellow at Princeton University (1992-93) and is currently a full professor at the University of Arkansas, Monticello. He has practiced self-observation for over 30 years, under the guidance of the Gurdjieff Society of Arkansas, meditation master

Osho Rajneesh, and spiritual teacher, Lee Lozowick.

Acts of Conscience Feb 24 2021 In response to the massive bloodshed that defined the twentieth century, American religious radicals developed a modern form of nonviolent protest, one that combined Christian principles with new uses of mass media. Greatly influenced by the ideas of Mohandas Gandhi, these "acts of conscience" included sit-ins, boycotts, labor strikes, and conscientious objection to war. Beginning with World War I and ending with the ascendance of Martin Luther King Jr., Joseph Kip Kosek traces the impact of A. J. Muste, Richard Gregg, and other radical Christian pacifists on American democratic theory and practice. These dissenters found little hope in the secular ideologies of Wilsonian Progressivism, revolutionary Marxism, and Cold War liberalism, all of which embraced organized killing at one time or another. The example of Jesus, they believed, demonstrated the immorality and futility of such violence under any circumstance and for any cause. Tracing the rise of militant nonviolence across a century of industrial conflict, imperialism, racial terror, and international warfare, Kosek recovers radical Christians' remarkable stance against the use of deadly force, even during World War II and other seemingly just causes. His research sheds new light on an interracial and transnational movement that posed a fundamental, and still relevant, challenge to America's political and religious mainstream.

Guilt Jul 20 2020 This is the first study of guilt from a wide variety of perspectives: psychology, psychiatry, psychoanalysis, evolutionary psychology, anthropology, six major religions, four key moral philosophers, and the law. Katchadourian explores the ways in which guilt functions within individual lives and intimate relationships, looking at behaviors that typically induce guilt in both historical and modern contexts. He examines how the capacity for moral judgments develops within individuals and through evolutionary processes. He then turns to the socio-cultural aspects of guilt and addresses society's attempts to come to terms with guilt as culpability through the legal process. This personal work draws from, and integrates, material from extensive primary and secondary literature. Through the extensive use of literary and personal accounts, it provides an intimate picture of what it is like to experience this universal emotion. Written in clear and engaging prose, with a touch of humor, *Guilt* should appeal to a wide audience.

A Case of Conscience May 10 2022 A space-traveling Jesuit priest confronts a moral but godless alien race in this Hugo Award-winning novel by the author of the *Cities in Flight* saga. Father Ruiz-Sanchez is a dedicated man, a Jesuit priest who is also a scientist, and a scientist who is also a human being. He doesn't feel any genuine conflicts in his belief system—until he is sent to Lithia. The reptilian inhabitants of this distant world appear to be admirable in every way. Untroubled by greed or lust, they live in peace. But they have no concept of God, no literature, and no art. They rely purely on cold reason. But something darker lies beneath the surface: Do the Lithians pose a hidden threat? The answers that unfold could affect the fate of two worlds. Will Ruiz-Sanchez, a priest driven by his deeply human understanding of good and evil, do the right thing when confronted by a race that is alien to its core? The *Science Fiction Encyclopedia* lauds *A Case of Conscience* as "one of the first serious attempts to deal with religion [in science fiction], and [it] remains one of the most sophisticated. It is generally regarded as an SF classic." Readers of Isaac Asimov's *Foundation Trilogy*, Mary Doria Russell's *The Sparrow*, or Walter M. Miller Jr.'s *A Canticle for Leibowitz* will find this award-winning novel a gripping, compelling exploration of some of the most intractable and important questions faced by the human species. Includes an introduction by Hugo and Nebula Award-winning author Greg Bear.

Conscience and Ethics Feb 19 2023 How important is the conscience for the Christian moral life? How should it be understood in relation to the teachings of the Bible

and of church tradition? In this book, Matthew Levering surveys twentieth-century Catholic moral theology to construct an argument for keeping conscience firmly alongside prudence, charity, and the gifts of the Spirit--and for understanding it as something that must be formed by the revealed truths of Scripture as interpreted and applied in the church. Levering shows how conscience-centered ethics came to be--both prior to and following the Second Vatican Council--and how important voices from both the Catholic and Protestant communities criticized the primacy of conscience in favor of an approach that considers conscience within "the broader framework of the Christian moral organism." Rather than engaging with current hot-button issues, Levering presents and deconstructs the work of twenty-six noteworthy theologians from the recent past in order to work through core matters. He begins by examining how the conscience has been dealt with in dialogue with the Bible and in the Catholic "moral manuals" of the twentieth century. He then explores the rebuttals to conscience-centered ethics offered by pre- and post-conciliar Thomists and the emergence of a new, even more problematic conscience-centered ethics in German thought. Amid this wide-ranging introduction to various strands of Catholic moral theology, Levering crafts an incisive intervention of his own against the "abuse of conscience" that besets the church today as it did in the last century.

The Trumpet of Conscience Aug 21 2020 In November and December 1967, Dr. Martin Luther King, Jr., delivered five lectures for the renowned Massey Lecture Series of the Canadian Broadcasting Corporation. The collection was immediately released as a book under the title *Conscience for Change*, but after King's assassination in 1968, it was republished as *The Trumpet of Conscience*. The collection sums up his lasting creed and is his final testament on racism, poverty, and war. Each oration in this volume encompasses a distinct theme and speaks prophetically to today's perils, addressing issues of equality, conscience and war, the mobilization of young people, and nonviolence. Collectively, they reveal some of King's most introspective reflections and final impressions of the movement while illustrating how he never lost sight of our shared goals for justice. The book concludes with "A Christmas Sermon on Peace"--a powerful lecture that was broadcast live from Ebenezer Baptist Church on Christmas Eve in 1967. In it King articulates his long-term vision of nonviolence as a path to world peace.

Conscience and Catholicism Oct 23 2020 In this volume leading ethicists and theologians address "conscience," a term with loaded meaning and controversy in the Catholic Church in recent decades around issues like political participation, human sexuality, war and institutional violence, and theological dissent. Many essays in this challenging and far-ranging volume focus on the tension between the primacy of conscience (codified at Vatican II) and the processes and cultures of Catholic institutions, including schools, hospitals, and medical research facilities. Intended for a scholarly audience, this valuable collection will also appeal to those involved in Catholic health care, catechetical work, and pastoral ministry.

Conscience and Authority in the Medieval Church Jan 14 2020 Alexander Murray has long had an intellectual interest in the history of religion - struggling between

his inbuilt anti-clericism and his pronounced monastic leanings. The five essays in *Conscience and Authority in the Medieval Church* take on this dialectic, addressing the difficult relationship between private conscience and public authority in the twelfth and thirteenth centuries. In any organization, political, military, commercial, or religious, the relationship of conscience and authority is always potentially fraught, and can create dilemmas both for those in authority and those without. This volume records how our European predecessors approached and dealt with the same dilemmas as we face in the modern world.
