Kim Jiyong, Born 1982: A Novel Dec 30 2020 A New York Times Editors Choice Selection A global sensation, Kim Jiyong, Born 1982 "has become...a touchstone for a conversation around feminism and gender" (Sarah Shin, Guardian). One of the most notable novels of the year, hailed by both critics and K-pop stars alike, Kim Jiyong, Born 1982 follows one woman's psychic deterioration in the face of rampant misogyny. In a tidy apartment on the outskirts of Seoul, millennial "everywoman" Kim Jiyong spends her days caring for her infant daughter. But strange symptoms appear: Jiyong begins to impersonate the voices of other women, dead and alive. As she plunges deeper into this psychosis, her concerned husband sends her to a psychiatrist. Fundamentals of Engineering Economics and Decision Analysis Aug 26 2020 The authors cover two general topics: basic engineering economics and risk analysis in this text. Within the topic of engineering economics are discussions on the time value of money and interest relationships. These interest relationships are used to define certain project criteria that are used by engineers and project managers to select the best economic choice among several alternatives. Projects examined will include both income- and service-producing investments. The effects of escalation, inflation, and taxes on the economic analysis of alternatives are discussed. Risk analysis incorporates the concepts of probability and statistics in the evaluation of alternatives. This allows management to determine the probability of success or failure of the project. Two types of sensitivity analyses are presented. The first is referred to as the range approach while the second uses probabilistic concepts to determine a measure of the risk involved. The authors have designed the text to assist individuals to prepare to successfully complete the economics portions of the Fundamentals of Engineering Exam. Contemporary Engineering Economics Aug 18 2022 This text is intended for undergraduate engineering students taking the introductory engineering economics course at Canadian universities. The second Canadian edition of Contemporary Engineering Economics has been thoroughly revised and updated while continuing to adopt a contemporary approach to the subject, and teaching, of engineering economics which made the first edition so successful. This text aims not only to build a sound and comprehensive coverage of the concepts of engineering economics but also to address key educational challenges, such as student difficulty in developing the analytical skills required to make informed financial decisions. This timely revision brings the realities of economics and engineering design into twenty-first century classrooms and helps students integrate these issues as they contemplate product development problems. Tango Zen May 15 2022 Would you like to meditate while dancing Tango? Yes, Buddha can teach you to dance Tango through Zen. You might ask, "How does Tango have anything to do with Zen?" TangoZen is an innovative yet natural way of meditating while dancing Tango. Referring to striking similarities between the two, this book will introduce methods through which Tango dancers and non-dancers can practice TangoZen to experience and enjoy the wonderful benefits, which both Tango and Zen have to offer. Everybody knows meditation is a good thing. For example, Zen meditation, if practiced properly, can create balance, calmness, groundedness, centering, and harmony in mind and body. However, it is difficult to meditate for many reasons. Meditation is mainly practiced while sitting with legs crossed to support and ground one's body. Unfortunately this sitting posture can create uncomfortable feelings and even pains before you benefit from the meditation practice. In addition, despite the importance of practicing meditation regularly, it can be difficult to stick to it with regularity due to the hectic life style we live every day. Can one meditate while moving around instead of sitting down? Although it appears to be sedate and passive, Zen meditation can also be practiced in more active ways than the sitting posture. For example, walking meditation has been practiced among Buddhists since the Buddha himself practiced it. Other forms of Zen meditation in motion can also be found in sports and performing arts.

Handbook of Mathematical Models in Computer Vision May 23 2020 Abstract Biological vision is a rather fascinating domain of research. Scientists of various origins like biology, medicine, neurophysiology, engineering, mathematics, etc. aim to understand the processes leading to visual perception process and at reproducing such systems. Understanding the environment is most of the time done through visual perception which appears to be one of the most fundamental sensory abilities in humans and therefore a significant amount of research effort has been dedicated towards modelling and reproducing human visual abilities. Mathematical methods play a central role in this endeavour. Introduction David Marr's theory was a pioneering step towards understanding visual perception. In his view human vision was based on a complete

surface reconstruction of the environment that was then used to address visual subtasks. This approach was proven to be insufficient by neuro-biologists and complementary ideas from statistical pattern recognition and artificial intelligence were introduced to better address the visual perception problem. In this framework visual perception is represented by a set of actions and rules connecting these actions. The emerging concept of active vision consists of a selective visual perception paradigm that is basically equivalent to recovering from the environment the minimal piece of information required to address a particular task of interest.

Crying in H Mart Oct 28 2020 NEW YORK TIMES BEST SELLER • From the indie rock sensation known as Japanese Breakfast, an unforgettable memoir about family, food, grief, love, and growing up Korean American—"in losing her mother and cooking to bring her back to life, Zauner became herself" (NPR) • CELEBRATING OVER ONE YEAR ON THE NEW YORK TIMES BEST SELLER LIST In this exquisite story of family, food, grief, and endurance, Michelle Zauner proves herself far more than a dazzling singer, songwriter, and guitarist. With humor and heart, she tells of growing up one of the few Asian American kids at her school in Eugene, Oregon; of struggling with her mother's particular, high expectations of her; of a painful adolescence; of treasured months spent in her grandmother's tiny apartment in Seoul, where she and her mother would bond, late at night, over heaping plates of food. As she grew up, moving to the East Coast for college, finding work in the restaurant industry, and performing gigs with her fledgling band--and meeting the man who would become her husband--her Koreanness began to feel ever more distant, even as she found the life she wanted to live. It was her mother's diagnosis of terminal cancer, when Michelle was twenty-five, that forced a reckoning with her identity and brought her to reclaim the gifts of taste, language, and history her mother had given her. Vivacious and plainspoken, lyrical and honest, Zauner's voice is as radiantly alive on the page as it is onstage. Rich with intimate anecdotes that will resonate widely, and complete with family photos, *Crying in H Mart* is a book to cherish, share, and reread.

Making a Global Immigrant Neighborhood Jan 19 2020 Based on more than a decade of research, Making a Global Immigrant Neighborhood charts the evolution of Sunset Park--with a densely concentrated working-poor and racially diverse immigrant population--from the late 1960s to its current status as one of New York City's most vibrant neighborhoods. Tarry Hum shows how processes of globalization, such as shifts in low-wage labor markets and immigration patterns, shaped the neighborhood. She explains why Sunset Park's future now depends on Asian and Latino immigrant collaborations in advancing common interests in community building, civic engagement, entrepreneurialism, and sustainability planning. She shows, too, how residents' responses to urban development policies and projects and the capital represented by local institutions and banks foster community activism. Hum pays close attention to the complex social, political, and spatial dynamics that forge a community and create new models of leadership as well as coalitions. The evolution of Sunset Park so astutely depicted in this book suggests new avenues for studying urban change and community development.

Divided into five parts, it begins with the history of simulation in anesthesiology, its relevant pedagogical principles, and the modes of its employment. Readers are then provided with a

comprehensive review of simulation technologies as employed in anesthesiology and are guided on the use of simulation for a variety of learners: undergraduate and graduate medical trainees, practicing anesthesiologists, and allied health providers. Subsequent chapters provide a 'how-to' guide for the employment of simulation across wide range of anesthesiology subspecialties before concluding with a proposed roadmap for the future of translational simulation in healthcare. The Comprehensive Textbook of Healthcare Simulation: Anesthesiology is written and edited by leaders in the field and includes hundreds of high-quality color surgical illustrations and photographs.

Contemporary Engineering Economics Text with 3 1/2" Disk and Case Apr 21 2020  
Momofuku Feb 18 2020 With 200,000+ copies in print, this New York Times bestseller shares the story and the recipes behind the chef and cuisine that changed the modern-day culinary landscape. Never before has there been a phenomenon like Momofuku. A once-unrecognizable word, it's now synonymous with the award-winning restaurants of the same name in New York City (Momofuku Noodle Bar, Ssäm Bar, Ko, Má Pêche, Fuku, Nishi, and Milk Bar), Toronto, and Sydney. Chef David Chang single-handedly revolutionized cooking in America and beyond with his use of bold Asian flavors and impeccable ingredients, his mastery of the humble ramen noodle, and his thorough devotion to pork. Chang relays with candor the tale of his unwitting rise to superstardom, which, though wracked with mishaps, happened at light speed. And the dishes shared in this book are coveted by all who've dined—or yearned to—at any Momofuku location (yes, the pork buns are here). This is a must-read for anyone who truly enjoys food.

The CRC Handbook of Mechanical Engineering, Second Edition Sep 26 2020 During the past 20 years, the field of mechanical engineering has undergone enormous changes. These changes have been driven by many factors, including: the development of computer technology worldwide competition in industry improvements in the flow of information satellite communication real time monitoring increased energy efficiency robotics automatic control increased sensitivity to environmental impacts of human activities advances in design and manufacturing methods These developments have put more stress on mechanical engineering education, making it increasingly difficult to cover all the topics that a professional engineer will need in his or her career. As a result of these developments, there has been a growing need for a handbook that can serve the professional community by providing relevant background and current information in the field of mechanical engineering. The CRC Handbook of Mechanical Engineering serves the needs of the professional engineer as a resource of information into the next century.

Breaking Bread Jun 04 2021 Nearly 70 renowned New England writers gather round the table to talk food and how it sustains us—mind, body, and soul A collection of essays by top literary talents and food writers, Breaking Bread celebrates local foods, family, and community, while exploring how what's on our plates engages with what's off: grief, pleasure, love, ethics, race, and class. Here, you'll find Lily King on chocolate chip cookies, Richard Russo on beans, Jennifer Finney Boylan on homemade pizza, Susan Minot on the non-food food of her youth, and Richard Ford on why food doesn't much interest him. Nancy Harmon Jenkins talks scallops, and Sandy Oliver the pleasures of being a locavore. Other essays address a beloved childhood food from Iran, the horror

of starving in a prison camp, the urge to bake pot brownies for an ill friend, and the pleasure of buying a prized chocolate egg for a child. Profits from this collection will benefit Blue Angel, a nonprofit combating food insecurity by delivering healthy food from local farmers to those in need.
