Mastering the Nikon D750 Mar 29 2021 Nikon D850 User Manual May 19 2020 An All in One Guide to Master your Nikon D850 The Nikon D850 is a high resolution full-frame DSLR, boasting a 46MP backside-illuminated

CMOS sensor. But, in a fairly radical departure for the series, it is also one of the company's fastest-shooting DSLRs. The use of a backside illuminated (BSI) sensor means that the light collecting elements of the sensor are closer to the surface of the chip. This should not only increase the efficiency of the sensor (improving low light performance) but should also be expected to make the pixels near the edges of the sensor better able to accept light approaching with high angles of incidence, improving peripheral image quality. Taking the perfect shot requires more than just years of experience and good lighting!
