If you are ready to break through to a whole new level of fulfillment and purpose in your life, you'll love the simple, practical approach. Buy this book if you're ready to shatter your limits and enjoy a richer life today. The basic premise of the book at hand is that there is meaning to be 'excavated' (in both meanings of the word) from Christian responses to pagan sculpture in the period

from the fourth to the sixth century. More than mindless acts of religious violence by fanatical mobs, these responses are revelatory of contemporary conceptions of images and the different ways in which the material manifestations of the pagan past could be negotiated in Late Antiquity. Statues were important to the social, political and religious life of cities across the Mediterranean, as well as part of a culture of representation that was intricately bound to bodily taxonomies and visual practices. This collection of sixteen new critical essays offers fresh perspectives on the Book of Steps, adding greater detail and depth to our understanding of the work's intriguing picture of early Syriac asceticism as practiced within the life of a local church and community. A NEW YORK TIMES BESTSELLER A New York Times Notable Book "Riveting, heartbreaking, sometimes difficult, always inspiring." —The New York Times Book Review "An incredibly moving memoir about what it means to be a doctor." —Ellen Pompeo As seen/heard on Fresh Air, The Daily Show with Trevor Noah, NBC Nightly News, MSNBC, Weekend Edition, and more An emergency room physician explores how a life of service to others taught her how to heal herself. Michele Harper is a female, African American emergency room physician in a profession that is overwhelmingly male and white. Brought up in Washington, D.C., in a complicated family, she went to

Harvard, where she met her husband. They stayed together through medical school until two months before she was scheduled to join the staff of a hospital in central Philadelphia, when he told her he couldn't move with her. Her marriage at an end, Harper began her new life in a new city, in a new job, as a newly single woman. In the ensuing years, as Harper learned to become an effective ER physician, bringing insight and empathy to every patient encounter, she came to understand that each of us is broken—physically, emotionally, psychically. How we recognize those breaks, how we try to mend them, and where we go from there are all crucial parts of the healing process. The Beauty in Breaking is the poignant true story of Harper's journey toward self-healing. Each of the patients Harper writes about taught her something important about recuperation and recovery. How to let go of fear even when the future is murky: How to tell the truth when it's simpler to overlook it. How to understand that compassion isn't the same as justice. As she shines a light on the systemic disenfranchisement of the patients she treats as they struggle to maintain their health and dignity, Harper comes to understand the importance of allowing ourselves to make peace with the past as we draw support from the present. In this hopeful, moving, and beautiful book, she passes along the precious, necessary lessons that she has learned as a

daughter, a woman, and a physician. IT WAS ONLY A MATTER OF TIME.... Once widely considered an impossibility--the stuff of science fiction novels--time travel may finally be achieved in the twenty-first century. In Breaking the Time Barrier, bestselling author Jenny Randles reveals the nature of recent, breakthrough experiments that are turning this fantasy into reality. The race to build the first time machine is a fascinating saga that began about a century ago, when scientists such as Marconi and Edison and Einstein carried out research aimed at producing a working time machine. Today, physicists are conducting remarkable experiments that involve slowing the passage of information, freezing light, and breaking the speed of light--and thus the time barrier. In the 1960s we had the "space race." Today, there is a "time race" involving an underground community of working scientists who are increasingly convinced that a time machine of some sort is finally possible. Here, Randles explores the often riveting motives of the people involved in this quest (including a host of sincere, if sometimes misguided amateurs), the consequences for society should time travel become a part of everyday life, and what evidence might indicate that it has already become reality. For, if time travel is going to happen--and some Russian scientists already claim to have achieved it in a lab--then its effects may already be apparent. An

Collen Dixon's "The Break of Dawn" will keep readers deep in thought long after they finish reading her story about a young desperate mother terrified that her own daughter will grow up and become victimized herself. Dywane D. Birch's "Victory Begins With Me" reflects how one woman has to struggle to get her life back to normal. Shonda Cheekes' "Silent Suffering" flips the script when a man

finds himself abused by the female in his life. Newcomer J.L. Woodson's "God Does Answer Prayers" deals with a young boy fighting for his life in a hospital bed, put there by one of the people who is supposed to love him the most: a parent. These stories capture the dangerous realities of domestic abuse, while also pointing toward the steps that need to be taken to break the cycle that perpetuates it. From the editor in chief of Breitbart News, a firsthand account of how the establishment media became weaponized against Donald Trump and his supporters on behalf of the political left. Alex Marlow was just a twenty-one-year-old UC Berkeley student when renowned media mogul Andrew Breitbart hired him as his first employee. Breitbart began mentoring Marlow on how to fight the culture war one headline at a time and to remain resilient in the face of personal attacks. Now, in this eye-opening and timely book, Marlow explains how the establishment press destroyed its own credibility with a relentless stream of "fake news" designed to smear Donald Trump and his supporters while advancing a

leftist agenda. He also reveals key details on how our information gatekeepers truly operate and why America's "fake news" moment might never end. Breitbart—and Trump—began banging the drum about "fake news" during the 2016 election, and it resonated with millions of voters because they intuitively knew the corporate media was willing to say or write anything to achieve their political ends. It's a battle cry that continues to this day. Alex and his team of researchers elucidate the stunning details of the key "fake news" moments of the Trump era and take a deep dive into some of the right's favorite media targets: from Bloomberg, CNN, The Washington Post, and The New York Times to the tech elite in Silicon Valley. Deeply researched and eye-opening, *Breaking the News* rips back the curtain on the inner workings of how the establishment media weaponizes information to achieve their political and cultural ends. In his debut novel, Jerry Gordon takes readers deep inside the longest standoff in law enforcement history for an apocalyptic thriller that challenges the news media's reporting of the event, the wisdom of militarizing domestic law enforcement, and the blurry line between religion and cult. "The things we do to each other are more awful than any haunted house, ghoul, or demon could ever be, and in BREAKING THE WORLD, Jerry Gordon delivers an unflinching look at real-life horror. This novel will gnaw its way through your skull, burrow into your brain, and mess with you in the best way possible. It's a pitch-black tale of moral ambiguity, with sympathetic characters facing a home-grown apocalypse of twisted faith, fire, and madness. It's one of the strongest horror debuts in recent memory, which not only entertains but provides penetrating insight into a dark chapter of American history. This is horror done right." - Tim Waggoner, Bram Stoker Award-winning author of LIKE DEATH "An absorbing blend of history and narrative fiction which elevates the Waco tragedy into an unforgettable exploration of society, faith, and truth. If you want to land a job in tech, you need to know how to code. That much is obvious. A skill that is equally as important-but often overlooked-is knowing how to market yourself to potential employers, especially if you're new to the industry. Do you know how to land interviews and deliver a compelling case for why you should be hired? Bobby Davis Jr. has helped place hundreds of aspiring coders into high-paying tech jobs. In *Breaking the Code*, he shares the proven strategies he uses with his students and offers up insider tips that will make you stand out from the competition. You'll learn how to avoid the biggest stumbling block when it comes to landing a job and what you should build before an interview if you don't have a project to show. Bobby also teaches you the secret to accessing jobs not found on corporate job boards and exponentially increasing your chances of getting the job you want. The path to \$100,000 a year-and infinite possibilities beyond that-begins with *Breaking the Code*. Yale professor and leading expert on the psychology of successful aging, Dr. Becca Levy, draws on her ground-breaking research to show how age beliefs can be improved so they benefit all aspects of the aging process, including the way genes operate and the

extension of life expectancy by 7.5 years. The often-surprising results of Levy's science offer stunning revelations about the mind-body connection. She demonstrates that many health problems formerly considered to be entirely due to the aging process, such as memory loss, hearing decline, and cardiovascular events, are instead influenced by the negative age beliefs that dominate in the US and other ageist countries. It's time for all of us to rethink aging and *Breaking the Age Code* shows us how to do just that. Based on her innovative research, stories that range from pop culture to the corporate boardroom, and her own life, Levy shows how age beliefs shape all aspects of our lives. She also presents a variety of fascinating people who have benefited from positive age beliefs as well as an entire town that has flourished with these beliefs. *Breaking the Age Code* is a landmark work, presenting not only easy-to-follow techniques for improving age beliefs so they can contribute to successful aging, but also a blueprint to reduce structural ageism for lasting change and an age-just society. The New York Times bestseller - a "crystal-clear, constantly engaging" (Jared Diamond) exploration of the role that religious belief plays in our lives and our interactions For all the thousands of books that have been written about religion, few until this one have attempted to examine it scientifically: to ask why—and how—it has shaped so many lives so strongly. Is religion a

product of blind evolutionary instinct or rational choice? Is it truly the best way to live a moral life? Ranging through biology, history, and psychology, Daniel C. Dennett charts religion's evolution from "wild" folk belief to "domesticated" dogma. Not an antireligious screed but an unblinking look beneath the veil of orthodoxy, *Breaking the Spell* will be read and debated by believers and skeptics alike. The instant New York Times bestseller. "An instant classic of investigative journalism... 'All the President's Men' for the Me Too era." — Carlos Lozada, *The Washington Post*

From the Pulitzer Prize-winning reporters who broke the news of Harvey Weinstein's sexual harassment and abuse for the New York Times, Jodi Kantor and Megan Twohey, the thrilling untold story of their investigation and its consequences for the #MeToo movement For many years, reporters had tried to get to the truth about Harvey Weinstein's treatment of women. Rumors of wrongdoing had long circulated. But in 2017, when Jodi Kantor and Megan Twohey began their investigation into the prominent Hollywood producer for the New York Times, his name was still synonymous with power. During months of confidential interviews with top actresses, former Weinstein employees, and other sources, many disturbing and long-buried allegations were unearthed, and a web of onerous secret payouts and nondisclosure agreements was revealed. These shadowy

settlements had long been used to hide sexual harassment and abuse, but with a breakthrough reporting technique Kantor and Twohey helped to expose it. But Weinstein had evaded scrutiny in the past, and he was not going down without a fight; he employed a team of high-profile lawyers, private investigators, and other allies to thwart the investigation. When Kantor and Twohey were finally able to convince some sources to go on the record, a dramatic final showdown between Weinstein and the New York Times was set in motion. Nothing could have prepared Kantor and Twohey for what followed the publication of their initial Weinstein story on October 5, 2017. Within days, a veritable Pandora's box of sexual harassment and abuse was opened. Women all over the world came forward with their own traumatic stories. Over the next twelve months, hundreds of men from every walk of life and industry were outed following allegations of wrongdoing. But did too much change—or not enough? Those questions hung in the air months later as Brett Kavanaugh was nominated to the Supreme Court, and Christine Blasey Ford came forward to testify that he had assaulted her decades earlier. Kantor and Twohey, who had unique access to Ford and her team, bring to light the odyssey that led her to come forward, the overwhelming forces that came to bear on her, and what happened after she shared her allegation with the world. In the tradition of great

investigative journalism, She Said tells a thrilling story about the power of truth, with shocking new information from hidden sources. Kantor and Twohey describe not only the consequences of their reporting for the #MeToo movement, but the inspiring and affecting journeys of the women who spoke up—for the sake of other women, for future generations, and for themselves. Laura Brandon's promise to her dying father was simple: to visit an elderly woman she'd never heard of before. A woman who remembers nothing—except the distant past. Visiting Sarah Tolley seemed a small enough sacrifice to make. But Laura's promise results in another death. Her husband's. And after their five-year-old daughter, Emma, witnesses her father's suicide, Emma refuses to talk about it...to talk at all. Frantic and guilt ridden, Laura contacts the only person who may be able to help. A man she's met only once—six years before. A man who doesn't know he's Emma's real father. Guided only by a child's silence and an old woman's fading memories, the two unravel a tale of love and despair, of bravery and unspeakable evil. A tale that's shrouded in silence...and that unbelievably links them all. Effective layout is essential to communication and enables the end user to not only be drawn in with an innovative design, but to digest information easily. Making and Breaking the Grid is a comprehensive layout design workshop that assumes that in order to effectively break the

rules of grid-based design, one must first understand those rules and see them applied to real-world projects. Basics include composing typographic space, format determination, and sequencing and systemization. Various types of grids manuscript, column, modular, hierarchical are also covered. Text reveals top designers' work in process and rationale. Projects with similar characteristics are linked through a simple notational system that encourages exploration and comparison of structure ideas. Each project is shown comprehensively so readers can see its structure revealed over several pages, at a size that allows for inspection of detail. Also included are historical overviews that summarize the development of layout concepts, both grid-based and non-grid based, in modern design practice. Once you break the habit of being yourself and truly change your mind, your life will never be the same! The spiritual life in Islam begins with *riyadat al-nafs*, the inner warfare against the ego. Distracted and polluted by worldliness, the lower self has a tendency to drag the human creature down into arrogance and vice. Only by a powerful effort of will can the sincere worshipper achieve the purity of soul which enables him to attain God's proximity. This translation of two chapters from *The Revival of the Religious Sciences* (Ihya' 'Ulum al-Din) details the sophisticated spiritual techniques adopted by classical Islam. In the first step, *On Disciplining the Soul*, which cites copious anecdotes from the Islamic scriptures and biographies of the saints,

Ghazali explains how to acquire good character traits, and goes on to describe how the sickness of the heart may be cured. In the second part, *Breaking the Two Desires*, he focusses on the question of gluttony and sexual desire, concluding, in the words of the Prophet, that 'the best of all matters is the middle way'. The translator has added an introduction and notes which explore Ghazali's ability to make use of Greek as well as Islamic ethics. The work will prove of special interest to those interested in Sufi mysticism, comparative ethics, and the question of sexuality in Islam. A company's worst enemy is not always the competition. Sometimes it's the fear that lives within its own walls. The greatest threat to an organization's success is not always the competition. Often, it is what a company does to itself. Because of fear, companies become plagued with barriers and bureaucracy that limit success, crush employees, and infuse frustration and a sense of futility across the enterprise. It starts with a narrowing of focus, which leads to the first level of bureaucracy: parochialism. Parochialism exists when managers and departments begin to view the world through the filter of their own little silo and build walls made of rules and policies to protect their turf. As businesses grow and become more complex, the second level of bureaucracy is reached: territorialism. While parochialism is about protecting a department from outsiders, territorialism is

about controlling those inside the silo. The third and final level of bureaucracy is empire building, which is a response to perceived threats to a department's ability to be self-sufficient. These barriers cost organizations a fortune in inefficiency, turnover, waste, and demoralization. Tearing down these barriers is difficult, but it can be done. Parochialism can be eliminated by resetting rules and policies and refocusing on the ultimate mission of the organization. Territorialism can be eliminated by creating true empowerment, along with appropriate levels of accountability. Empire building can be addressed through shared goals and a set of guiding principles that help act as a referee in decision making. But that's not enough. Managers must also create a culture of courage to enable employees to take advantage of these new freedoms and accountabilities. Courage killers must be rooted out and dealt with swiftly and strongly. Finally, leaders must refocus on mission success rather than just checking off their part of the process, manage reference points, and engage employees. By doing all these things, an organization can become fearless and unstoppable. *Breaking the Book* is a manifesto on the cognitive consequences and emotional effects of human interactions with physical books that reveals why the traditional humanities disciplines are resistant to 'digital' humanities. Explores the reasons why the traditional humanities

disciplines are resistant to 'digital humanities' Reveals facets of book history, offering it as an example of how different media shape our modes of thinking and feeling Gathers together the most important book history and literary criticism concerning the hundred years leading up to the early 19th-century emergence of mass print culture Predicts effects of the digital revolution on disciplinarity, expertise, and the institutional restructuring of the humanities NASA's history is a familiar story, one that typically peaks with Neil Armstrong taking his small step on the Moon in 1969. But America's space agency wasn't created in a vacuum. It was assembled from pre-existing parts, drawing together some of the best minds the non-Soviet world had to offer. In the 1930s, rockets were all the rage in Germany, the focus both of scientists hoping to fly into space and of the German armed forces, looking to circumvent the restrictions of the Treaty of Versailles. One of the key figures in this period was Wernher von Braun, an engineer who designed the rockets that became the devastating V-2. As the war came to its chaotic conclusion, von Braun escaped from the ruins of Nazi Germany, and was taken to America where he began developing missiles for the US Army. Meanwhile, the US Air Force was looking ahead to a time when men would fly in space, and test pilots like Neil Armstrong were flying cutting-edge, rocket-powered aircraft in the thin

upper atmosphere. Breaking the Chains of Gravity tells the story of America's nascent space program, its scientific advances, its personalities and the rivalries it caused between the various arms of the US military. At this point getting a man in space became a national imperative, leading to the creation of the National Aeronautics and Space Administration, otherwise known as NASA. The Book of Revelation contains passages of great beauty and comfort, as well as passages that strike the casual reader as bizarre, bewildering, and sometimes frightening. How are readers today to discern God's message in this peculiar part of the Bible? Breaking the Code provides a trustworthy guide to the rich symbolism of this important biblical book. Noted biblical scholar Bruce M. Metzger presents the fruits of solid scholarship in a non-academic style. Breaking the Code serves as a key for understanding this powerful and puzzling book from the first century of the Christian Era. Topics include: Introducing the Book of Revelation/John's Vision of the Heavenly Christ (Revelation 1:1-20) Letters to Churches/More Letters to Churches (Revelation 2:1- 3:22) John's Vision of God and the Lamb (Revelation 4:1-5:14) Opening the Seven Seals of God's Scroll (Revelation 6:1-8:2) Sounding the Seven Trumpets (Revelation 8:3-11:19) The Satanic Trinity: The Dragon and the Two Beasts (Revelation 12:1-14:20) The Seven Bowls of God's

Wrath (Revelation 15:1-18:24) The Final Victory and the Last Judgment/John's Vision of the Heavenly Jerusalem (Revelation 19:1-22:21) Making and Breaking the Grid: A Graphic Design Layout Workshop (Third Edition) is the ultimate resource for designers who want to understand the rules of the grid, so they can get better at breaking them. Do books need to change as they move from paper to screen? I've written "Breaking the Page" to answer that question. My investigation isn't a blank survey of what technology makes possible. It's a study conducted on behalf of those who care most about books: writers and readers. I cover the fundamental aspects of the reading experience. How we become aware of books and what's inside them; how we comprehend, retain, and recall what we have read; how we share with others the parts we love. As a guidebook "Breaking the Page" aims to serve those with a professional interest in bookmaking. I have included many specific design ideas, including new kinds of opening sequences, text and video integration techniques, and multi-scale document designs. But I think general interest readers will find the discussion worth their attention. The transformation of the book has implications that range from the personal to the political. Books shape how we raise our kids. They control how ideas spread and how we change the kind of person we have become. Understanding this epic shift from paper to screen... - what we gain, - what

we lose, - what is to be done ...is a topic worthy of its own book. Bringing to life the historic battle for the 1967 black-college championship between Grambling College and Florida A&M, this exciting book tells the story of two legendary coaches and two talented quarterbacks, who, together, broke the color line, revolutionizing college sports and transforming the NFL. Goran Musić has investigated the changing ways in which blue-collar workers perceived the recurring crises of the regime. Two self-managed metal enterprises, one in Serbia another in Slovenia, provide the frame of the analysis in the time span between 1945 and 1989. These two factories became famous for strikes in 1988 that evoked echoes in popular discourses in former Yugoslavia. Drawing on interviews, factory publications and other media, local archives, and secondary literature, Musić analyzes the two cases, going beyond the clichés of political manipulation from the top and workers' intrinsic attraction to nationalism. The author explains how, in the later phase of communist Yugoslavia, growing social inequalities among the workers and undemocratic practices inside the self-managed enterprises facilitated the spread of a nationalist and pro-market ideology on the shop floors. Restoring the voice of the working class in history, Musić presents Yugoslavia's workers actors in their own right, rather than as a mass easily manipulated by nationalist or populist politicians. The book thus seeks to open a debate on

the social processes leading up to the dissolution of Yugoslavia. The book, written under the pseudonym, Peter Michaels, features Carol Robinson's articles for the *Marianist* written in 1947-1948. They offer an analysis and critique of modern life. It is the first book published from the "Collected Works" series which will put back into publication all of the known works of Carol Jackson Robinson.
